Prices Collection Coverage for Botswana Consumer Price Index (CPI) - 2013

Glossary

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Domestic Tradable refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradable represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradable refers to the goods and services which a country cannot either export or import to other countries.

All –Tradable refers to the total of **Domestic** and **Imported tradable**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
