### GLOSSARY

## COMMENTARY

### Section 1: Headline Inflation

The annual inflation rate was 4.5 percent in May 2014, the same rate as in April 2014 owing largely to stable prices of commodities. Annual inflation in May 2014 was lower than the 6.1 percent recorded during the same month in 2013. The downward movement of annual inflation rate between May 2013 and May 2014 was attributed to the decline in prices of commodities especially the main components of *Transport and Food & Non-Alcoholic Beverages* which dropped by 7.2 and 2.4 percentage points respectively. The inflation rates for regions between April and May 2014, indicated that urban villages' soared to 4.6 from 4.3 percent, whereas cities & towns' and rural villages' decreased to 4.2 from 4.4 percent and to 5.2 from 5.3 percent respectively.

The May national Consumer Price Index registered an increase of 0.2 percent, advancing from 175.9 in April to 176.3 in May. The urban villages' index moved from 174.5 to 175.2, recording an increase of 0.4 percent. The cities and towns' index realized a rise of 0.2 percent, from 174.7 to 174.9 between the two months, while the rural villages' index moved from 181.2 to 181.5 between April and May 2014, recording also an increase of 0.2 percent.

Group indices were stable between April and May 2014, recording changes of less than 1.0 percent, as detailed below.

The *Alcoholic Beverages, Tobacco & Narcotics* group index recorded an increase of 0.7 percent, from 245.9 in April to 247.5 in May. This was due to the increase in the constituent section indices of Tobacco which rose by 2.4 percent.

The *Clothing and Footwear* group index moved from 159.1 to 160.0, registering an increase of 0.6 percent between April and May. This was attributed to the general increase in the section indices.

The *Food & Non-Alcoholic Beverages* group index upped from 193.8 to 194.3, registering an increase of 0.3 percent between April and May. The increase was attributed to the general rise in the section indices except for *Fish (Fresh, Chilled & Frozen)* and *Food not elsewhere Classified* section indices which went down by 0.3 and 0.1 percent respectively.

*All-Tradable* inflation rate for May was 4.1 percent the same rate as realized in April. The *Imported Tradable* inflation rate recorded an increase of 0.1 of a percentage point, from 3.4 percent in April to 3.5 percent in May. *Non-Tradable* inflation went down by 0.1 of a percentage point in May, registering 5.6 percent against 5.7 percent realized in April, while the *Domestic Tradable* inflation rate remained unchanged at 5.1 percent during the period under review.

The *All-Tradable index* moved from 183.2 in April to 183.8 in May, recording an increase of 0.3 percent. The *Imported Tradable index* also registered an increase of 0.3 percent, moving from 174.2 to 174.8. The *Domestic Tradable index* advanced from 200.6 to 201.2, a rise of 0.3 percent. The *Non-Tradable index* registered an increase of 0.1 percent, moving from 158.7 to 158.9 between the two months.

## Section 2: Core Inflation

The May 2014 Trimmed Mean Core Inflation and Core Inflation rate by exclusion remained unchanged at 4.1 and 5.2 percent respectively, same as in the preceding month of April.

PRICES COLLECTION COVERAGE FOR BOTSWANA CONSUMER PRICE INDEX (CPI)- 2014

## Glossary

**Consumer Price Index (CPI)** is an index which measures price changes in goods and services with reference to a base period.

**Inflation** is a measurement of prices movement of goods and services in a particular country.

**Domestic Tradable** refers to the goods and services which a country (Botswana) can export to other countries.

**Imported Tradable** represents the goods and services which a country (Botswana) imports from other countries (trading partners).

**Non-Tradable** refers to the goods and services which a country cannot either export or import to other countries.

**All –Tradable** refers to the total of **Domestic** and **Imported tradable**.

**Trimmed Mean Core Inflation**- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

**Core inflation by Exclusion** is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
