## Preface

Foreign trade statistics play a vital role in many economies, Botswana included. It is an account of all transactions of merchandise between a country and the rest of the world. The account measures the value and quantity of goods which add to or subtract from the stock of material resources of a country, by entering (imports) or leaving (exports) its economic territory. Therefore, trade statistics remains one of the major indicators of the performance of a country's economy and its competitiveness in the world market.

The monthly merchandise trade statistics are used extensively in the compilation of the country's national accounts and the balance of payments. Furthermore, these statistics are also used by government institutions and other stakeholders for trade negotiations and other various purposes.

This International Merchandise Trade Statistics (IMTS) monthly digest presents statistics on Botswana's total imports and exports of goods during June 2020. It shows summaries of total merchandise trade as presented in **Table 1.0**. Trade by principal commodity groups is presented in **Table 2.1** for imports, and **Table 2.2** for exports, while **Table 2.3** gives trade on diamonds only. The direction of trade appears in **Table 3.1A** (imports) and **Table 3.2A** (total exports). The major trading partner countries by commodity groups for June 2020 are presented in **Table 3.1B** for imports and **Table 3.2B** for exports. **Table 4.1A** presents statistics on commodities which were mostly imported during June 2020, and exports are given in **Table 4.1B** for the same month.

Changes in data for the corresponding months when comparing the current digest and the previous ones may be attributed to data from transactions which had deferred customs duty assessments. The data for such transactions would only be available at a later stage after customs duty assessments had been completed. For more information, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana publications are available on the website at [www.statsbots.org.bw](http://www.statsbots.org.bw) and at the Statistics Botswana Information Resource Centre (Head Office, Gaborone)

I sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to serve users of our products and services.

## Executive Summary

This International Merchandise Trade Statistics (IMTS) monthly digest provides trade statistics on Botswana's total imports and exports of goods during June 2020.

Botswana's overall exports amounted to P943.5 million, a decrease of 70.3 percent (P2, 228.5 million) compared to the revised May 2020 value of P3, 172.0 million. On the contrary, imports stood at P7, 251.8 million, displaying an increase of 45.4 percent from the revised May 2020 value of P4, 989.1 million.

During the period under review, Botswana's exports were mostly absorbed by **SACU** with a market share of 41.3 percent, South Africa 38.8 percent of total exports. Belgium and Hong Kong accounted for 23.3 percent and 11.1 percent of the total exports respectively. The most exported commodities from Botswana were Diamonds, Machinery & Electrical Equipment and Salt & Soda Ash at 58.2 percent, 10.7 percent and 8.2 percent, respectively.

South Africa was the major source of Botswana's imports with a contribution of 61.6 percent to the country's total imports. Namibia, Belgium and Russia followed with contributions of 12.0 percent, 6.5 percent and 4.6 percent, respectively. With regard to regional groupings, **SACU** was the major source of imports with a contribution of 73.7 percent. Asia and the EU accounted for 12.1 percent and 7.9 percent respectively. Canada contributed 3.8 percent of imports into Botswana in June. The leading Imports commodity groups were Diamonds; Machinery & Electrical Equipment; Food, Beverages & Tobacco and Chemicals & Rubber Products at 47.3 percent, 10.1 percent, 9.2 percent and 9.1 percent respectively.

Botswana uses mainly road, air and rail as the main modes of transport for international trade. The three (3) modes of transport accounted for 40.4 percent, 38.5 and 21.0 percent of total imports respectively, during the period under review. Air Transport accounted for 69.6 percent whereas Road accounted for 29.2 percent of total exports in June.

## 1.0 Total Trade

Total merchandise trade refers to imports, domestic exports, re-exports and trade balance. Deliberations are based on June 2020, which is also referred to as the reference period, the period under review or the current month throughout the digest.

### 1.1 Data Revision

Statistics for previous monthly digests, contain preliminary figures which are subsequently revised and updated with new information as it becomes available. Revisions are made on a monthly basis, when monthly data files are uploaded into the database with additional information of previous months. In some instances, revisions are negligible while in other cases they are significant.

Transactions for March, April and May had late customs duty assessments which were finalised during June 2020, hence the need to show data revision. **Table A** shows revised data for the affected months, comparing figures as at the May Digest and the current situation.

There has been a major upward revision of total exports and consequently the trade balance for May 2020 as displayed in **Table A**. This is attributable to revised records of exports of Diamonds which rose by P2, 862.8 million, from P274.6 million to P3, 172.0 million. This means that most transactions of Diamonds exports were not assessed and cleared during the associated month even though they were declared

### 1.2 Imports

Imports are valued at **Cost, Insurance & Freight (CIF)**, which includes the cost of the commodity, insurance and freight charges, but excludes customs or any other duties paid on arrival. During June 2020, total imports were valued at P7, 251.8 million, displaying an increase of 45.3 percent (P2, 262.7 million) compared to the revised May 2020 imports figure of P4, 989.1 million. Diamonds worth P3, 426.7 million were imported into the country during the period under consideration. Diamonds imports contributed 49.2 percentage points to the overall increase in total imports in June 2020. The positive contribution made by Diamonds imports was however counteracted by the negative contribution made by the fall in Fuel and Vehicles & Transport Equipment imports, which contributed negatively by 9.3 and 7.2 percentage points respectively, to the overall increase in June 2020. All other commodity groups contributed positively to the overall change in total imports.

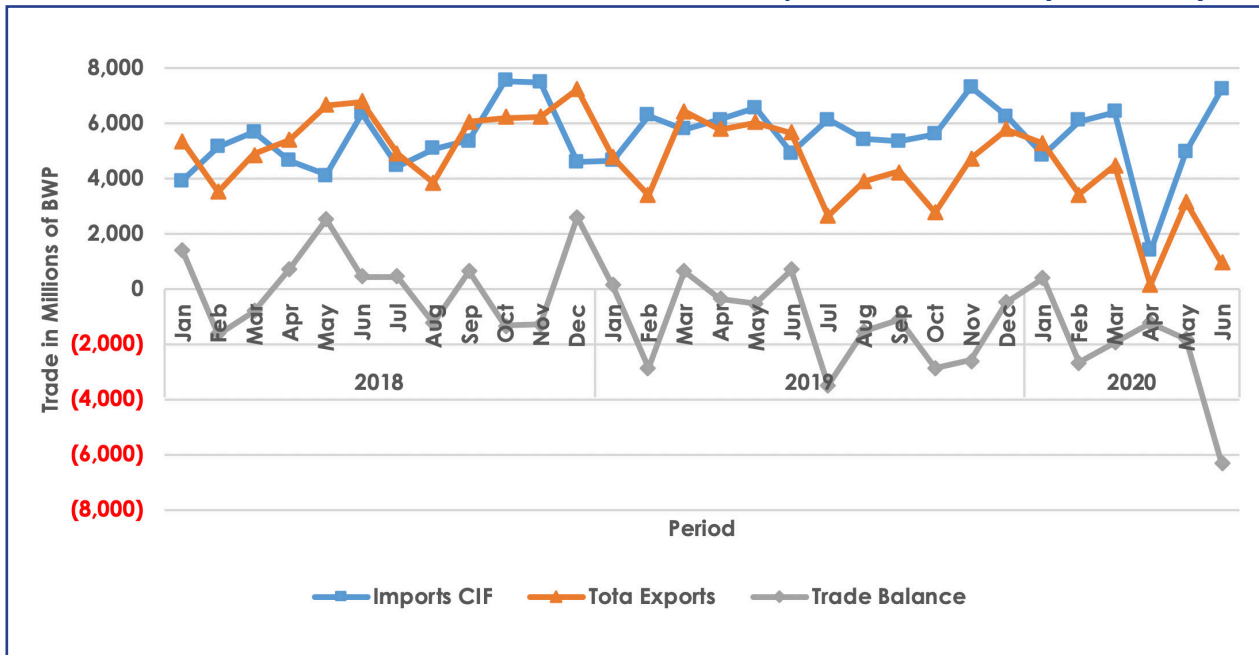

### 1.3 Total Exports

During June 2020, Botswana's export earnings declined by 70.3 percent (P2, 228.5 million) from the revised value of P3, 172.0 million, recorded for May 2020 to P943.5 million. The significant decrease is attributed to the reduction in the exportation of Diamonds during the current period. The decline in Diamonds exports contributed negative 75.1 percentage points to the overall change in total exports.

### 1.4 Trade Balance

A trade deficit of P6, 308.3 million was recorded in June 2020.

## 2.0 Trade By Principal Commodity Groups

Principal commodity group refers to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters or commodities, for example 'Vehicles & Transport Equipment' which combines vehicles and other equipment used for transport purposes.

In cases where it becomes a challenge to come up with further groups of related chapters or commodities, the commodities are grouped together under the general category called 'Other'. This occurs when a commodity group's contribution to the total is minimal.

### 2.1 Principal Imports

In June 2020, Botswana received total imports amounting to P7, 251.8 million. Diamonds contributed the most to total imports at 47.3 percent (P3, 426.7 million), followed by Machinery & Electrical Equipment with 10.1 percent (P731.0 million). Food, Beverages & Tobacco and Chemicals & Rubber Products made contributions of 9.2 percent (P667.9 million) and 9.1 percent (P662.0 million) to the country's total imports, respectively. Contributions made by other commodity groups are illustrated in **Table 2.1** and **Chart 2.1**.

**Chart 2.1: Composition of Principal Imports- June 2020**

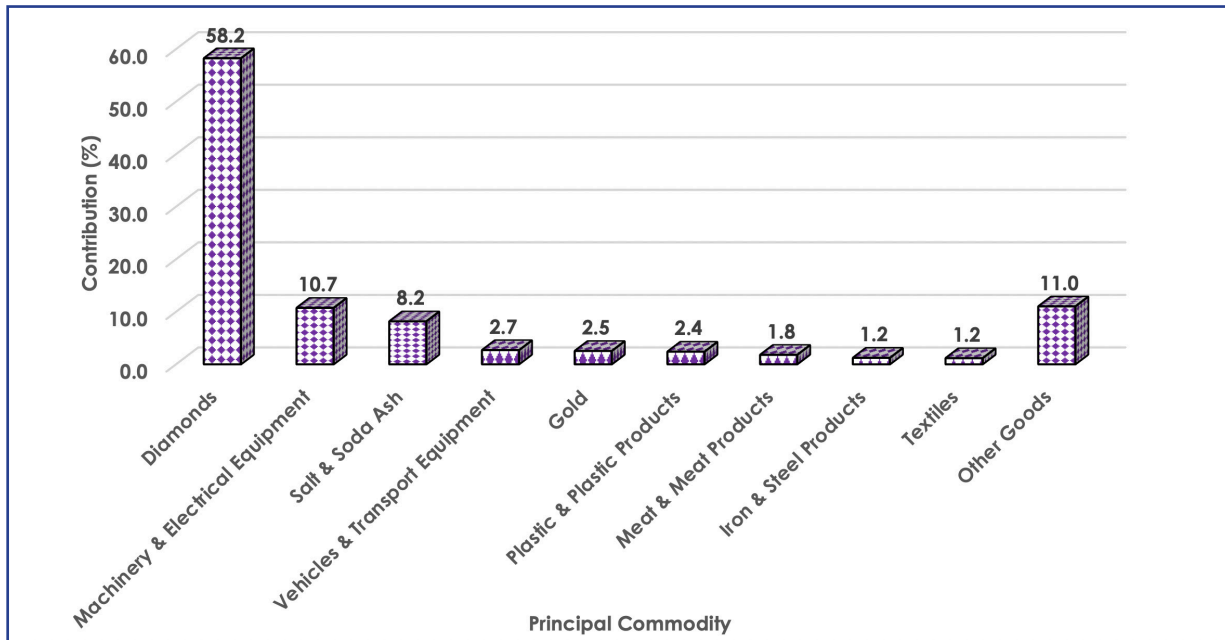

Note: "Other Goods" includes all other goods not specified in Table 2.1

## 2.2 Principal Exports

Botswana's total exports for June 2020 were valued at P 943.5 million, with 58.2 percent (P549.5 million) attributed to Diamonds. Machinery & Electrical Equipment contributed 10.7 percent (P101.3 million), while Salt & Soda Ash made a contribution of 8.2 percent (P77.1 million) to total exports during the period under review. Contributions made by other commodity groups are illustrated in **Table 2.2** and **Chart 2.2**.

**Chart 2.2 Composition of Principal Exports – June 2020**

**Note:** "Other Goods" includes all other goods not specified in Table 2.2

### 3.0 Direction Of Trade

The Direction of Trade analyses the value of merchandise trade between Botswana and her major trading partner countries. Thus direction discusses the last known destination for exports and sources of the country's imports. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data by major trading partner countries, regions and principal commodity groups for imports and exports, during June 2020 appear in **Table 3.1A** and **Table 3.2A**, respectively. **Table 3.1B** (imports) and **Table 3.2B** (exports) show percentage distributions for major sources and destinations by principal commodity groups during the same month.

#### 3.1 Imports by Major Trading Partner Countries and Regions

The SACU region was the dominant source of imports into Botswana with a contribution of 73.8 percent (P5, 342.9 million) of total imports (**Table 3.1**). The top most imported commodity group from the SACU region was Diamonds, with a contribution of 41.9 percent (P2, 239.1 million) of total imports from the region (**Table 3.1A**). Food, Beverages & Tobacco and Chemicals & Rubber Products followed with contributions of 11.9 percent (P628.4 million) and 9.4 percent (P505.4 million) respectively.

In June 2020, imports from South Africa represented 61.6 percent (P4, 470.0 million) of total imports, with Diamonds contributing 33.1 percent (P1,481.1) while Food, Beverages & Tobacco and Chemicals & Rubber Products contributed 13.9 percent (P621.4 million) and 11.3 percent (P505.0 million) of total imports from the country, respectively (refer to **Table 3.1** and **Table 3.1A**).

Imports from Namibia represented 12.0 percent (P872.9 million) of total imports during the month under review, with 86.8 percent (P758.0 million) of total imports from the country attributable to Diamonds, while Fuel accounted for 11.4 percent (P99.4 million).

The Asia block supplied P876.6 million, representing 12.1 percent of total imports into Botswana in June 2020. The major commodity groups imported from the regional block were Diamonds and Machinery & Electrical Equipment, with contributions of 52.9 percent (P464.0 million) and 19.2 percent (P168.1 million), respectively. Vehicles & Transport Equipment imports represented 10.2 percent (P89.8 million) of total imports from the regional block.

The Russian Federation, China and India were the main sources of imports from Asia having contributed 4.6 percent (P334.5 million), 2.4 percent (P176.9 million) and 1.9 percent (P135.0 million) of total imports respectively, during the period under review.

Botswana received imports worth P572.0 million from the EU, accounting for 7.9 percent of total imports in June 2020. The major commodity groups imported were Diamonds and Machinery & Electrical Equipment with contributions of 79.7 percent (P456.0 million) and 10.8 percent (P61.9 million), of imports from the union, respectively.

Canada supplied imports valued at P274.1 million, accounting for 3.8 percent of total imports during the period under review. These imports comprised of mainly unsorted Diamonds at 97.4 percent (P267.1 million) of total imports from the country.

**Chart 3.1: Imports by Major Trading Partner Countries – June 2020**

### 3.2 Exports by Major Trading Partner Countries and Regions

Botswana's major destination for exports was SACU, during the period under review. The union received 41.3 percent (P389.9million) of total exports from Botswana. South Africa received 38.8 percent (P366.1 million) while Namibia got 2.5 percent (P23.7 million) of total exports. The main commodity groups exported to South Africa were Machinery & Electrical Equipment, Diamonds and Salt & Soda Ash at 21.0 percent (P77.0 million), 18.2 percent (P66.7 million) and 15.0 percent (P54.8 million) of total exports to the country, respectively (refer to **Table 3.2B**). The main commodity exported to Namibia was Vehicles & Transport Equipment at 26.1 percent (P6.2 million), followed by Machinery & Electrical Equipment at 24.8 percent (P5.9 million) of total exports to that country during the current month.

Belgium received 23.3 percent (P220.2 million) of total exports in June 2020, almost all (99.9 percent) being attributable to exports of Diamonds. Hong Kong received Diamonds, representing 11.1 percent (P104.8 million) of Botswana's exports during the month under review, of which 98.1 percent (P102.8 million) was attributable to Diamonds. Other destinations for exports can be observed in tables **3.2 A** and **3.2 B**.

Chart 3.2: Exports by Major Trading Partner Countries – June 2020

## 4.0 Imports and Exports by Top imported and Exported Commodities

During this period of the Covid-19 pandemic whereby the economic situation is still uncertain, it is worth presenting the most traded goods with a view to guiding users as to what commodities could be produced in the country for import substitution or possible exportation. The top traded commodities for both flows are presented in **Table 4.1A** for imports and **Table 4.1B** for exports.

## 5.0 Imports and Exports by Mode of Transport

For the purposes of compilation of International Merchandise Trade Statistics, mode of transport refers to the method of transport used for the carriage of goods in and out of the country. The mode of transport that are mainly used in Botswana for international merchandise trade are Air, Road and Rail. **Table B** presents statistics relating to mode of transport while **Chart B** gives the graphical illustration.

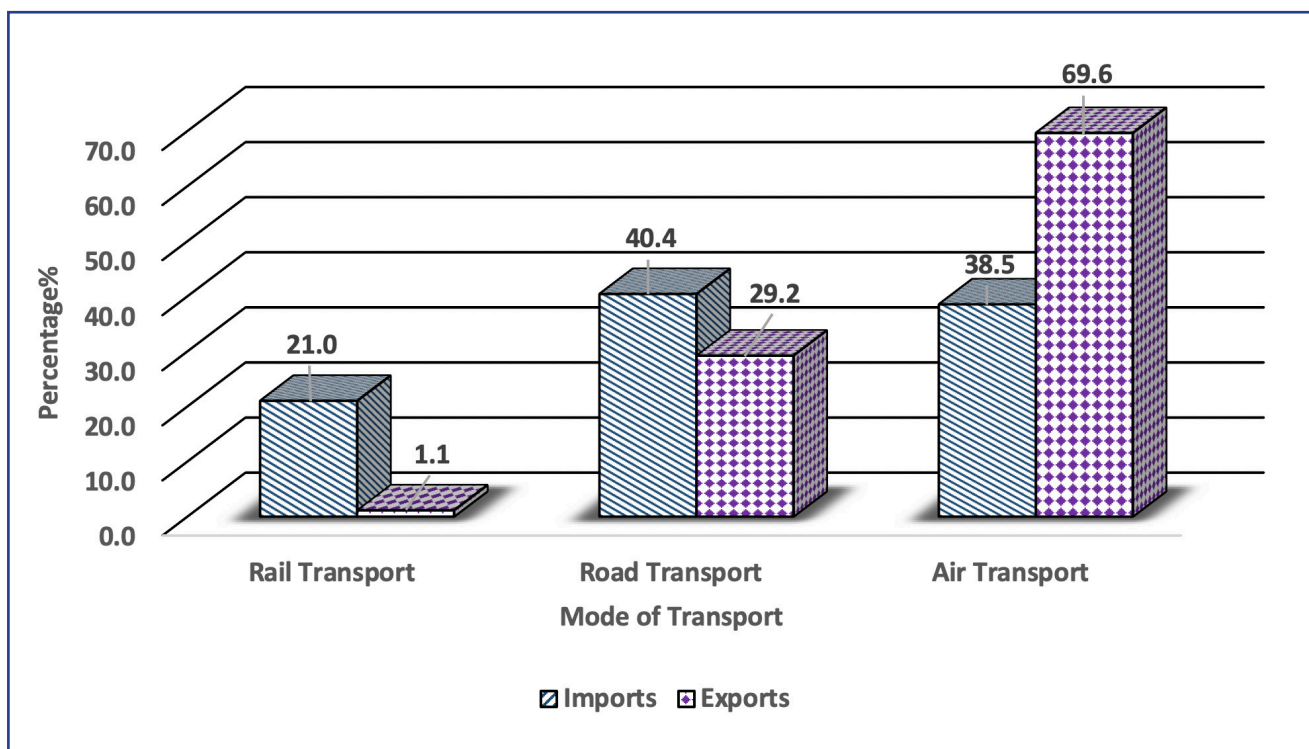

Total imports amounting to P2, 931.1 million, representing 40.4 percent, were transported into the country by Road. Transportation of imports by Air and Rail transport accounted for 38.5 percent (P2, 794.6 million) and 21.0 percent (P1, 524.3 million) respectively, in June 2020.

During the period under review, 69.6 percent (P657.1 million) of total exports were transported by Air while those transported by Road transport accounted for 29.2 percent (P275.7 million).

## 7.0 Concepts, Sources and Methods

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana, and uses the General Trade system. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerised and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Imports are valued CIF (cost, insurance & freight), while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 7.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 7.2 Concepts and Definitions

- i. **Domestic Exports:** These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.
- ii. **Re - Exports:** These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.
- iii. **Total exports:** This is the sum of domestic exports and re-exports
- iv. **Imports:** These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.
- v. **Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 7.3 Exclusions from IMTS

- i. **Goods in Transit** - This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.
- ii. **Goods temporarily admitted or dispatched** - These are goods that, at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working, etc.
- iii. **Monetary Gold**- This is gold to which the monetary authorities have title and is held as reserve assets.
- iv. **Issued banknotes and securities and coins in circulation**-These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is, however, not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
