1. Introduction

This statistical release contains preliminary Gross Domestic Product (GDP) estimates at current and constant prices for the first quarter of 2014. Botswana's national accounts are compiled according to the 1993 System of National Accounts (1993 SNA). The accounts presented in this brief adhere to the General Data Dissemination System (GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence could not be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously submitted data may be observed.

These estimates are not seasonally adjusted hence figures may vary depending on the quarters.

Dabilani Buthali
Deputy Statistician General
July 2014

2. Gross Domestic Product

2.1 Revisions in this release

Slight revisions have been made to GDP estimates published in March 2014. The change was due to the updated source data and has affected the following industries; Electricity, Manufacturing and General Government.

3. First quarter GDP

The estimated GDP at current prices for the first quarter of 2014 was P32 710.3 million compared to a revised level of P31 652.0 million registered in the fourth quarter of 2013, recording an increase of 3.3 percent

The estimated GDP at constant 2006 prices for the first quarter of 2014 was P19 958.4 million compared to P20 145.2 million registered in the fourth quarter of 2013, recording a decrease of 0.9 percent (see table 3).

Real GDP increased by 5.2 percent in the first quarter of 2014 compared to an increase of 4.8 percent accrued in the same quarter of the previous year.

2.2 Key figures

| | Real Gross Domestic Product | | Total Final Consumption | | Gross Fixed Capital Formation | |
|---------------------|-----------------------------|--------------|-------------------------|--------------|-------------------------------|--------------|
| | Percentage Change | | | | | |
| | Quarter-on Quarter | Year-on Year | Quarter-on Quarter | Year-on Year | Quarter-on Quarter | Year-on Year |
| First quarter 2012 | -1.7 | 5.8 | 3.2 | -0.7 | 15.8 | 8.3 |
| Second quarter 2012 | -0.1 | 3.6 | 0.8 | 2.3 | 5.3 | 13.5 |
| Third quarter 2012 | 0.6 | 3.1 | 1.9 | 4.9 | 2.3 | 18.0 |
| Fourth quarter 2012 | 6.0 | 4.8 | 6.5 | 12.9 | -0.1 | 24.8 |
| First quarter 2013 | -1.7 | 4.8 | 1.1 | 10.6 | -8.0 | -1.0 |
| Second quarter 2013 | 2.3 | 7.3 | -3.0 | 6.6 | 1.7 | -4.3 |
| Third quarter 2013 | 0.3 | 6.9 | -2.2 | 2.3 | -5.6 | -11.8 |
| Fourth quarter 2013 | 3.4 | 4.4 | 7.0 | 2.7 | 5.7 | -6.6 |
| First quarter 2014 | -0.9 | 5.2 | 2.2 | 3.8 | 2.3 | 3.9 |

At industry level, most of the increase was attributed to Mining and Trade, Hotels & Restaurants which increased by 10.7 and 7.9 percent respectively. The increase in real value added of the mining sector was due to a 23.6 percent increase in the diamond production. Scheduled plant maintenance at the Orapa mine, which yielded low production, recorded adverse contribution of the mining sector in the first quarter of 2013, whereas in the period under review the contribution was affirmative, because production had normalized. All other sectors, but one, recorded positive growths of more than 2 percent over the period, the exception being the Water and Electricity sector, which recorded a decrease of 103.9 percent (see table 4).

Mining continues to be the largest contributor to GDP; its contribution to GDP stands at 22.8 percent in the first quarter of 2014 followed by Trade, Hotels & Restaurants and General Government at 15.3 percent and 14.5 percent respectively.

There was a slight improvement, even though still negative, in the value added by the Water and Electricity sector after a decrease of 200.6 percent realized in the fourth quarter of 2013. In the quarter under review the sector recorded a decrease of 103.9 percent compared to a decrease of 31.0 percent recorded in the similar quarter in 2013. The decline is largely by the Electricity sector which has been contributing negatively to the economy since first quarter of 2012 due to substantial increases in intermediate consumption/inputs

Figure 1: Real GDP growth rates (over four quarters)

Total final consumption expenditure recorded an increase of 2.2 percent in the first quarter of 2014, whereas in the same quarter of the previous year it increased by 1.1 percent. However, household final consumption increased by 3.1 percent in the first quarter of 2014 while Government final consumption rose by 5.8 percent in the similar quarter last year. Fixed capital formation recorded an increase of 3.9 percent in the quarter under review compared to a decrease of 1.0 percent in the same period in 2013.

Real exports of goods and services went up by 33.7 percent in the quarter under review compared to an increase of 17.7 percent recorded in the same quarter of 2013, while imports of goods and services registered a decrease of 13.0 percent in the first quarter of 2014 compared to a 23.9 percent increase registered in the same quarter of 2013.
