Annual inflation in August 2014 was lower than the 5.6 percent recorded during the same month in 2013. The downward movement of annual inflation rate, between August 2013 and August 2014, was attributed to the steady prices of commodities especially the main components of *Transport and Food & Non-Alcoholic Beverages* which dropped by 5.5 and 1.8 percentage points respectively. The inflation rates for regions between July and August, indicated that cities & towns' went up to 4.5 from 4.3 percent, Urban villages' and rural villages' remained unchanged at 4.5 percent and 5.0 percent respectively.

The August national Consumer Price Index registered an increase of 0.3 percent, advancing from 177.0 in July to 177.5 in August. The cities and towns' index moved from 175.8 to 176.3, recording an increase of 0.3 percent. The rural villages' index realized a rise of 0.3 percent, from 182.1 to 182.7, while the urban villages' index rose by 0.2 percent, from 175.9 to 176.3 between the two months.

Group indices remained stable between July and August, recording changes of less than 1.0 percent.

The *Transport* group index registered an increase of 0.9 percent, from 172.5 in July to 174.1 in August. This was mainly due to a rise in the constituent section index of Purchase of Vehicles, which went up by 3.3 percent.

The *Restaurants & Hotels* group index upped from 227.4 to 228.5, registering an increase of 0.5 percent between July and August. The increase was a result of the constituent section index of Restaurants, Café's and the Like, which rose by 0.5 percent.

The *Food & Non-Alcoholic Beverages* group index moved from 194.9 to 195.0, registering an increase of 0.1 percent between July and August. The rise was attributed to the general increase in the section indices, except Bread & Cereal, Meat, and Sugar, Jam, Honey, Chocolate & Confectionery which remained stable.

*All-Tradable* inflation rate for August remained at 4.1 percent the same rate as in July. The Imported Tradable inflation rate recorded an increase of 0.2 of a percentage point, from 3.2 percent in July to 3.4 percent in August. **Consumer Price Index** (CPI) is an index which measures price changes in goods and services with reference to a base period.

**Inflation** is a measurement of prices movement of goods and services in a particular country.

**Domestic Tradable** refers to the goods and services which a country (Botswana) can export to other countries.

**Trimmed Mean Core Inflation-** attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.
