1. Introduction

This statistical release contains preliminary Gross Domestic Product estimates at current and constant prices for the second quarter of 2015. Botswana's national accounts are compiled in accordance with the 1993 System of National Accounts (1993 SNA). The accounts presented in this brief adhere to the General Data Dissemination System (GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted hence the variations may differ depending on the quarters.

Statistics Botswana acknowledges and appreciates the contribution of all stakeholders in the production of this quarterly report.

3. Second quarter GDP

The 2015 second quarter GDP at current prices was P37 205.8 million compared to P36 107.8 million registered in the first quarter of 2014.

The estimated GDP at constant 2006 prices for the second quarter of 2015 was P21 865.3 million against P21 951.6 million registered in the first quarter of 2015, recording a decrease of 0.4 percent (see table 3).

Real Gross Domestic Product (GDP) went up by 2.5 percent in the second quarter of 2015 compared to 3.4 percent realized in the same quarter in 2014.

At industry level, most of the increase was due to Trade, Hotels & Restaurants, Finance & Business services and General Government sectors which increased by 6.9, 5.8 and 5.8 percent respectively. All other industries recorded a positive growth over the period with the exception of the Water & Electricity and Mining sectors which recorded a decrease of 41.1 and 8 percent respectively.

The increase in the real value added of the Trade, Hotels & Restaurants sector was mainly due to the increase realized in vehicle dealers, Hotels & Restaurants and Filling Stations which went up by 10.2, 8.3 and 8.2 respectively.

The increase of 5.8 percent recorded by the Finance and Business Services sector was due to the increase in Banks and Real Estate which registered a growth of 8.5 and 6.7 percent respectively.

The growth rate of 5.8 percent recorded by the General Government was due to the increase in both Central and Local Government, which went up by 5.9 and 5.6 percent respectively.

Mining value added decreased by 8 percent compared to a decline of 3 percent realized in the second quarter of 2014. The negative growth rate of the Mining sector was attributed to a decline in diamond production of 5.7 percent in the quarter under review. Copper/Nickel production decreased by 12.9 percent in the second quarter of 2015 compared 21.3 percent of recorded in the second quarter of 2014. The closure of Discovery Metals Limited (Boseto) copper mine in March 2015 also attributed to the decline in copper/nickel production. Soda Ash recorded a decrease of 55.2 percent. This was mainly because there was no Soda Ash and Salt production in June 2015 due to plant refurbishment.

There was a significant decrease in the value added by the Water and Electricity sector of 41.1 percent realized in the second quarter of the year under review. The decline is largely by the Electricity sector which has been contributing negatively to the economy since first quarter of 2012 due to a substantial increase in intermediate consumption. The Electricity value added went down by 130.8 percent in quarter under review. Electricity imports went up by 32.2 percent while local Electricity generation decreased by 16.3

percent. Imported Electricity is part of intermediate consumption. The value added of Water sector also decreased by 4.1 percent. There is currently water shortage in the country which has led to water rationing.

Figure 1: Real GDP growth rates (over four quarters)

Total final consumption expenditure recorded an increase of 3.3 percent in the second quarter of 2015, whereas in the same quarter of the previous year it increased by 3.8 percent. However, household final consumption increased by 2.4 percent in the second quarter of 2015 while Government final consumption rose by 5.7 percent in the same quarter. Fixed capital formation recorded an increase of 8.2 percent in the quarter under review compared to an increase of 10.2 percent in the same period in 2014. The increase was due to increase on machinery & equipment and construction expenditures by 12.8 and 6 percent respectively.

Real exports of goods and services decreased by 4.3 percent in the second quarter of 2015 compared to an increase of 46 percent recorded in the same quarter of 2014. Imports of goods and services registered an increase of 6.3 percent in the second quarter of 2015 compared to 19.5 percent increase realized in the same quarter of 2014.
