STATISTICS BOTSWANA

WORK PERMITS HOLDERS – THIRD QUARTER 2017

WORK PERMITS HOLDERS – THIRD QUARTER 2017

This stats brief presents a summary of the characteristics of expatriates who held valid work permits as at the end of September 2017.

The brief is produced through a collaborative process with the Department of Labour and Social Security who issue work permits. Copies of the approved work permits are forwarded to Statistics Botswana for capture and analysis.

Information on work permit holders gives an indication of the occupations which are mostly occupied by foreigners for purpose of monitoring progress in localization. Presentation of statistics on work permit holders by occupation and industry gives an indication of jobs currently held by non-citizens which informs on the skills and sectors where expatriate recruitment continues to be needed. This provides useful information for researchers, planners and policy makers in the country.

This brief shows that the number of work permit holders has decreased by 2.4 percent between June 2017 and September 2017, from 5,755 to 5,242. Most permit holders were recorded in the agricultural sector at 29.3 percent followed by the construction sector with 14.6 percent. The largest group of work permit holders was issued to the age group 40 – 44 with 19.2 percent followed by ages 35- 39 and 30-34 at 18.6 and 16.8 percent respectively.

I hope you find this brief informative for planning and decision making.

1.0 INTRODUCTION

Work permits represent an authorization issued by the Department of Labour and Social Security allowing nationals of other countries to work legally in the country. Data on work permits are collected by reasons for issuing such permits. The main reasons for issuing such permits are employment, education, family, and other reasons. The analysis of permit in this brief is confined only to work permits, drawn from National administrative registers and databases.

The Department of Labour and Social Security issue work-permits, and copies of approved work-permit applications are forwarded to Statistics Botswana to be analysed. Although all work permit forms received by Statistics Botswana for a specific quarter are processed and entered into the data base, others arrive after the publication of the stats brief, and are captured for analysis for the subsequent publication.

The profile of work permit holders at country level reflects the specific skills which may be in short supply among the nationals. In addition, it may show the prevailing economic and employment opportunities which attract foreigners into the country.

Three graphical presentations are given; Figure 1 presents work permit holders by Nationality, with Figures 2 & 3 depicting work permit holders by industry and occupation respectively. More detailed information is presented in the table.
