Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods as at the end of January 2015. This digest follows the October 2014 Digest published in March 2014. Due to the backlog in production of the monthly digests, a decision was taken to combine November 2014, December 2014 and January 2015 in the current digest. However, discussions will be based on January 2015 mainly.

Since Statistics Botswana receives new data on a monthly basis, and there is continuous data editing as various tables and reports are produced, the database is therefore updated from time to time. As a result of editing and revision of data, figures on previous Monthly Digests and those on the current Monthly Digest (for the corresponding months) may differ.

This Monthly Digest presents summaries of Total Merchandise Trade from the first quarter of 2009 to January 2015 as presented on **Table 1**. Trade by Principal Commodity groups is presented on **Table 2.1** for imports and **Table 2.2** for exports, giving data from the first quarter of 2009 to the month under review. **Table 2.3** gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on **Tables 3.1** and **3.2** for imports and exports respectively.

Three graphical presentations appear in this digest. **Chart 1** shows imports, total exports and trade balance from January 2009 to January 2015, while **Charts 2.1** and **2.2** show Principal Commodity groups for major imports and exports respectively, for January 2015 only.

Statistics on commodities that were mostly traded will be presented for November and December 2014 as well as for January 2015 on **Tables 4.1 (A), (B) & (C)** for imports while exports are presented on **Tables 4.2 (A), (B) & (C)**. Trade at Chapter Level (2 digits Harmonized Commodity Description & Coding System) appears on Tables 5 (A) & (B), presenting data for October & November 2014 on Table 5 (A) and December 2014 and January 2015 on **Table 5 (B)**.

Table 1 distinguishes domestic exports from re-exports while other tables give total exports, which is the sum of the two.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana outputs/publications are available on the website at www.cso.gov.bw, and at the Statistics Botswana Library (Head-Office, Gaborone).

We sincerely thank all stakeholders involved in the formulation of this monthly digest, their continued support and feedback, as we strive to better serve Botswana and all other important users of our products and services.

A.N Majelantle
Statistician General
April 2015

1.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports, re-exports and trade balance.

1.1 Data Revision

Table A presents the revision of data for August, September and October 2014. This table shows a small increase of 0.1 percent (P4.5 million) in the October 2014 import value when comparing figures from the October 2014 and January 2015 digests. Total Exports for October 2014 increased by P2.6 million during the same period.

Table A: Data Revision: August 2014 to October 2014 and as at October 2014 and January 2015 Digest (Million PULA)

Month	As at October 2014 Digest			As at January 2015 Digest			Difference			Differences as %		
	Imports (CIF)	Total Exports	Trade Balance	Imports (CIF)	Total Exports	Trade Balance	Imports (CIF)	Total Exports	Trade Balance	Imports (CIF)	Total Exports	Trade Balance
August	6,081.8	7,947.7	1,865.8	6,082.6	7,947.9	1,865.3	0.8	0.2	(0.6)	0.0	0.0	(0.0)
September	6,257.2	3,557.9	(2,699.2)	6,258.1	3,560.6	(2,697.5)	0.9	2.7	1.8	0.0	0.1	0.1
October	6,701.3	6,494.3	(207.1)	6,705.9	6,496.9	(209.0)	4.5	2.6	(1.9)	0.1	0.0	(0.0)

() denotes negative numbers

Discussions on Sub-Sections 1.2 to 1.4 are based on **Table 1**.

Revision of the database to cater for changes in the treatment of Diamonds for aggregation is done as on-going process as this is a rigorous exercise that entails checks and cross checks in the customs and statistics databases. In the current monthly digest, data for the whole of 2014 has been revised. Data for July 2012 to December 2013 is still as published in the October 2014 Monthly Digest and revision of the data is ongoing.

1.2 Imports

Discussions on imports are based on cost, insurance and freight (CIF) value. January 2015 total imports were valued at P4, 437.9 million, showing an increase of 0.4 percent (P16.1 million) from the December 2014 value of P4, 421.8 million.

1.3 Total Exports

In January 2015 total exports were valued at P5, 770.4 million, an increase of 4.2 percent (P232.1 million) from the December 2014 value of P5, 538.3 million.

1.4 Trade Balance

A trade surplus of P1, 332.5 million was recorded in January 2015.

Chart 1: Total Merchandise Trade - January 2009 to January 2015 (Million PULA)

() denotes negative number

Chart 1 shows trade surplus in January 2015. It should be noted that trade balance is largely influenced by the value of Diamonds traded as these are associated with high values.

2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; “*Machinery & Electrical Equipment*” which combines machines and electrical appliances; “*Vehicles & Transport Equipment*” which combines vehicles and other equipment used for transport purposes.

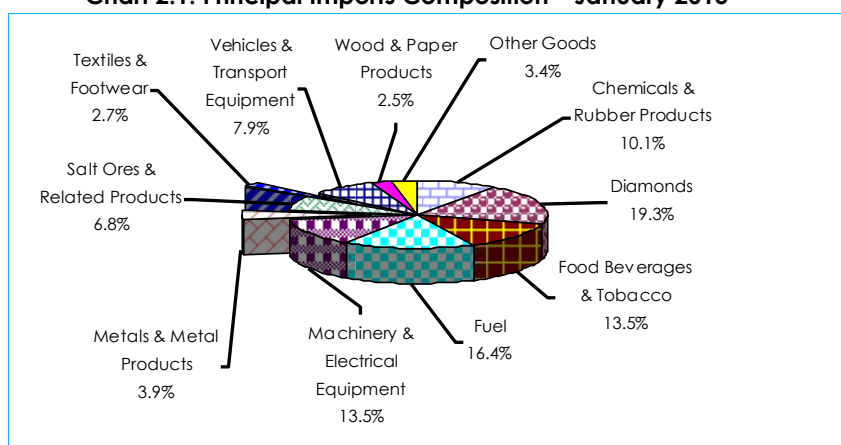

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groupings’ contributions to the total remain minimal. In such cases, the commodities are grouped together under the general category called “*Other*”.

2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on **Table 2.1**, covering the first quarter of 2009 to January 2015. Percentage distributions are however only shown for totals of the years 2013 and 2014, as well as for the months of November 2014, December 2014 and January 2015. **Chart 2.1**, gives a graphical presentation of Principal Import Commodity groups for January 2015 only.

Composition of imports by principal commodities for January 2015, shows that *Diamonds* contributed the highest to total imports (P4, 437.9 million) with 19.3 percent (P885.2 million), followed by *Fuel* with 16.4 percent (P728.7 million). *Machinery & Electrical Equipment* and *Food, Beverages & Tobacco* each contributed 13.5 percent to total imports during the month, with P601.1 million and P600.7 million respectively.

Chart 2.1: Principal Imports Composition – January 2015

Note: Other Goods include all Other Goods not specified as in Table 2.1

2.2 Principal Exports

January 2015 total exports were valued at P5, 770.4 million, with 84.2 percent (P4, 860.4 million) attributed to exports of Diamonds. It should be noted that these values include Diamonds exported from the aggregation process. Consequently these are not diamonds produced by Botswana only.

Copper Nickel contributed 7.2 percent (P418.3 million) while Machinery & Electrical Equipment; and Vehicles & Transport Equipment contributed 2.1 percent (P120.1 million) and 1.5 percent (P84.2 million) respectively. Machinery & Electrical Equipment consists mainly of re-export of goods that were initially imported.

Percentage distributions for major export groups can be observed on Table 2.2 while Chart 2.2 gives the graphical presentation for January 2015 only. Total exports discussed here are the sum of domestic exports and re-exports.

Chart 2.2: Principal Exports Composition – January 2015

Note: Other Goods: include all Other Goods not specified in Table 2.2

3.0 TRADE BY REGION AND MAJOR PARTNERS

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on Table 3.1 for imports and Table 3.2 for exports.

3.1 Imports by Region and Major Trading Partners

Imports for January 2015 were valued at P4, 437.9 million, with 75.5 percent (P3, 350.0 million) coming from South Africa and 1.0 percent (P42.8 million) from Namibia.

During the period under review, imports from Asia were valued at P323.0 million, representing 7.3 percent of total imports. China and Israel contributed 1.9 percent (P82.4 million) and 1.4 percent (P64.2 million) respectively, to total imports recorded during January 2015.

The European Union (EU) supplied imports valued at P306.0 million, representing 6.9 percent of total imports during January 2015. Belgium and Germany contributed 3.6 percent (P160.1 million) and 1.6 percent (P70.6 million) respectively, to total imports during the same period.

Imports from Canada, the United States of America (USA) and Switzerland were valued at P208.0 million, P101.2 million and P72.6 million in January 2015, representing 4.7 percent, 2.3 percent and 1.6 percent respectively of total imports during the month.

Imports at regional and country level (for major trading partners) are presented on Table 3.1; however, percentage distributions do not form part of this table.

3.2 Exports by Region and Major Trading Partners

Total exports for January 2015 were valued at P5, 770.4 million, with 35.5 percent (P2, 048.5 million) destined to Asia. Singapore received most of the exports destined to Asia at the value of P745.0 million, representing 12.9 percent of total exports. India, Israel and Hong Kong followed with contributions of 10.7 percent (P617.3 million), 4.5 percent (P257.8 million) and 3.4 percent (P195.4 million) respectively, of total exports during the month under review.

Exports destined to the EU were valued at P1, 075.4 million, representing 18.6 percent of total exports during the period under review. Belgium received most exports destined to EU, having received 16.6 percent (P956.3 million) of total exports during January 2015. This was followed by Finland with 1.5 percent (P89.1 million) of total exports during the same month.

South Africa and Namibia received 16.6 percent (P960.6 million) and 12.3 percent (P708.5 million) respectively, of total exports during the month under review.

Exports to Canada were valued at P393.0 million, representing 6.8 percent of total exports (P5, 770.4 million) during January 2015. Norway, Switzerland and the United States of America (USA) received 3.7 percent (P215.8 million), 3.3 percent (P188.6 million) and 1.0 percent (P55.6 million) respectively, of total exports during the same month.

Other destinations for exports can be observed on Table 3.2; however, percentage distributions do not form part of the table.

4.0 ANNEXURE

5.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (ex-warehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance & freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country. This means that exports are valued as at the time they cross the border of the exporting country.

5.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

5.2 Definitions used

Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the flour and other bye products from the milling process, these will all leave the country as domestic exports.

Re-Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.

Total exports: This is the sum of domestic exports and re-exports.

Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

5.3 Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as re-exports. This was based on IMTS 2010 Compilers' Manual (Page 225) concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

These are reported as re-exports because aggregation or mixing of the diamonds and then sorting them by size and colour leaves the goods unchanged with regard to commodity description and code. These diamonds come into the country as rough diamonds and leave the country as rough diamonds.

5.3.1 Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are now being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a follow-up document, referred to as "attached document" will show a disaggregation of these imports according to the various countries that contributed to the consignment.

- I. In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country
- II. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment
- III. If part of the consignment was originally from Botswana, this is recorded as re-import and will form part of total imports.

5.3.2 Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The "attached document", giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. Diamonds that originated from outside Botswana will be classified as re-exports while those originating from Botswana will be recorded as domestic exports.

In Table 1 of Botswana International Merchandise Trade Monthly Digest, diamonds that originated from elsewhere and were later exported are recorded under Re-exports together with other goods that were originally imported for home use and are now being exported. Diamonds of Botswana origin are recorded under Domestic Exports together with other goods of Botswana origin. The other tables in the digest report on total exports, which is the sum of Domestic Exports and Re-exports.

5.4 Exclusions from IMTS

• Goods in Transit

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.

• Goods temporarily admitted or dispatched

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

- **Monetary Gold**

This is gold to which the monetary authorities have title and is held as reserve assets.

- **Issued banknotes and securities and coins in circulation**

These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
