GLOSSARY

COMMENTARY

Section 1: Headline Inflation

The annual inflation rate in December 2014 was 3.8 percent, a decrease of 0.5 of a percentage point on the November 2014 rate of 4.3 percent. Annual inflation in December 2014 was also lower than the 4.1 percent recorded during the same month in 2013. The downward movement of annual inflation rate between December 2013 and December 2014 was mainly attributed to the decrease in prices of commodities in the main component of Transport which dropped by 2.6 percentage points. The inflation rates for regions between November and December 2014, indicated that Rural Villages' went down to 3.6 from 4.5 percent, Urban Villages' decreased to 3.8 from 4.3 percent and Cities & Towns also went down to 3.8 from 4.3 percent.

The December national Consumer Price Index registered a decrease of 0.3 percent, moving from 178.5 in November to 178.1 in December. The Cities & Towns' and Rural Villages' index also realized a drop of 0.3 percent, from 177.2 to 176.7 and from 184.3 to 183.7 respectively, while the Urban Villages' index dropped from 177.2 to 177.0 between the two months, registering a decrease of 0.2 percent.

Group indices were generally moving at slow pace between November and December 2014, recording changes of less than 1.0 percent, except for the Transport group index which registered a negative change of 2.6 percent.

The Transport index group registered a decrease of 2.6 percent, from 175.2 in November to 170.7 in December 2014. This attributed to a decrease in the constituent section index of Operation of Personal Transport, which went down by 4.2 percent. The decrease in Operation of Personal Transport section index was attributed to the drop in retail pump prices for petrol and diesel by P0.60 per litre each, which effected on the 6th December 2014.

The Housing, Water, Electricity, Gas & Other Fuels index group upped from 159.9 to 161.4, registering an increase of 0.9 percent between November and December 2014. The increase was attributed to the general increase in the section indices, notably; Rent paid by Tenants section index which went up by 2.2 percent.

The Clothing & Footwear index group upped to 166.1 in December 2014 from 165.0 in November, recording an increase of 0.7 percent. The increase was attributed to the general increase in the section indices.

All-Tradable inflation rate was 3.1 percent in December, a decrease of 0.9 of a percentage point on the November 2014 rate of 4.0 percent. The Imported Tradable inflation rate dropped from 3.5 to 2.4 percent in the referenced months. In the same period the Domestic Tradable inflation rate registered a decline of 0.3 percent from 4.6 percent to 4.3 percent. The Non-Tradable inflation rate recorded a rise of 0.1 of a percentage point, from 5.3 percent in November to 5.4 percent in December.

The All-Tradable index moved from 186.2 in November to 185.2 in December, recording a decrease of 0.5 percent. The Imported Tradable index registered a decrease of 0.8 percent, moving from 178.0 to 176.6. The Non-Tradable index advanced from 160.9 to 161.6, while the Domestic Tradable index remained unchanged at 201.7 between the two months.

Section 2: Core Inflation

The Trimmed Mean Core Inflation rate registered a decline of 0.2 of a percentage point, moving from 3.9 percent to 3.7 percent. The Core Inflation rate by exclusion registered a drop of 0.1 of a percentage point, moving from 5.0 percent to 4.9 percent, between November and December 2014.

PRICES COLLECTION COVERAGE FOR BOTSWANA CONSUMER PRICE INDEX (CPI)- 2014

Glossary

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Domestic Tradable refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradable represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradable refers to the goods and services which a country cannot either export or import to other countries.

All -Tradable refers to the total of **Domestic** and **Imported tradable**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
