Preface

This report presents results from the 2009/10 Botswana Core Welfare Indicators Survey (BCWIS), which was conducted from April 2009 to March 2010. The survey improves on Household Income and Expenditure Surveys (HIES), which initially were conducted to measure income poverty. BCWIS expanded coverage of topics to include other measures of human wellbeing.

The broad objective of the survey was to collect monthly data from randomly selected households to provide information that could be used to better understand poverty situation in Botswana, taking into account all its dimensions.

Fundamental to determining poverty is information on household consumption, which provides the basis for measuring poverty to identify the poor and also enable their profiling. To also ensure that the household consumption was adequately recorded, the households were visited for a period of one (1) full month to capture their consumption data.

The report first presents a brief executive summary of major results, followed by Chapter 1, which gives an introduction about the survey. Chapter 2 presents Household Socio-Economic characteristics, with Chapter 3 presenting Poverty Incidence and Profiles; and Chapter 4 discusses Household Incomes and Expenditures.

The body of the report contains tables used in discussing the results, and they are numbered with ".T" to differentiate them from the tables carried in the appendix.

Because of the expanded coverage of human wellbeing indicators, data processing and cleaning of the survey data has taken longer than was initially anticipated. An overall detailed report on some of the new topics covered by the survey will be released in second volume report.

Executive Summary

The BCWIS was conducted from April 2009 to March 2010. The objective of the survey was to improve on the previous HIES with a view to providing a complete and integrated data set that would form a basis for establishing a poverty profile for Botswana. The survey carried modules on Household Consumption and Expenditure; Education, Health, Access to amenities, Employment, Community activities and other information on Schools and Health facilities.

The survey revealed a further decrease in the average age of heads of household, which was estimated at 45.2 years, compared with 45.3 years in 2002/03. This was further accompanied by a drop in the average household size from 4.1 persons in 2002/03 to 3.5 persons in 2009/10.

The results showed a decrease in home ownership, with 50.4 percent of households living in self-built housing units compared to 55.8 percent which was realised in 2002/03. Use of electricity increased, with 46.0 percent of households using electricity for lighting in 2009/10, compared with 27.0 percent in 2002/03.

The results showed an improvement in households' access to piped water at 88.9 percent in 2009/10 as compared to 86.9 percent in 2002/03.

National unemployment rate was estimated at 17.9 percent. Unemployment rate for females was 21.4 percent compared with 14.6 percent for males. Unemployment rate was highest for age groups 15-19 and 20-24, which recorded rates of 41.4 and 34.0 percent, respectively.

Poverty incidence showed an improvement between 2002/03 and 2009/10, with the population below the poverty datum line estimated at 19.3 percent in 2009/10 compared with 30.6 percent observed in 2002/03. Across strata, the percentage of female headed households, below the PDL, were higher than that of male headed households, in urban villages and rural areas. The decline in poverty levels was accompanied by a reduction in consumption inequality, which went down from 0.571 in 2002/03 to 0.495 in 2009/10. This was in contrast to increases in income inequality, which increased over the period from 0.573 in 2002/03 to 0.645 in 2009/10.

The majority of poor households, 39.7 percent, indicated their main source of income as Wages from Employment, followed by Pensions and Remittances at 14.3 and 13.4 percent respectively.

The improvement in household economy was further demonstrated by the shift in consumption patterns, with households' food consumption shares dropping in favour of high value goods/services like transport and other luxury commodities, suggesting an overall improvement in household incomes.

Cash Earnings were the main contributors to average household income across strata, accounting for over 50.0 percent of average monthly gross household income. The urban villages' cash incomes contributed 75.4 percent towards gross income in 2009/10 compared with 65.0 percent in 2002/03, while in rural areas the increase was from 43.9 to 54.4 percent.

Chapter 1: Introduction

1.1 Overview

The Botswana Core Welfare Indicators Survey (BCWIS) conducted during 2009/10, from April 2009 to March 2010, was designed as an improvement to the Household Income and Expenditure Surveys (HIES). HIES were conducted every 10 years; in 1985/86, 1993/94 and 2002/03, to provide data on household incomes and expenditures, and computation of Poverty Datum Lines (PDL). Unlike HIES, BCWIS will be conducted every five (5) years. Shorter versions of the survey for key indicators will be conducted in between the main BCWIS surveys to assist with monitoring and evaluation of the programmes targeted to improve on the welfare of Botswana citizens.

BCWIS 2009/10 covered additional welfare measures to enable comprehensive understanding of the households' wellbeing. These indicators included, among others, Health Status, Nutrition, Food Security, Participation/Exclusion, Personal Security, Access to and Satisfaction with services provided. Furthermore, it included households' Self-Assessment Poverty, Community, Health Centre and School Modules.

The indicators derived from BCWIS will form baseline data to allow for improved continuous welfare measurement at shorter intervals, rather than ten years taken to produce HIES indicators.

1.2 Objectives of the Survey

The BCWIS provides a complete and integrated data set that will provide a basis for establishing a poverty profile for the country. Household consumption and expenditure information was collected to determine the welfare measures based on consumption and income levels.

The survey serves a broad set of applications on policy issues including:

- Household consumption and expenditure patterns
- Income sources and employment
- Asset ownership
- Agriculture
- Health and Nutritional status, and
- Education

Being an integrated survey, these policy issues can be examined either in isolation or in combination.

1.3 Target Population

The target population covered all members of the household and visitors who spent the previous night at a sampled household, and would be staying with the household for a period of not less than 14 days. Non-citizen tourists may, of course, be in the country as visitors to sampled household. In such cases, they were treated as visitors, their information was recorded and the relevant questions were asked about them only at household level.

1.4 Scope and Coverage

The 2009/10 Botswana Core Welfare Indicators Survey (BCWIS) design called for a representative probability sample to produce estimates at national, district and/or sub district levels.

Only private dwellings were within the scope of the survey. Institutional dwellings (prisons, hospitals, army barracks, hotels, camps etc.) and households in completely industrial area were not within the scope of the survey. The non-citizen tourists who were in Botswana on holiday and not working in Botswana were not included in the survey.

BCWIS was a nation-wide study using administrative district and/or sub-district boundaries.

1.5 Sampling Frame

The Sampling frame was defined and constituted by all Enumeration Areas (EAs) found in three geographical regions viz. (i) Cities & Towns (ii) Urban Villages , and (iii) Rural Areas as defined by the 2001 Population and Housing Census(PHC). There were 4,165 EAs demarcated for the 2001PHC. After excluding commercial farms, camps, army barracks, prisons, and other institutions, 4,114 EAs formed the basis for the BCWIS sampling frame.

1.6 Publicity

The public was made aware about the survey through broadcast (radio) and print media. Publicity was done throughout the survey to improve survey response rate. The field staff also carried publicity material with them during the course of the survey.

1.7 Sample Design

Two stage stratified probability sample design was used for BCWIS. The first stage was the selection of primary sampling units (PSUs), which were EAs. The second stage was the selection of occupied households within the selected EAs. A list of identified occupied households formed the basis of secondary sampling units (SSUs). Thus the number of occupied households in the selected EA served as a sampling frame for that EA.

1.8 Data Processing

Data processing was outsourced to RPC Data Ltd. Data processing activities entailed design of data capturing system, supervision of data entry, consolidation of data sets and production of key tables upon completion of data cleaning.

1.9 Analysis

Assistance in BCWIS analysis and analytical capacity building was received from the World Bank through the United Nations Development Programme (UNDP) Botswana office. The assistance largely focused on capacity building for poverty analysis.

¹ **Enumeration Area [EA]** : An Enumeration Area (EA) is the smallest geographic unit, which represented an average work-load for an enumerator over a specified period

² **Urban Villages:** These are villages each with a 2001 Census population of 5,000 or more and at least 75 percent of its workforce engaged in non-subsistence agricultural economic activities. There are 27 urban villages distributed over the districts.

1.10 Sources of Funding

The BCWIS was funded by the Government of Botswana in partnership with UNDP. The survey cost P41 Million, with transport costs accounting for 44.0 percent of the budget, personnel emoluments and data processing each accounting for 30.0 and 3.0 percent respectively.

Chapter 2: Population and Household Social-Economic Characteristics

2.1 Introduction

This chapter highlights the salient socio-economic profiles of the households and the population at national and strata levels. The statistics and indicators covered include numbers and characteristics of households and persons, housing units, education and training status of the population, marital status and economic activity status of the population.

2.2 Households Characteristics and Possessions

2.2.1 Number of Households and Total Persons

The BCWIS estimated the total number of households at 521,327, housing a total of 1,803,398 persons. This represented a 32.0 and 10.0 percent growth, respectively for the number of households and persons when compared to the 2002/03 HIES which had 394,272 households and 1,632,922 persons. The results indicated a slight increase in the proportion of male headed households at the national level from 53.6 to 54.3 percent. The results also showed an increase in the proportion of male headed households in urban villages, which was estimated at 49.9 percent, compared to 47.7 percent as estimated by the 2002/03 HIES. Table 1.T gives a summary of households and population by strata.

Table 1.T : Number of Households and Population Estimated during the BCWIS

Total Pop	100	100	100	100	100	100	100	100
* Refers to Male/Female Headed Households				** Refers to Male/Female Population				

2.3 Population Age Distribution

The survey results indicated that the population of the country was dominated by the youth, aged 34 years and below, which accounted for 70.6 percent of the population. This scenario was observed for cities/towns and urban villages, which accounted for 73.0 and 71.9 percent respectively, of the most dominant group. In rural areas, 68.3 percent of the population was aged 34 years and below.

At the national level, age groups 0-4, 5-9 and 10 – 14 were the highest contributors to the total population at 11.8, 11.0 and 11.0 percent, respectively. In cities and towns, age groups 20-24, 25-29 and 30-34 accounted for 12.6, 13.3 and 11.5 percent respectively, towards the total population, whilst in urban villages and rural areas, the highest contributors to the population were similar to those at national level. Figures 1 through 4 depict the age distribution of the population at national level and stratum level.

Overall, 43.2 percent of the population lived in rural areas, whilst 36.3 and 20.5 percent of the population was found in urban villages and cities/towns respectively. Figure 5 shows comparison of age distribution by strata as a percentage of the total population. The rural areas contribution to the total population was highest for age groups 0-4 through 10-14 and 45-49 years and above. This is depicted in Figure 5.

2.4 Heads of Households and Household Size

The average age of head of household was observed to be 45 years, the same as observed during the 2002/03 HIES. The results indicated an increase in the proportion of households headed by males in the age groups of 20-29 and 30 – 39 years when compared to the findings of the 2002/03 HIES.

The results showed a fall in the average household size. Comparing the HIES and BCWIS, the average household size decreased from 4.1 to 3.5 persons between 2002/03 and 2009/10. Table 2.T and Figure 6; present the distribution of households by sex and age group of household head.

Table 2.T: Summary Distribution of Households Heads by Age Group of Household Head and Sex

	2002/03			2009/10		
	Male	Female	Both Sexes	Male	Female	Both Sexes
Households	211,403	182,869	394,272	283,004	238,324	521,328
Age Groups	Percentage of Households Heads					
12 - 19	1.7	1.6	1.6	1.2	1.1	1.2
20 - 29	18.9	16.8	18	20.7	16.6	18.8
30 - 39	24	23.8	23.9	26.5	22.6	24.7
40 - 49	20.8	21	20.9	18.2	20.6	19.3
50 - 59	14.7	13.7	14.2	15.2	16.4	15.8
60 - 69	9.6	10.1	9.8	9.6	9.3	9.5
70 +	10.2	13	11.5	8.5	13.5	10.8
Total	100	100	100	100	100	100
Median	40	41	40	40	44	42
Mean	44.7	46	45.3	43.8	46.7	45.2
Average House-hold Size	3.94	4.38	4.1	3.17	3.8	3.46

Figure 6 shows that for younger age groups of 20-29 and 30-39, there were more male headed households compared with female headed households; the opposite was realized from older age groups of 40-49 years and above.

2.5 Marital Status

Table 3.T and Figure 7 present marital status of heads of households by sex at national level. The 2009/10 BCWIS results showed that at national level, the percentage of “never married” heads of households stood at 37.2 percent, up from 26.9 percent that was observed in 2002/03. The percentage of heads of households which were married and living together with partners both showed decreases, from 36.5 (married) and 30.6 percent (living together) in 2002/03, to 26.9 and 20.4 percent in 2009/10. The BCWIS revealed that, of the 54.3 percent of male heads of household, 21.6 and 15.9 percent were “married” and “never married”, respectively in 2009/10, compared to 15.0 and 1.6 percent of the 53.6 percent of male heads of households in 2002/03.

Table 3.T: Marital Status of Heads of Households by Sex

Marital Status	2002/03			2009/10		
	Male	Female	Both Sexes	Male	Female	Both Sexes
<i>Married</i>	15.0	21.6	36.5	21.6	5.4	26.9
<i>Living together</i>	23.6	7.0	30.6	13.8	6.6	20.4
<i>Separated</i>	12.4	5.5	17.9	0.5	0.8	1.3
<i>Divorced</i>	0.4	0.5	0.9	0.7	1.6	2.2
<i>Widowed/Widower</i>	0.7	1.1	1.7	1.8	10.1	11.9
<i>Never married</i>	1.6	10.7	12.4	15.9	21.3	37.2
Total	53.6	46.4	100.0	54.3	45.7	100.0

Figure 7 presents marital status of heads of households by strata. The results showed that the proportion of “never married” heads of households was highest in cities/towns (43.4 percent), whilst in urban villages and rural areas, the proportion of “never married” heads of households were 35.9 and 34.5 percent, respectively.

2.6 Housing Units, Utilities and Services

2.6.1 Housing Units

The results of the BCWIS showed that at the national level, 50.4 percent of households lived in self-built housing units, while 23.8 percent occupied rented housing units owned by individuals. This represented a decrease of 5.4 percentage points in households that occupy self-built housing units, which stood at 55.8 percent in 2002/03, and an increase of 4.1 percentage points of households living in rented housing units owned by individuals. In cities/towns, 52.4 percent of households lived in rented housing units owned by individuals. In rural areas, 69.0 percent of households occupied self-built housing units, whilst in urban villages 54.1 percent occupied self-built housing units, compared to only 14.9 percent observed in cities/towns. Table 4.T presents summary of the mode of acquisition of housing units occupied by households for periods 2002/03 and 2009/10.

Table 4.T: Mode of Acquisition of housing Unit by Strata 2002/03 and 2009/10- Percentage								
Mode of Acquisition	Cities/ Towns	Urban Villages	Rural Areas	National	Cities/ Towns	Urban Villages	Rural Areas	National
	2002/03				2009/10			
	Percentage of Households				Percentage of Households			
Purchased	3.9	0.6	0.2	1.3	5.8	2.8	2.2	3.3
Rent: BHC	8.5	1.2	0.0	2.7	4.3	1.2	-	1.5
Rent: Government	4.5	6.8	1.8	3.9	5.0	5.3	2.1	3.9
Rent: Council	2.3	2.8	1.6	2.2	1.5	1.5	1.9	1.7
Rent: Individual	45.4	18.6	3.3	19.7	52.4	23.9	6.4	23.8

Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

2.6.2 Sources of Water Supply

The BCWIS results showed that 88.9 percent of households had access to piped water at national level. This was an improvement from the findings of the 1993/94 and 2002/03 HIES, which had indicated 83.3 and 86.9 percent of households as having access to piped water, respectively. For rural areas, 44.2 percent of households had piped water as their source of water (either indoors or outdoors). Additionally, 30.6 percent had access to communal taps within their localities. This was an improvement compared with the findings from HIES 2002/03 that revealed 67.9 percent of rural households having access to communal taps within their localities, and implications of this are that fewer households used communal taps in 2009/10, which means more households had piped water in their compounds. Table 5.T provides detailed proportions on sources of water for households.

Table 5.T: Proportion of Households by Source of Water by Strata - 1993/94, 2002/03 and 2009/10

	1993/94	2002/03			2009/10				1993/94	2002/03	2009/10

Total	100	100	100	100	100	100	100	100	100			

2.6.3 Sources of Fuel

The survey sought to establish principal sources of fuel for households across the strata. Table 6.T presents trends on fuels used by households for lighting and cooking. At the national level, results showed that the principal source of lighting for households has increasingly become electricity, which was used by 13.0, 27.0 and 46.0 percent respectively for the years 1993/94, 2002/03 and 2009/10. This was accompanied by a decline in use of paraffin over the period, which was used by 71.0 percent of households in 1993/94 and 32.0 percent of households in 2009/10.

The results showed that the principal fuel used by households for cooking in 2009/10 was Gas (Liquid Petroleum Gas), used by 43.0 percent of households, followed by Wood, which was used by 42.0 percent of households. Since 1993/94 to the current 2009/10 survey, gas has gradually become the principal fuel for cooking, as opposed to wood, whose use has steadily declined (Table 6.T).

Figure 8 depicts a summary of households' principal source of fuel for cooking by strata in 2009/10. The results showed that wood is the principal fuel for cooking in rural areas, with gas being principally used in cities/towns and urban villages

Table 6.T: Household Principal Fuel for Lighting & Cooking -1993/94, 2002/03 & 2009/10

Fuel Type	Lighting			Cooking		
	1993/94	2002/03	2009/10	1993/94	2002/03	2009/10
	<i>Percentage of Households</i>			<i>Percentage of Households</i>

Gas (LPG)	1	0	0	29	44	43
All	100	100	100	100	100	100

2.7 Ownership of Information Communication Technology Items

Table 7.T presents a summary of household ownership of Information Communication Technology (ICT) items. The results showed that for all the items, ownership increases with urbanization. BCWIS 2009/10 showed that of all the ICT items, mobile phones were the most owned by households, with 80.4 percent of households having at least one member owning a cellular phone at the national level. Radio and Television were second and third respectively at 55.9 and 47.2 percent. Ownership of cellular phone is highest in cities/towns, with 93.2 percent of households having indicated ownership.

Table 7.T: Household Ownership of Information, Communication & Technology (ICT) Items by Strata

ICT Items	Strata							
	Cities & Towns		Urban Villages		Rural Areas		National	
	Households	% of total households	Households	% of total households	Households	% of total households	Households	% of total households
Radio/cassette/CD player	84,631	63.9	103,816	60.8	103,208	47.3	291,655	55.9
Video Cassette Recorder	29,259	22.1	30,297	17.8	14,395	6.6	73,951	14.2

Total Number of Households	132,362		170,632		218,333		521,327	

2.8 Education and Training

2.8.1 Education

The module on education was administered for persons aged two years and above. This sought to investigate issues relating to school enrollment, literacy and other education related issues. Table 8.T gives summary percentage of school attendance by age groups for population aged two (2) years and above. Overall, 79.0 percent of the population had attended school at the time the survey was conducted. The percentage of "attended school" decreased with age, from age group 10-14 upwards. For the 10-14 year olds, the percentage that attended school was 99.0 percent. Overall, 53.0 percent of the population aged two (2) years and above who attended school were female, and 51.0 percent of those that did not attend were female. From ages 20-24 years onwards, the percentage that had attended school was higher for females than males. For non-attendance, the percentage of males was highest for age groups 5-9 through 34-39 years. This is summarized in Table 9.T.

Table 8.T: Summary Percentage of School

Age Group	Attendance by Age Group	
	Attended	Never Attended
2-Apr	10	90
5-Sep	76	24
Oct-14	99	1
15-19	98	2
20-24	97	3
25-29	95	5
30-34	95	5
35-39	91	9
40-44	86	14
45-49	75	25
50-54	63	37
55-59	62	38
60-64	56	44
65 +	38	62
All	79	21

Table 9.T: Percentage Distribution of Population Aged 2 Years and Over by Sex & school Attendance

Age Group	Attended		Never Attended	
	Male	Female	Male	Female
2 - 4	49	51	49	51
5 - 9	49	51	54	46
10 - 14	51	49	71	29
15 - 19	50	50	64	36
20 - 24	47	53	67	33
25 - 29	48	52	48	52
30 - 34	46	54	63	37
35 - 39	48	52	60	40
40 - 44	41	59	50	50
45 - 49	42	58	44	56
50 - 54	39	61	45	55
55 - 59	45	55	54	46

2.8.2 English/Setswana Reading and Numeracy Rates

The BCWIS 2009/10 administered a module to estimate literacy rates through reading and simple calculation for population aged 10 years and above. The literate population in this instance would be estimated as the number of all those who could read and calculate without errors or difficulty, together with those who could read and calculate with errors or difficulty. The reading was tested for English or in Setswana depending on the respondent's understanding and choice.

Table 10.T: English/Setswana Reading for Population Aged 10 Years and over by Sex and Strata

Strata	Reading Ability Rates (percentage)		
	Male	Female	National
Cities & Towns	96.1	96.5	96.3
Urban Villages	90	89.3	90
Rural Areas	75	76.3	75.6
National	85.1	86.5	85.3

The results revealed male and female reading ability rates of 85.1 and 86.5 percent respectively, with the reading ability rate for females higher than that of males by 1.4 percentage points. Across strata, reading ability rates for females were higher than those of males in rural areas and cities and towns. Overall, the results showed higher reading ability rates for urban areas compared to rural areas. The results are summarized in Table 9.T.

Results on numeracy rates (Table 11.T) revealed a similar pattern to reading ability rates. Across strata, numeracy rates were higher for urban areas compared to rural areas, with 95.4 percent for cities and towns, 89.9 percent in urban villages and 75.5 percent in rural areas.

Reading ability rates by age group revealed a decreasing trend with age, with the highest rate of 96.9 and percent reading ability rate recorded for age group 10-14 years, and 13.9 percent recorded for persons aged 90 years and above. Numeracy rates though generally decreasing with age showed that for younger ages (10-19 years), the population aged 15-19 years had a higher rate of 96.0 percent compared to those aged 10-14 years at 94.7 percent. Table 8 in appendix1 presents reading ability and numeracy rates by age group.

Figure 9 presents reading ability and numeracy rates by age group.

Table 11.T: Numeracy Rates for Population Aged 10 Years and over by Sex and Strata

Strata	Numeracy Rates (Percentage)		
	Male	Female	National
Cities & Towns	95.1	95.3	95.4
Urban Villages	89.5	89.7	89.9
Rural Areas	74.2	75.4	75.5
National	84.7	85.4	84.5

Reading ability and numeracy rates by district are graphically in Figure 10. The results showed that generally the reading ability and numeracy rates were highest for cities and towns and lowest for districts furthest from the railway line. Exceptions were Chobe, and Ngamiland East, which showed high rates.

The results for reading and numeracy rate were combined to estimate literacy rates as presented in Table 12.T. Literacy rate was estimated at 84.9 percent at the national level. This was lower than the estimate for females, which stood at 86.0 percent. The males' literacy rate was 84.9 percent at national level. Overall, literacy rates were slightly higher for females compared to males in the cities and towns and rural areas.

Table 12.T: Literacy Rates for Population Aged 10 Years & above by Sex & Strata

Strata	Literacy Rates Estimates (Percentage)		
	Male	Female	National
Cities & Towns	95.6	95.9	95.9
Urban Villages	89.8	89.5	90
Rural Areas	74.6	75.9	75.6
National	84.9	86	84.9

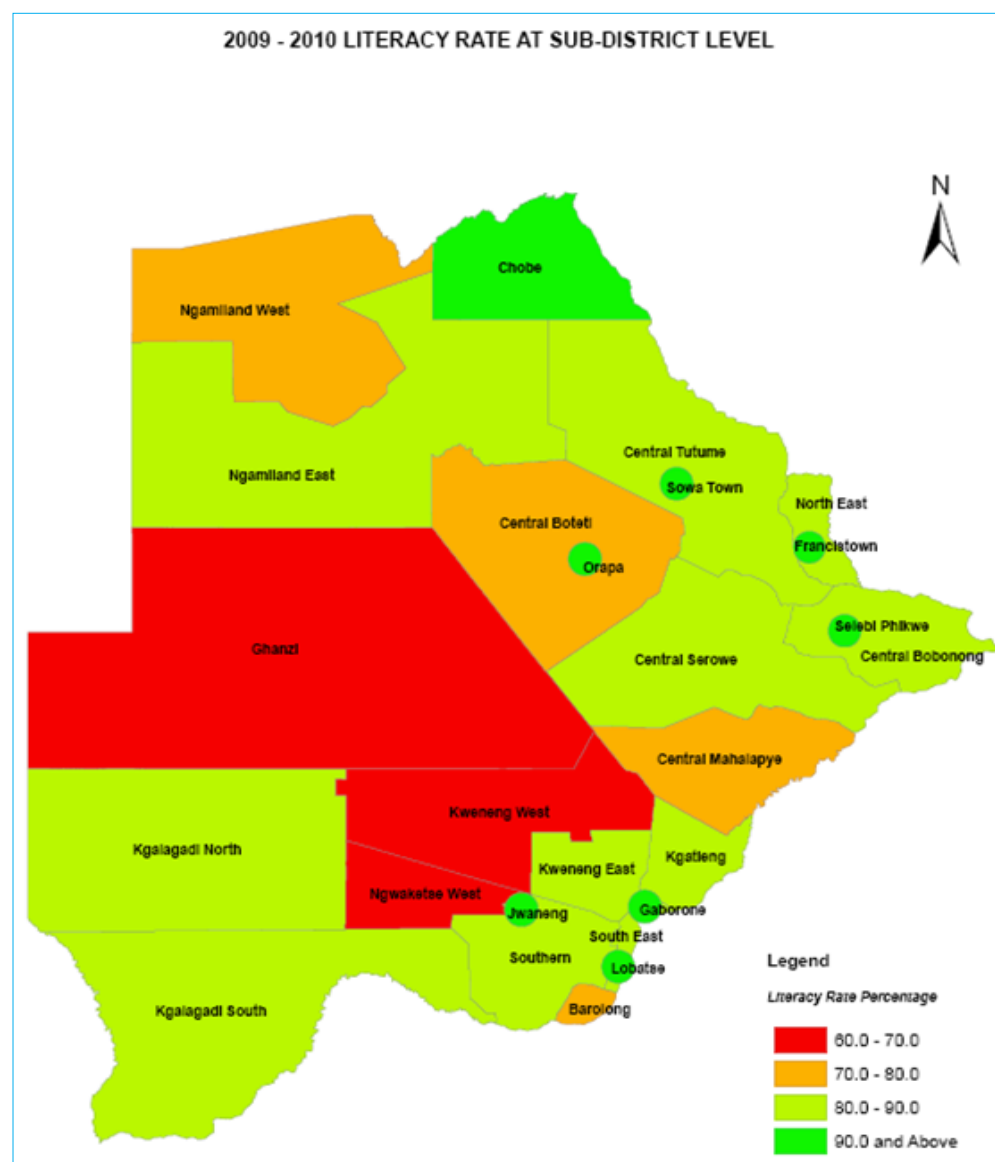

2.8.3 Trends in Literacy Rates

The 2003 Literacy Survey estimated literacy rate at 81.2 percent. This was in reference to the population aged 15 years and above. The BCWIS 2009/10 estimate for literacy rate was 83.2 percent, an improvement of two (2) percentage points. Trends in literacy rates are presented in Table 13.T.

Table 13.T : Trends in Literacy Rates; 1981, 1991, 1993, 2001, 2003 and 2010

	10- 70 years			12-70 years			15-65+ years		
Year	Male	Female	Total	Male	Female	Total	Male	Female	Total
1981	32	36	34
1991	66.8	67.7	67.3
1993	66.9	70.3	68.9
2001	64.98	69.82	67.5	69.9	73.6	71.8
2003	75.3	77.9	76.6	79.6	81.8	80.9	80.4	81.8	81.2
2010	85.1	86.5	85.3	87.4	89.2	88.4	82.3	83.8	83.2

The Map below presents literacy rates by sub district.

2.8.4 Training

Table 14.T presents a summary of training status for population aged 15 years and above by sex. Among males, 46.0 percent of the population aged 20-24 indicated that they were still undergoing training, compared with 42.0 percent of females in the same age group. The survey has further shown that, of the population that discontinued with training, or those that could not complete training, the majority were among age groups 20-24 through 30-34 years for males, whilst for females they were predominantly among the age groups 20-24 up to 35-39.

Table 14.T: Percentage of Population Aged 15 years and Above by Sex & Training

Age Group	No training		Still training		Completed training		Discontinued training	
	Male	Female	Male	Female	Male	Female	Male	Female
15 - 19	18	15	8	9	0	0	3	2
20 - 24	13	12	46	42	8	9	18	22
25 - 29	12	11	23	19	21	22	27	24
30 - 34	9	9	8	11	20	19	26	18
35 - 39	7	7	5	4	16	16	5	13
40 - 44	5	6	1	3	11	12	3	5
45 - 49	5	6	2	3	8	9	5	6
50 - 54	4	6	1	1	7	7	5	2
55 - 59	4	4	1	1	4	3	3	1
60 - 64	3	3	0	0	2	1	3	6
65 +	8	10	1	2	3	2	1	2
All	100	100	100	100	100	100	100	100

BCWIS observed that of the total population exposed to some training, 18.0 percent had obtained “other certificate”, with 17.0 percent having obtained university degree. In comparison to the 2002/03 HIES, there has been a significant increase in the population that obtained university degree. Figure 10 depicts the attainment of training at national level for the different levels.

2.9 Economically Active Persons

Economically active persons refer to those who are employed and those who are actively seeking work. These are persons referred to as the labour force. Therefore, labour force comprises of individuals who are employed and unemployed. The unemployed refers to those actively seeking work.

The 1971 population and housing census collected data from economically active persons aged ten (10) years and over to capture children working in the subsistence sector. The 1981 and latest censuses collected data from persons aged 12 years to identify and monitor child labour activities (if any) in the Country.

The International Labour Organisation (ILO) convention no. 138 stipulates that minimum age for employment should not be less than 15 years. However countries with less developed economic or educational infrastructure may set the minimum age at 14 years. Botswana has set employment minimum age at 14 years according to the Employment Act Chapter 47:01.

The Employment Act Section 107 (2) states that “A child who has attained the age of 14 years and is not attending school may be employed on light work not harmful to his health and development”. In addition, the country has ratified the ILO convention no. 182 on eliminating the worst forms of child labour.

On the other hand, UNICEF definition of a child refers to persons under the age of 18. These individuals are supposed to be under the care of their parents/ guardians even when they are not enrolled in schools or training institutions. Botswana's secondary education system is available to children up to high school level, accommodating children up to the age of eighteen.

Statistics Botswana has been administering economic questions to persons aged 12 years and above as far back as 1981. Although Botswana's minimum employment age is 14 years, Statistics Botswana collects economic activity information from persons aged 12 years and above in order to assess existence of child labour. However, for purposes of estimating unemployment, analysis will be focusing on those aged 15 and 19 years and above respectively to accommodate both the international practice (ILO) and national needs on employment information.

In view of the foregoing, the labour force would be confined to the population aged 15 and 19 years and over.

The results of the BCWIS estimated the labour force aged 15 years and over at 705,448 of which 126,019 (17.9 percent) were unemployed. Table 25 in Appendix 1 summarizes the labour force and resultant unemployment rates by age groups and sex for persons aged 15 years and above. Figure 11 presents unemployment rates by age group and sex for labour force aged 15 years and over

Figure 11: Unemployment Rates for Persons Aged 15 Years and Above by Age Group and Sex 2009/10

The labour force aged 19 years and over was estimated at 684,321, of which 118,008 (17.2 percent) were unemployed. Table 26 in appendix 1 and Figure 12 summarizes the labour force and resultant unemployment rates by age groups and sex for persons aged 19 years and above for 2009/10.

Figure 12: Unemployment rates for persons aged 19 years and above - 2009/10

2.10 Paid Employment

Out of the 705,448 labour force aged 15 years and over, 579,429 were employed, of which 394,887 (68.0 percent) were in paid employment. Males accounted for 38.0 percent and females for 29.6 percent of the labour force in paid employment. The private sector employed 45.7 percent of paid employees, followed by Central Government at 20.9 percent. Figure 13 summarizes paid employees by sector and sex.

2.11 Self-Employment, Unpaid and Own Lands/Cattle

The economically active population that was in employment other than paid employment accounted for 32.4 percent of the overall economically employed labour force. The majority (51.8%) were engaged in Own Lands/Cattle post (subsistence agriculture), followed by those in self-employment without employees (informal sector). Figure 14 illustrates the distribution of unpaid economically engaged labour force by sector.

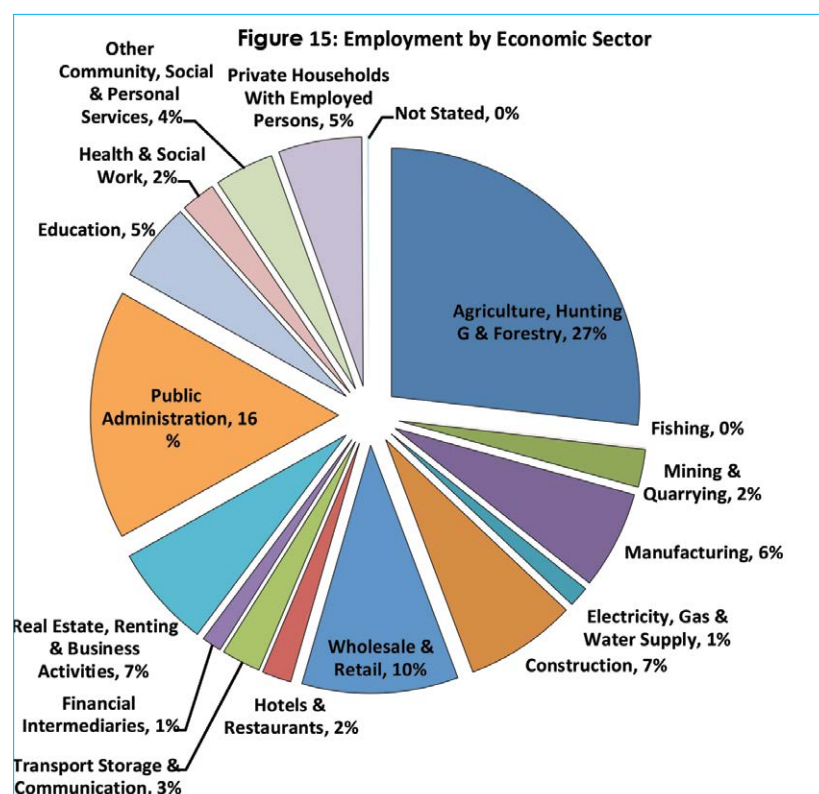

2.12 Employment by Occupation

Table 22 (in appendix1) gives a summary of the different occupations of the employed labour force. The most prevalent occupations were subsistence agriculture and related work, cattle herding and domestic help (including cleaning & laundering), which accounted for 12.0, 10.0 and six (6.0) percent of the employed labour force, respectively.

The majority of employed women worked as subsistence agriculture employees, at 14.0 percent, followed by domestic help at 13.0 percent and street vending at four (4) percent. Cattle herding was found to be the most prevalent occupation among males, accounting for 16.0 percent of the total employed males, followed by subsistence agriculture at 10.0 percent and security guards at 4.0 percent.

2.13 Employment by Industry

The results of the survey showed that Agriculture, Hunting and Forestry sector was the highest employer at 27.0 percent, followed by Public Administration and Retail and Wholesale sectors at 16.0 and 10.0 percent respectively. Figure 15 presents a pictorial summary of employment by economic sector.

2.14 Unemployment

The results of the BCWIS estimated that a total of 126, 019 persons aged 15 years and above were unemployed, that is, they were available for work and were actively seeking employment during the period of the survey. This population when taken as a proportion of the total labour force (which includes the employed and unemployed) resulted in unemployment rate of 17.9 percent nationally. Unemployment rate for females was 21.4 percent compared with 14.6 percent for males.

Unemployment rate was highest for age groups 15-19, 19 years and 20-24, which recorded rates of 41.4, 46.7 and 34.0 percent, respectively (see tables 25 & 26). Overall, unemployment by broad age groups revealed highest rates for the youth, aged 15 through 35 years, which stood at 25.0 percent.

Table 15.T: Percentage of Labour Force By Broad Age Groups and Sex

Age Group	Labour Force (%)		
	Male	Female	Total
Youth: 15 - 35	56.1	54.2	55.1
Adults: 36 - 64	39.1	41.8	40.4
Pensioners: 65 yrs+	4.9	4	4.5
Total	100	100	100
Age Group	Unemployment Rate (%)

Youth: 15 - 35	20.3	30.4	25
Adults: 36 - 64	8.2	11.8	10
Pensioners: 65 yrs+	0.2	0.4	0.3
Total	14.6	21.4	17.9

The labour force that attained some secondary education recorded the highest unemployment rate at 24.4 percent. As part of the labour force, persons who attained some secondary education stood at 328,448, which was 46.2 percent of the 710,600 total labour force.

Tables 16.T and able 17.T respectively summarises the labour force by sex and educational attainment, and age group.

Table 16.T : Labour Force by Educational Attainment and Sex

Educational Attainment	Male	Female	Total	Male	Female	Total
	Number			Percentage (%)		
No Education	59,955	37,491	97,446	9	6	15

Total	367,635	337,813	705,448	52	48	100	

Unemployment within strata indicated the highest unemployment rate to be in urban villages at 23.4 percent, followed by rural areas at 16.2. Across all strata, the contribution of female unemployment towards stratum unemployment was higher than that of males. This is illustrated in Table 18.T.

Table 18.T: Unemployment Rates Within Strata by Sex 2010

Stratum	Male	Female	Total
Cities/towns	10.5	16	13.1
Urban villages	20.5	26.2	23.4
Rural areas	12.7	20.4	16.2
Total	14.6	21.4	17.9

2.15 Unemployment by Training

Unemployment by training showed that the highest unemployment rate was among those with no training at 21 percent, followed by the category with Brigades certificate at 17.5 percent. Included in the category with no training, are those who went no further than secondary school education. Unemployment by training is summarized in Table 19.T.

Table 19.T: Unemployment Rates (%) by Type/Level of Training 2010

Training	Male	Female	Total
No Training	17.1	25	21
Apprentice Cert	12.8	19	14.8
Brigade Cert	17.2	18.2	17.5
Vocational Cert	10.6	15.3	12.9

Other Degree	5.1	12.4	7.7
Not Stated	12.7	16.8	14.7
Total	14.6	21.4	17.9

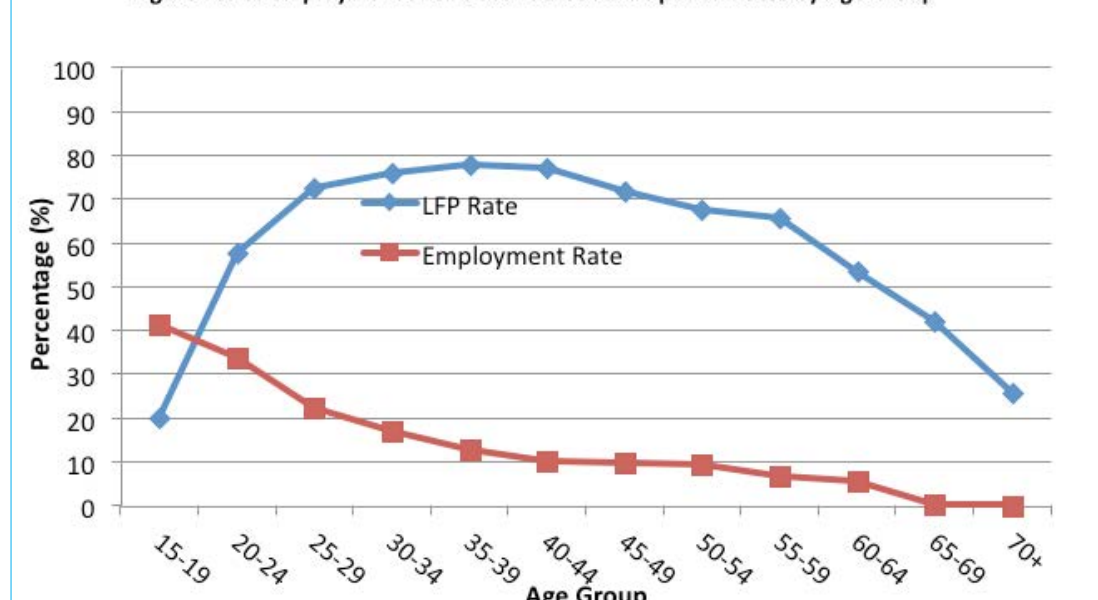

2.16 Labour Force Profile

The results of BCWIS revealed that the labour force was predominantly youthful, with the youth age group of 15 – 35 years accounting for 55.1 percent of the labour force aged 15 years and over. Males accounted for 52.0 percent of the labour force. The labour force was largely found to be untrained, with the majority having attained some secondary school education. The majority of the employed were in the agricultural sector.

Overall, unemployment rate of 17.9 percent was observed in this survey, with the youth registering the highest unemployment rate of 25.0 percent, compared with adults aged 36 – 64 years, with unemployment rate at 10.0 percent.

The labour force participation rates were found to be highest for the youth as depicted by Figure 16.

Figure 16: Unemployment and Labour Force Participation Rates by Age Group

2.17 Disability

The BCWIS survey sought to whether some members of the household, aged six years and above, had some chronic disability or long term health condition that prevented them from fully engaging in economic activity to earn a living.

The survey estimated that for the population aged six years and above, 4.4 percent had some form of disability. Within age groups, it was observed that disability increased with age. The most common types of disability were found to be “blindness” and immobility, at 46 and 22 percent respectively. Tables 20.T and 21.T give a summary of disability by Age group, and types of disability, respectively.

The results showed that 64 percent of the population aged six years and over had attended school, with 49 percent having attended primary education, 36 percent secondary education, and six (6) percent non-formal education.

Out of an estimated total of 64,623 persons aged 12 years and over with disability, 23 percent were employed. The private sector was the biggest employer of persons with disability, with 35 percent, followed by government at 22 percent. Twelve percent of persons aged 12 years and over with disability were found to be “employed” in their “own business with no employees” and nine (9) percent were employed in private households.

Table 20.T: Percentage Distribution of Population by Disability by Sex Within Age Group

Age Group	Males		Females		Both Sexes
	With Disability (%)	Without Disability (%)	With Disability (%)	Without Disability (%)	With Disability (%)
6 - 9	2.2	97.8	0.8	99.2	1.5

Chapter 3: Poverty Incidence and Profiles

3.1 Poverty Incidence

Poverty incidence is determined by computing the Poverty Datum Line (PDL), which is based on the cost of a basket of goods and services deemed to be necessary and adequate to meet basic needs for household members. This is based on the basic requirements for food, clothing, personal items, household goods & services and shelter. The daily/monthly requirements for PDL basket components differ according to sex and age, consequently the household composition.

The cost of the PDL basket, for a given household, is calculated on the basis of the households' demographic characteristics, including sex and age of members. The cost of this basket is then compared with the observed total consumption for the household. The observed total consumption of the household is calculated by adding up the total Consumption Expenditure, Aid, Wages in Kind, Gifts Received, School Meals and Unearned Income In-kind. When the household's PDL is lower than its observed total consumption, the household is defined as poor. This means that all its household members are living below the PDL.

The BCWIS estimates the poverty incidence at 19.3 percent, that is to say, 19.3 percent of the population live below the PDL. This is an improvement by 11.3 percentage points when compared with an estimated 30.6 percent observed from the 2002/03 Household Income and Expenditure Survey (HIES). The poor population was estimated at 362,116 in 2009/10, down from 499,467 in 2002/03. Table 22.T gives a comparative summary of poverty incidence by strata for 2009/10 and 2002/03.

Table 22.T: Poverty Incidence by Strata - 2002/03 & 2009/10

Stratum	Poverty Head Count (%)	Household Poverty Incidence (%)	Number of persons below poverty datum line	Poverty Head Count (%)	Household Poverty Incidence (%)	Number of persons below poverty datum line
	HIES* - 2002/03			BCWIS - 2009/10		
Cities/towns	10.6	8.8	39,113	8	5.2	31,401
Urban villages	25.4	17.4	138,547	19.9	10.4	134,467
Rural areas	44.8	33.4	321,808	24.3	14.5	196,249
National	30.6	21.7	499,467	19.3	10.8	362,116

* Note: HIES refers to Household Income and Expenditure Survey

The results indicate significant reductions in poverty incidence in rural areas and urban villages. The rural areas poverty incidence is estimated to have dropped from 44.8 percent in 2002/03 to 24.3 percent in 2009/10, a drop of 20.5 percentage points, with urban villages' poverty incidence going down by 5.5 percentage points, from 25.4 percent in 2002/03 to 19.9 percent in 2009/10.

The number of households living below the poverty datum line was estimated at 10.8 percent nationally in 2009/10, down from 21.7 percent in 2002/03.

The distribution of the poverty incidence across strata followed the same pattern as was observed in 2002/03, with poverty incidence tending to decline with urbanization. Figure 17 presents poverty incidence by strata. The significant decrease in poverty incidence in rural areas followed efforts by government to eradicate abject poverty, with concerted efforts in targeting the very poor in rural areas. Following the publication of the Botswana Poverty Map in 2008, stakeholders implementing poverty eradication programmes were able to target poor localities.

3.1.1 Poverty Incidence by District

The 2009/10 BCWIS sample design allowed estimates to be made at district level. This was meant to facilitate targeting when designing poverty eradication programmes. The 2002/03 HIES sample design did not allow for estimating poverty incidence at district level. However, the poverty mapping exercise combined the 2001 Population and Housing Census and the 2002/03 HIES to estimate poverty incidence at district level. Though the poverty mapping exercise used robust methods to arrive at the district poverty incidence estimates, it has to be noted that comparing the district poverty incidences over the two periods might not be consistent because of the different methodologies used.

Figure 18 details poverty incidence at district level from the 2002/03 HIES and 2009/10 BCWIS.

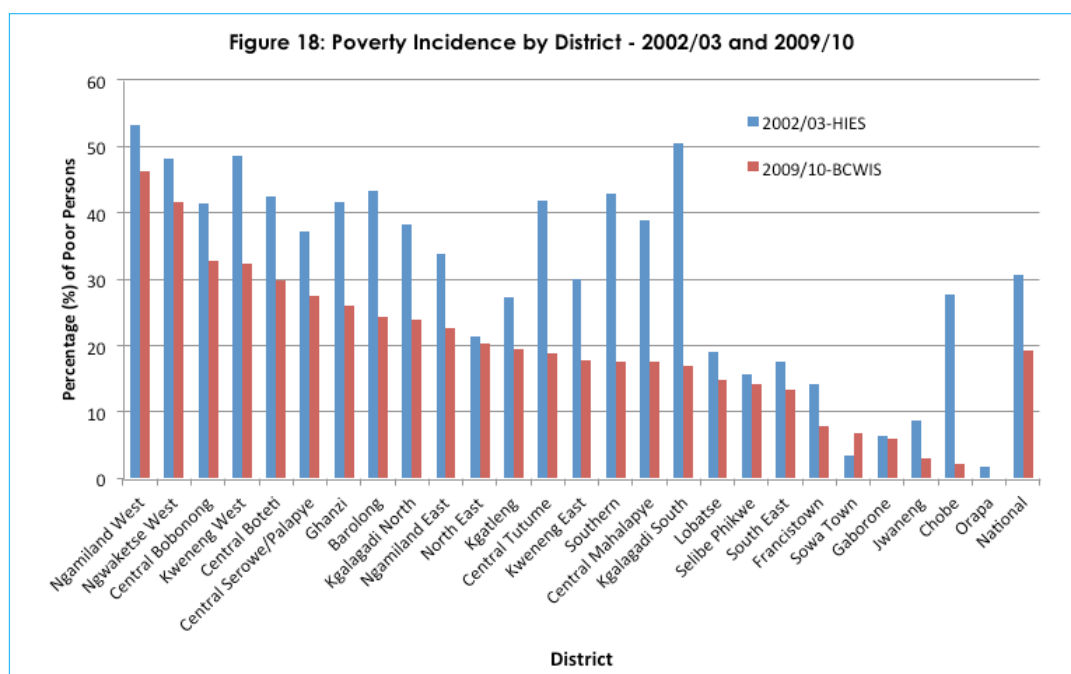

Five districts, Ngamiland West, Ngwaketse West, Central Bobonong, Kweneng West and Central Boteti districts recorded the highest poverty incidences at 46.2, 41.7, 32.8, 32.4 and 29.8 percent, respectively. The poverty incidences estimated in 2009/10 for the five districts, though high, were lower than the estimates recorded in 2002/03.

³ The 2003 district poverty incidence estimates were derived through the use of the 2001 PHC and the 2002/03 HIES results. Therefore, the comparison could be inaccurate in some instances where there was under/over sampling in a district during the 2002/03 HIES.

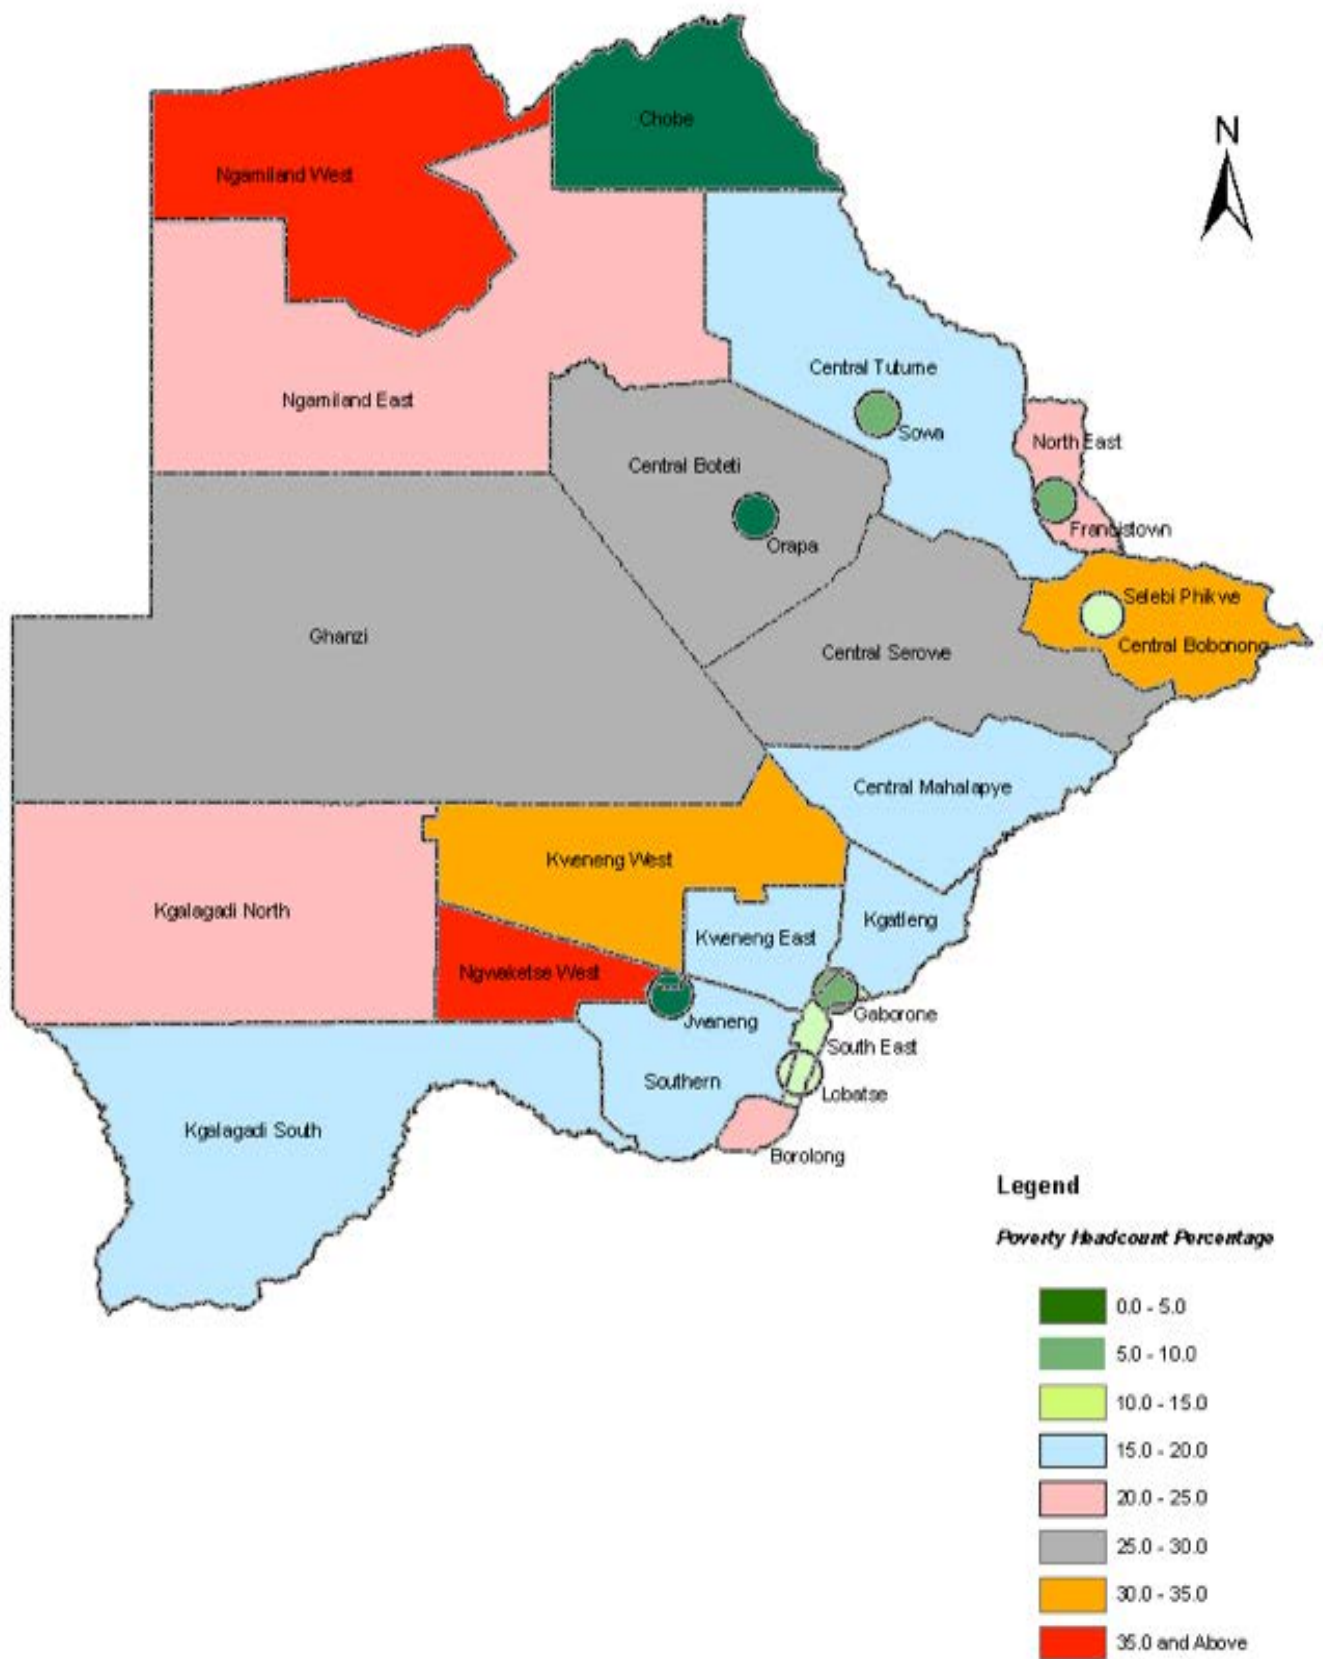

Comparison of poverty incidences between 2002/03 and 2009/10 have to be made with caution because the 2002/03 poverty incidence was derived using the 2002/03 HIES data and the 2001 Population and Housing Census data. The estimates for district poverty in 2002/03 were based on poverty predictors whilst the 2009/10 poverty incidence was derived directly from the survey.

A look at the numbers of persons living below poverty datum line shows that Kweneng East, Central Serowe/Palapye and Central Tutume, in that order, had the largest number of persons living below the PDL. However, when presented in percentage terms these districts were lower than those observed in other districts. This was because above-mentioned districts with higher absolute figures below PDL also had high total populations.

In interpreting the results, it is important to note that there are instances where the percentage of persons living below the PDL is low, whilst the number of persons living below the PDL is high. An example is Kweneng East, where the percentage of persons living below the PDL was 17.8 percent, and the number of persons below the PDL was estimated at 45,557, out of an estimated population of 256, 948.

2009-2010 POVERTY HEAD COUNT AT SUB-DISTRICT LEVEL

3.1.2 Poverty Incidence Percentage Shares by Strata Sex and Age Group

The BCWIS has observed that of the 19.3 percent of the population living below the PDL, 10.7 percent were female, of which 5.7 and 4.1 percent were in rural areas and urban villages, respectively. Overall, there were more females living below the PDL across all strata when compared with males. Within strata, there were more females living below the poverty datum line compared with males. The urban villages had 56.5 percent of females living below the poverty datum line, compared with 43.5 percent of males. Table 23.T summarizes percentage shares of the distribution of poverty incidence by strata and sex.

Poverty incidence by sex showed that 20.4 percent of females were poor compared with 18.1 percent of males (Table 38 in appendix 1)

Table 23.T: Poverty Incidence Percentage Shares by Sex and Strata (%)

Stratum	Male	Female	All
% Share Distribution of Overall Poverty Incidence by Sex an Strata			
Cities/Towns	0.8	0.9	1.7
Urban Villages	3.1	4.1	7.2
Rural Areas	4.8	5.7	10.5
National	8.6	10.7	19.3
Percentage of the Poor by Sex within Strata			
Cities/Towns	45.8	54.2	100
Urban Villages	43.5	56.5	100
Rural Areas	45.4	54.6	100
National	44.8	55.2	100

The results further showed that 55.2 percent of the poor population was female (See Table 40 appendix1). The distribution of poor persons showed that the majority were in the age groups 0-4, 5-9 and 10-14 years, with 15.7, 15.1 and 15.4 percent of the poor population, respectively.

Figure 19 depicts the percentage distribution of the poor by age group and sex. The figure shows that poverty decreases as age increases. This, to a large extent is due to the population structure, which showed higher population in younger ages compared to older ages. Moreover, unemployment rates were also found to be highest among the youth (Table 25 in appendix1).

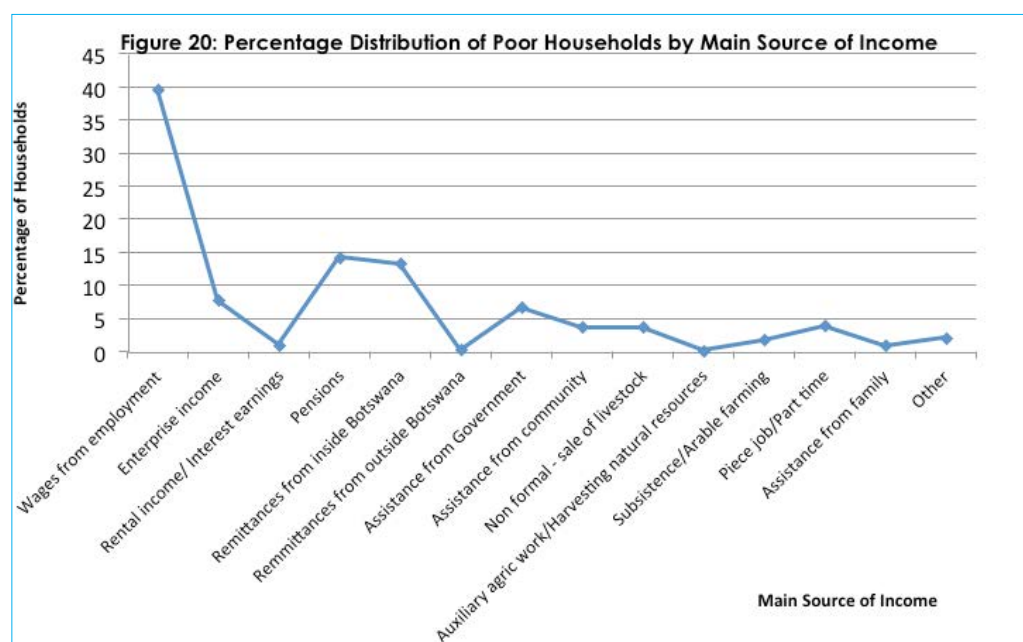

3.1.3 Poverty Incidence at Household Level by Sex of Head & Source of Income

The distribution of poor households revealed a slightly higher percentage of female headed households living below the PDL at 6.3 percent compared with 4.4 percent of male headed households, at national level. Across strata, the percentage of female headed households below the PDL was higher than of male headed households in urban villages and rural areas. This is in spite of the fact that results showed that there were more male headed households compared to female households across strata, with the exception of urban villages. Table 24.T summarizes distribution of poor households by strata and sex of head of household.

Table 24.T: Percentage Share Distribution of Poor Households by Strata & Sex of Head

Stratum	Households		
	Male Headed	Female Headed	All
% Distribution of Poor Households by Sex And Strata			
Cities/Towns	0.7	0.6	1.3
Urban Villages	1.2	2.2	3.4
Rural Areas	2.6	3.5	6
National	4.4	6.3	10.8
Percentage of Poor Households by Sex Within Strata			
Cities/Towns	51.5	48.5	100
Urban Villages	34.5	65.5	100
Rural Areas	42.5	57.5	100
National	41.1	58.9	100

At the national level, the majority of poor households, indicated their main source of income as Wages from Employment, accounting for 39.7 percent of households, followed by Pensions and Remittances at 14.3 and 13.4 percent respectively, of poor households. The trend was the same for both urban villages and rural areas. In cities and towns, 68.0 percent of poor households indicated their main source of income as being Wages from Employment, followed by 9.7 percent (Enterprise income) and 6.4 percent (Remittances). The results are summarized in Table 36 of appendix 1. Figure 20 depicts distribution of poor households by major source of income.

3.1.4 Poverty Incidence by School Attendance and Training of Head of Household

The BCWIS results showed that in every stratum, the majority of heads of household for poor households had attended school, with the cities and towns standing at 78.6 percent and the urban areas and rural areas at 58.1 and 50.0 percent respectively. The results are summarized in Table 25.T. Over 90 percent of poor heads of household had no training. The majority of those were in rural areas at 58.4 percent and in urban villages with 31.2 percent. The results are presented in Table 41 in appendix 1.

Table 25.T: Poor Households by School Attendance of Head

School Attendance	Cities/Towns	Urban villages	Rural areas	National

Attended	17.4	32.7	49.9	100
Never Attended	5.8	30.2	64	100
Not Stated	31.8	27.8	40.4	100
All	12.4	31.6	56	100

3.1.5 Poverty Incidence by Disability/Illness of Head of Household

Out of the estimated 58, 285 poor households, 34.6 percent were headed by persons with disability or illness. HIV/Aids was the most prevalent ailment at 9.4 percent, followed by High blood pressure and Defect of seeing/blindness at 9.1 and 4.5 percent respectively. Table 43 in appendix 1 presents details of the distribution by strata.

3.1.6 Poverty Incidence by Marital Status of Head of Household

At the national level, it was estimated that 33.8 percent of heads of poor households were never married. The "married" and "living together" heads, respectively accounted for 26.4 and 20.8 percent of total poor household heads nationally. This pattern was observed for cities/towns and rural areas. In Urban villages, 21.1 percent of poor household heads were found to Widowed/Widowers. Table 26.T and figure 21 present a summary of the results.

Table 26.T: Percentage of Households by Marital Status of Head by Strata

Marital Status	Cities/towns	Urban villages	Rural areas	National
Married	24.1	29.3	25.3	26.4
Living together	25.7	10.4	25.7	20.8
Separated	1	0.3	2	1.3
Divorced	-	1.7	2.8	2.1
Widowed/Widower	8.1	21.1	13.9	15.5
Never married	41.1	37.1	30.4	33.8
All	100	100	100	100

Figure 21: Percentage of Poor Household Heads by Marital Status and Strata

3.1.7 Poverty Incidence by Household Size and Number of Rooms

The average household size of poor households was estimated at 6.2 persons nationally, with highest of 7.3 persons observed for urban villages. The cities and towns average household size for poor households was estimated at 4.3 persons.

Table 27.T: Average Household Size of Poor Households by Strata

Stratum	Average Household Size
Cities/towns	4.3
Urban Villages	7.3
Rural Villages	6
National	6.2

In cities and towns, the majority of poor households were found to be living in one (1) roomed housing units, whilst in rural areas and urban villages, the majority of poor households occupied two (2) roomed housing units, with the percentage estimated at 33.5 percent for rural areas and 30.3 in urban villages. The majority poor households living in one (1) roomed housing units were found to be in rural areas, at 61.0 percent. The results are summarized in Table 28.T.

Table 28.T: Percentage Distribution of Poor Households by Number of Living rooms

Number of Rooms	Cities/towns	Urban Villages	Rural Villages	National
1	52.5	12	28.8	26.5

3.2 Summary Profile of Poor Persons and Households

The results showed that the majority of persons living below the poverty datum line are living in rural areas and that poverty incidence decreased with urbanization. Of the poor population, the majorities was in the younger ages (less than 35 years of age) and were mostly unemployed. Females were the most affected by poverty compared to their male counterparts.

At Household level, households headed by females were found to be the most affected by poverty. Generally, households headed by “never married” heads were most likely to be poor, and the heads of households would most likely have no training though they would have attended school.

3.3 Population Living Below a one Dollar (1 USD) a Day

The national estimates for persons who were living below the one dollar a day in Botswana reduced from 23.4 to 6.4 percent between 2002/3 and 2009/10 as shown on Table 29.T. These rates translated into 119,209 persons living below a dollar a day in 2009/10 compared to 382,733 persons in 2002/3.

The data showed a significant decline in the proportion of persons living below a dollar a day between 2002/03 and 2009/10. In rural areas, the percentage dropped from 36.1 to 8.4 percent, whilst it went down from 19.3 to 6.0 percent in urban villages. The cities and towns registered a decrease of 2.4 percentage points during the period, from 5.1 to 2.7 percent.

The Dollar (\$) a day poverty line is a measure of extreme poverty through the adjustment of the local currency, using the Purchasing Power Parity (PPP) exchange rate. Purchasing Power Parities are computed based on the results of the World Bank's International Comparison Program (ICP). The most recent PPPs were generated based on the 2005 World Bank ICP, for which Botswana, through the Statistics Botswana, was a participating member.

The World Bank dollar a day poverty line was adjusted to \$1.25 on the basis of the 2005 ICP, up from \$1.08 in 1993. Botswana's PPP exchange rate was estimated at 2.42 in 2005, up from 1.338 in 1993. The \$1.25 poverty line translates to $(1.25 * 30.31)$ \$37.89 per month. The Botswana dollar a day line is P 135.32, calculated as $(37.89 * 2.42) * (129.8/88)$ per month in 2009/10, where 129.8 and 88.0 were the Cost of Living Indices in 2005 and 2009/10 (survey period), respectively.

Table 29.T: Proportion of Persons Living Below PPP one Dollar (\$) a day -2002/03 and 2009/10

Stratum	Total Number of Households	Total Number of Persons	Total Number of Households with persons below one Dollar a day	Number of Persons below dollar a day	Proportion of persons below dollar a day (%)

3.3.1 Profiles of Households Living Below a Dollar A Day

The analysis of households living below a dollar a day revealed that in cities and towns, and rural areas, the majority of the households were male headed, whilst in urban villages, the majority of households living below a dollar a day were female headed. Figure 22 illustrates the distribution of households living below a dollar a day by strata and sex of household head.

The average age of heads of households below a dollar a day was 45 years, with the majority aged 28 years as the modal age revealed. This indicated that the majority of households living below a dollar a day were headed by youth. This was the case at national level and in rural areas for male headed households. In rural areas, the female headed households' modal age of head of household was 63 years, indicating that most of households living below a dollar a day were headed by elderly females. Table 30.T presents mean and modal ages of heads of household below a dollar a day by sex and strata.

Table 30.T: Mean and Modal Ages, and Sex of Heads of Households Living Below Dollar A Day - By Strata

Stratum	Male Headed		Female Headed		Both Sexes	
	Mean age Of Head (yrs.)	Modal age Of Head (yrs.)	Mean age Of Head (yrs.)	Modal age Of Head (yrs.)	Mean age Of Head (yrs.)	Modal age Of Head (yrs.)
Cities/Towns	40	37	32	21	38	37
Urban villages	44	38	48	33	47	46
Rural areas	48	28	49	63	48	28
National	45	28	47	33	46	28

Figure 23 shows the percentage distribution of households living below a dollar a day by marital status and strata. At the national level, 38.8 percent of households living below dollar a day were headed by "never married" persons, while in urban villages the households living below a dollar a day who were headed by "never married" persons accounted for 46.2 percent of the households living below a dollar a day.

The results for BCWIS showed that at national level, urban villages and rural areas, the majority of households living below a dollar a day were headed by unemployed persons, whilst in cities and towns they were headed by employed persons. Figure 24 presents the results graphically.

Further analysis on households headed by employed persons observed that the majority of those heads of household were employed in the Private Sector. At the national level, 30.2 percent were employed in the Private Sector, whilst in cities/towns, the figure stood at 54.1 percent, with the second most important employer being “Own Business with no Employees” at 18.8 percent followed by Central Government with 15.5 percent. In rural areas, the majority of the employed household heads living below a dollar a day mostly worked in “Own Lands/Cattle Posts”.

Among those employed, a high number of them were employed on permanent basis across all the strata. In cities and towns, they accounted for 81.0 percent of the employed heads of household living below a dollar a day. Figure 25 and Table 31.T present households heads living below a dollar a day by employment sector and strata. Figure 26 presents heads of households below a dollar a day by status of job.

In summary the households living below a dollar a day were found to be most likely headed by;

- Never Married Persons
- Untrained Heads of Households
- Persons Employed in the Private Sector – in cities and towns
- Persons employed as Security Guards, Petrol Attendants and Shop Assistants
- Persons engaged in subsistence agriculture – in rural areas
- Unemployed Persons in Urban Villages and Rural Areas
- Persons engaged in household duties/caring for the sick – in urban villages and rural areas.

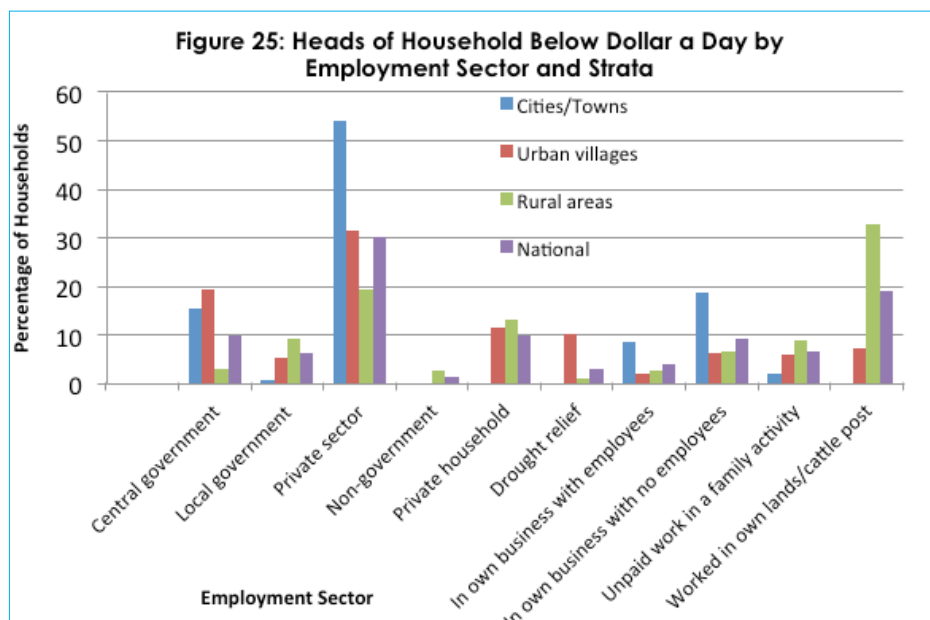

Table 31.T: Percentage Distribution of Employed Household Heads Below Dollar a Day by Employment Type/Status

Permanent	Temporary	Seasonal	All
81	19	-	100
48	47	5	100
46	27	27	100
54	30	16	100

3.4 Self-Assessed Poverty

The opinion of household members was sought regarding whether they considered themselves poor or not. This was done through a series of question including the amount of income they considered to be the absolute minimum required to meet the household's basic needs.

At the national level, 46.1 percent of the households thought that their current income was less than the absolute minimum they required to meet their basic needs, in contrast to 53.5 and 44.5 percent realized in rural areas and urban villages respectively. Table 32.T gives a summary of responses by strata.

Table 32.T: Percentage of Households Consideration of Current Income

Stratum	Current Household Income Compared with Considered Absolute Minimum Required			
	Less	Same	Greater	Total
Cities/Towns	36.1	15.5	48.4	100
Urban Villages	44.5	14.3	41.2	100
Rural Areas	53.5	19.6	26.9	100
National	46.1	16.8	37.1	100

Households were asked to compare themselves with households in their community on whether their living conditions were better than the rest of households in the community, on average. In the rural areas, 18.1 percent of households considered themselves much poorer than average, compared with 6.5 percent of households in cities and towns who considered themselves much poorer than the average. At the national level, 13.1 percent of households considered themselves much poorer than average. Table 33.T presents summary of households' responses by strata.

Table 33.T: Percentage of Households' Own Description of Living Conditions Compared to Others

Stratum	Among the Wealthiest	Wealthier than Most	About Average	Somewhat Poorer than Average	Much poorer than Average	Total
Cities/Towns	3.4	5	63.6	21.5	6.5	100
Urban Villages	3.2	5.9	56	24.1	10.8	100
Rural Areas	2.6	4.3	43.9	30.2	18.9	100
National	3	5	52.9	26	13.1	100

3.5 Food Security

The survey sought to determine the households' experiences regarding food security. In general, households were asked whether they ever worry about never having enough food. In the rural areas, 50.6 percent of households indicated that they do worry about not having enough food compared with 42.8 and 28.8 percent of urban villages and cities and towns households respectively. The summary of responses is presented in Table 34.T. Of the households that indicated that they worried about not having enough food, 12.1 percent indicated that they worried about not having enough food over ten (10) times in the past four (4) weeks. The results are presented in Table 35.T.

Table 34.T: Percentage of Households by Food Insecurity Responses

Stratum	Worry About not Having Enough Food		
	Yes	No	All
Cities/Towns	28.8	71.2	100
Urban Villages	42.8	57.2	100
Rural Areas	50.6	49.4	100
National	42.5	57.5	100

Rural Areas	55.5	31.2	13	100
National	56	31.1	12.7	100

Chapter 4: Incomes and Expenditures of Households

4.1 Introduction

This chapter presents results on average household incomes by sources, disposable incomes, income inequalities and average household consumption expenditures on goods and services.

Definitions on what constitutes incomes, expenditure and consumption are presented in Appendix 2. Furthermore, it has to be borne in mind that information on incomes is susceptible to under/over reporting by respondents. Expenditure information is affected mostly by under reporting, particularly for items such as alcohol and tobacco. In some instances, households may under report consumption under the misconception that they would be enrolled under government assistance schemes. The reported information was reconciled with other sources like imports and production of consumption goods and other information gathered during the survey to come up with best possible estimates.

4.2 Household Incomes

Table 36.T presents average monthly household incomes by source. The results showed that Cash Earnings at P 3, 936.12 accounted for most of household incomes in 2009/10, contributing 64.3 percent to the average Gross Income of households at the national level. Cash Earnings were the main contributors to average household income across strata, accounting for over 79.2 and 65.4 percent of average monthly gross household income in cities/towns and urban villages, respectively. Cash earnings' contribution to average gross household income in rural households was 40.7percent. This pattern was also observed in 2002/03 for all strata.

Overall, the contribution of cash earnings to average household gross income across has shown slight increases in cities/ towns and urban villages, with rural areas' contribution of cash earnings recording a decline. The decline in the contribution of cash income in rural areas was offset by significant increases in the contribution of unearned income and own produce towards average household gross income, which recorded increases of 18.6 and 5.5 percentage points respectively, between 2002/03 and 2009/10.

School meals and Own produce contributions towards gross average household income recorded increases between the two periods.

The results showed decreases in Business Profits' contribution towards averages gross household income in cities/towns, rural areas and at national level.

Table 36.T: Summary of Average Monthly Incomes by Source; by Strata-Pula

Sources of Income	2002/03				2009/10

4.2.1 Household Disposable Incomes & Income Distribution

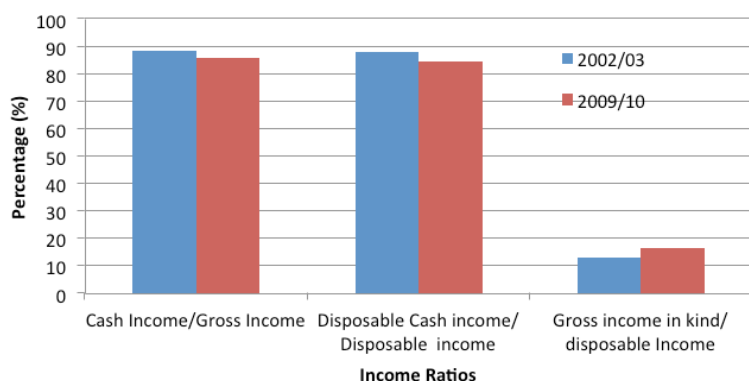

The 2009/10 BCWIS results estimated the average household disposable income at P5, 304 up from P2, 425 estimated from the 2002/03 HIES.

The results revealed a fairly stable, though slightly declining, ratios of average household cash income to gross income between the periods 2002/03 and 2009/10 (Figure 27). The cities/towns and rural areas ratios of cash income to gross income recorded decreases of 2.0 and 1.7 percentage points respectively, between 2002/03 and 2009/10. The declines in the ratio of cash income to gross income were accompanied by increases in gross income in-kind as shown by the increase in the ratio of gross income in-kind to disposable income, which increased from 13.0 to 16.3 percent and national level between 2002/03 and 2009/10, underscoring the importance of income in-kind for rural households. The results are summarized in Table 37.T.

Table 37.T: Average Monthly Household Incomes by Strata - Pula.

Income Aggregates	2002/03.				2009/10.			
	Cities/ Towns	Urban Villages	Rural	National	Cities/ Towns	Urban Villages	Rural	National
Gross Cash Income	4,267.80	2,381.70	1,059.60	2,357.90	8,543.57	5,971.72	2,651.28	5,253.90
Disposable Cash Income	3,782.20	2,181.40	975.8	2,126.60	7,388.10	5,023.88	2,255.70	4,482.29

Figure 27: Households' Income Ratios to Gross Income - 2002/03 & 2009/10

4.2.2 Household Savings and Current Outlays

Households' savings or propensity to save was estimated by summing households' contributions to pensions and investment, which included deposits to savings and investment in shares. Table 38.T shows that at the national level, there was an improvement in the households' propensity to save as shown by increases in the ratio of savings to total household current outlays. The ratio increased from 7.7 percent in 2002/03 to 16.7 percent in 2009/10.

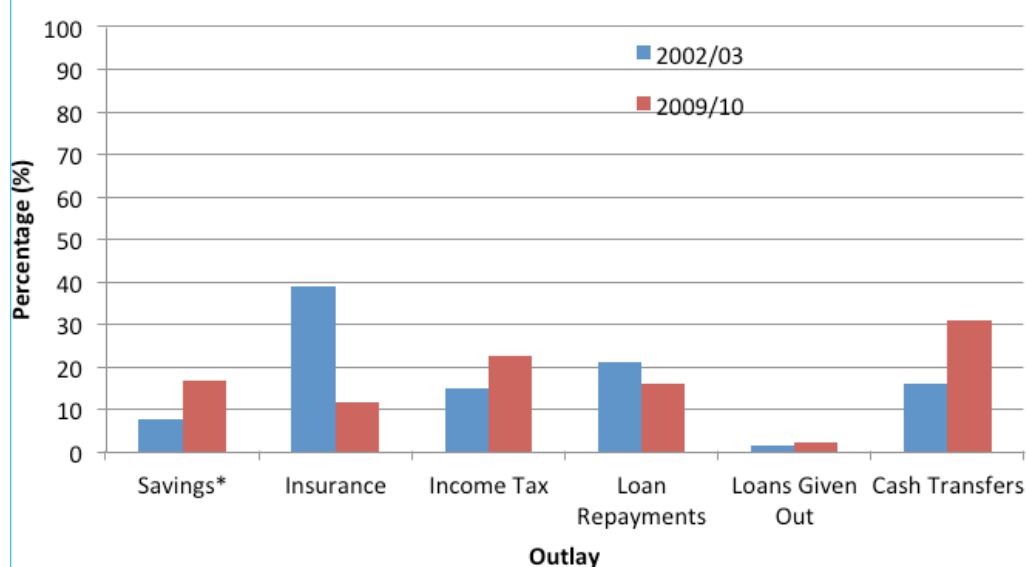

The results further indicated increases in income tax and cash transfers out of households. These were accompanied by decreases in average insurance contributions and loan repayments. Figure 28 presents the results graphically.

Table 38.T : Household Average Other Current Cash Outlays

Other Current Cash Outlays	2002/03.				2009/10.			
	Cities/ Towns	Urban Villages	Rural	National	Cities/ Towns	Urban Villages	Rural	National

Note: * Savings refers to sum of pension contributions and investments

Figure 28: Percentage Shares of Households Current Outlays - 2002/03 & 2009/10

4.2.3 Household Income Inequality

Income inequality is measured using the GINI coefficient, which summarizes income/consumption inequality in a single figure. The GINI coefficient ranges between one (1) and zero (0). When it is equal to one (1), it means there is complete inequality, while when it is equal to zero (0) it means there is complete equality.

To get the details of income/consumption inequality, the Lorenz curve is used. The Lorenz curve plots the percentage cumulative distributions of income/consumption and households against each other. The 45 degrees diagonal line represents a situation of complete equality. Complete equality would mean that, for instance, 10.0 percent of households would get their corresponding 10.0 percent of income. In the case of complete equality, the Lorenz curve would be one and the same as the 45 degrees diagonal. With inequality, the Lorenz curve would be below the 45 degrees diagonal. The space between the 45 degrees diagonal and the plotted Lorenz curve depicts the extent of inequality. The GINI coefficient is derived by dividing the area between the 45 degrees diagonal and the Lorenz curve with the total area of the triangle below the 45 degrees diagonal. The Lorenz curve depicting consumption inequality is plotted in Figure 26.

The 2009/10 BCWIS results indicated that income inequality, bearing in mind the difficulties in obtaining accurate information from respondents, has increased between 2002/03 and 2009/10. At the national level, inequality in disposable income increased from 0.573 in 2002/03 to 0.645 in 2009/10. The increase in household disposable incomes inequality was more pronounced in rural areas, where the GINI coefficient increased from 0.515 to 0.621, recording an increase of 0.106 GINI points.

Inequality of households disposable cash incomes also recorded increases between 2002/03 and 2009/10, with the rural areas again recording the highest increase, of 0.135 GINI points, moving from 0.622 in 2002/03 to 0.757 in 2009/10, as indicated in Table 39.T.

Figure 29 presents a graphical movement in households' disposable incomes' inequalities for the periods 1993/94, 2002/03 and 2009/10, indicating an overall general increase in income inequalities across strata.

Table 39.T: Income GINI Coefficients (1993/94, 2002/03 & 2009/10)

	Disposable income			Disposable cash income		
	GINI COEFFICIENTS			GINI COEFFICIENTS		
Stratum	1993/94	2002/03	2009/10	1993/94	2002/03	2009/10
National	0.537	0.573	0.645	0.638	0.626	0.715
Cities/Towns	0.539	0.503	0.608	0.548	0.513	0.619
Urban Villages	0.451	0.523	0.625	0.552	0.552	0.671
Rural	0.414	0.515	0.621	0.599	0.622	0.757

4.2.4 Household Consumption Inequality

Households inequality observed through income is high and susceptible to inaccuracy as a result of difficulties experienced in reporting income by the respondents. Comparatively, information on consumption is more reliable. Inequality measured using the consumption aggregate revealed lower GINI coefficients. The results are presented in Table 40.T.

Table 40.T: Consumption GINI Coefficients – 2002/03 & 2009/10

Stratum	GINI Coefficients	
	2002/03	2009/10
National	0.571	0.495
Urban*	0.55	0.51
Rural Areas	0.505	0.438

*Urban combines Cities/Towns and Urban Villages

Consumption Inequality was 0.495 at national level in 2009/10 compared with 0.571 in 2002/03. The results showed an improvement in urban inequality from 0.550 in 2002/03 to 0.510 in 2009/10. Rural inequality went down from 0.505 in 2002/03 to 0.438 in 2009/10.

Decreases in consumption inequality were accompanied by decreases in poverty incidences at the national level and in all strata (Chapter 3).

4.1 Household Expenditures

This section presents average consumption expenditures of households on goods and services recorded over a period of 30 days during the survey period, excluding expenditure on capital formation and investment.

Table 41.T compares average monthly household expenditures for 12 commodities & services groupings. The results showed that there was an overall increase in average household final consumption expenditure from P1, 900.60 in 2002/03 to P3, 045.93 in 2009/10. There were, however, changes in the expenditure patterns with some commodity group share increasing at the expense of others.

Table 42.T presents expenditure shares by commodity groups for 2002/03 and 2009/10. At the national level, the share allocated to food went down 23.7 percent in 2002/03 to 17.7 percent in 2009/10. The biggest expenditure share was allocated transport, increasing from 15.6 percent in 2002/03 to 20.7 in 2009/10. This shift in share allocation was observed for cities/towns, with urban villages and rural areas households increasing their share allocated to transport at lesser magnitude such that food remained the most important commodity.

At national level, there has been a change in order of importance, with transport, food and housing being allocated the highest shares of 20.7, 17.7 and 13.6 percent of the consumption expenditure budget. Food was replaced by transport in the order of importance.

According to Engel's Law, as households incomes improve, the budget allocation shifts such that the budget allocated to food becomes smaller as households spend more on "luxury" goods. This situation was partly observed in cities and towns, where expenditure on transport increased significantly compared to that of food.

Statistics indicate that nationally, there were 17, 585 newly registered privately owned cars in 2002/03 compared with 40,326 in 2009/10, an increase of 129 percent, indicating a shift in consumption expenditure towards transport items and consequently transport consumables like fuel. The shift was partly a result of availability of "affordable" vehicle imports from abroad. It can be concluded therefore that the availability of second hand imported vehicles from abroad increased household expenditure on transport.

It has to be noted also that the average household expenditure is largely influenced by expenditures of high consuming households, of which when incomes improved, they were able to afford second hand vehicles and other high value commodities.

Across strata, average household expenditure on food increase showed decreasing trend with urbanization, with rural villages' average expenditure being highest compared to that of cities/towns' households. Average households' expenditure on housing increased with urbanization, with cities/towns average expenditure on housing at 15.0 percent and that of rural villages at 10.6 percent.

Chapter 5: Lessons and Experiences from the Survey

5.1 Introduction

This chapter highlights issues that impacted on the quality aspects of survey results, including experiences and lessons, and offering recommendations that could improve on the quality of the survey results in the future.

5.2 Problems/Constraints:

a) Refusals: As it has become a norm during the conduct of Household Surveys by Statistics Botswana, some household members in the high income areas of cities/towns refused to be interviewed. Generally, they agreed to be interviewed for Socio-Demographic topics and later on refused to provide information on incomes and daily transactions. This resulted in partially completed modules on incomes and expenditures leading to unreliable and incomplete information.

b) Terminations: The survey engaged 160 enumerators and 15 supervisors who were employed temporarily for the survey. These were drawn from unemployed youth who were actively seeking employment. As a result, these temporary enumerators and supervisors were continuously seeking permanent employment during the survey period. There was thus high staff turnover since some secured permanent employment, resulting in engaging those who were on standby. This impacted negatively on the quality of data collected because in most instances those on standby had not performed very well during training.

c) Survey Rounds: In the previous HIES, the households were visited for a period of 30 to 31 days using a rolling month. For BCWIS, this was changed to a calendar month due to constraints imposed by the Regulations of Industrial Employees (RIE) which applied to the drivers engaged in the survey. They had to work for 22 days and have eight (8) days of rest during a calendar month. As a consequent of this, there was total of 15 day lost due mandatory rest days, travel and listing.

This resulted in “lost” household transactions for which adjustments had to be made.

d) Survey Instruments: BCWIS was the first of its kind to be conducted by then Central Statistics Office, now Statistics Botswana at the request of stakeholders. It sought to cover all the dimensions of poverty. As such, the questionnaires were too long as a lot of topics were covered. This compromised the quality of returns.

e) Data Processing: Over and above the issue of survey returns quality, there were challenges in processing the data due to difficulties in linking the different modules. There was need to come up with multiple weights as a result of different response rates from the many modules covered by the survey.

5.3 Enumeration Area Maps:

The enumeration area maps used were eight (8) years old. There were new dwellings whilst some had been demolished. This provided a challenge in identifying enumeration areas, thus making the listing exercise a tedious job resulting in reduced enumeration period.

5.4 Coverage of Survey:

Households in the terrain areas i.e. CKGR and Delta were never in the sampling design neither for 1993/94 nor in 2002/03. Such areas have not been accounted for independently for 1993/94, 2002/03 and 2009/10, so the characteristics of them based on the BCWIS are not known exactly.

5.5 Recommendations/Interventions

- **Refusals:** Statistics Botswana will embark on a rigorous sensitization exercise to educate the public on the importance of responding to survey questions.
- **Terminations:** District based freelance enumerators will be piloted to ensure that there is always a well-trained experienced pool of enumerators in the districts to mitigate against staff turnover.
- **Survey Rounds:** Concessions will be made with industrial staff so that a return to the “rolling” month is made. This would also result in increasing the budget allocated for this kind of survey to enable paying the industrial staff their mandatory rest days.
- **Survey Instruments:** The topics covered by the survey in future will be reduced to allow for ease of administration of the instruments and consequently improved data processing.
- **Enumeration Area Maps:** Statistics Botswana is planning to do a continuous update of the sampling frame. This will result in up to date enumeration area maps. It will also be necessary to consider continuous update of locality status to ensure that the surveys conducted towards the tail end of the inter censal period are correctly classified in the event they have transformed into urban villages. This would improve in sampling by strata.

Appendix 1: List of Statistical Tables

116 | BOTSWANA CORE WELFARE INDICATORS SURVEY 2009/10

Statistics Botswana

Appendix 2: Definition of Terms and Concepts

Cash Earnings

This is earned cash income from regular employment and irregular work. It includes gross wages and salaries, back pays, bonuses, overtime payments and allowances. Also included are annual earnings (estimated to monthly equivalent), income tax refunds and money earned from outside the country which is used domestically.

Own Produce Consumed

Own produce consumed covers goods acquired by hunting, fishing, gathering and rearing which are consumed by the household. Services generated and used to benefit household are also included under own produce.

Wages In-kind

Included under wages in-kind are goods received in lieu of cash wages, and costs of goods, services, utilities provided free (and paid directly) by the employer.

Unearned Income

Unearned income refers to incomes received by household members not from sale of labour or entrepreneurship. Included under unearned income are incomes for pension or annuity, Old age pension, War veteran pensions, bonus payments from co-operatives, student allowances, incomes from house or property (for which income tax is not paid). This income could be in cash or in-kind.

Household Receipts

This refers to cash and non-cash income received by households, excluding earned and unearned income. These could be cash or goods gifts from other households in or outside the country. These are largely transfers from other households in the form of cash or goods/ services.

Cash Given Out

Included under cash given out are transfers out of the household to other households as gifts.

Other Outgoings

These include non-cash transfers from the household

Aid

Aid refers to goods received under Government aid programmes, such as drought relief, rations for orphans and the elderly. Food aid from other institutions is also included under aid.

School Meals

These are meals given to pupils and students in primary and secondary schools under government's school feeding program.

Gross Cash Income

This is the sum of Cash Earnings, Business Profits, Unearned Cash Income and Cash receipts.

Gross Income

Cash Income (Gross) plus Wages In Kind plus Gifts Received plus Own Produce consumed plus Aid plus School meals

Earned Income

Cash Earnings plus Wages in Kind plus Business Profits

Disposable Cash Income

Cash Income minus Cash Given out, and less Income tax.

Disposable Income

Disposable Cash Income plus Gifts Received plus Own Produce consumed plus Wages In Kind plus Aid plus School meals minus Gifts Given Out.

Cash Consumption Expenditure

This refers to household cash purchases of goods and services.

Consumption Expenditure In-Kind

Covered under in-kind consumption expenditure are goods and services acquired by households through giving out goods/services instead of cash.

Total Consumption

Consumption Expenditure (cash) plus Consumption Expenditure (in kind) plus Wages In Kind plus Gifts Received plus Own Produce Consumed plus Aid plus School meals minus Gifts Given Out.

 Post Grad. Diploma Education.....10
 Master of Education.....11
 None.....12

--	--

10. Have you had any in service training in the last 5 years?

YES....1
 NO.....2

--

11. Do you also teach in this school (other than to fill in for absent teachers)?

YES....1
 NO.....2

--

12. Do you do another economic activity during the school year in addition to your work in this school? This can include teaching or tutoring outside of the school.

YES....1
 NO.....2 (>> SECTION 2)

--

13. What is this activity? (Main activity if more than one)

TEACH AT ANOTHER SCHOOL.....1
 EDUCATION CONSULTANT.....2
 PRIVATE TUTOR.....3
 OWN BUSINESS.....4
 OWN LANDS/CATTLE.....5
 EMPLOYEE.....6
 OTHER (SPECIFY) _____

--

14. How many hours a week do you work in your other activitie(s) during the school year?

HOURS
 PER WEEK

--	--

7. How many students have left school since the start of the school year?

IF ON VACATION: DURING THE COURSE OF THE LAST SCHOOL YEAR

NUMBER OF STUDENTS

8. Does this school have..?

YES... 1
NO... 2

DOUBLE SHIFT CLASSES
(STUDENTS ATTENDING ONLY HALF-DAY)

MULTI-GRADE CLASSES
(STUDENT OF DIFFERENT LEVELS IN THE SAME CLASS)

IF NO MULTIGRADE CLASSES »10

9. How many classes are multigrade? EACH CASE OF A TEACHER INSTRUCTING STUDENTS FROM DIFFERENT GRADES AT THE SAME TIME IS A MULTIGRADE CLASS

NUMBER

SECTION 2 : SCHOOL AND PUPIL CHARACTERISTICS

10. During the past 5 years has the school had to close for a week or more, other than for normal vacation or breaks?

YES...1
NO...2>>13

11. How many times did the school have to close in the last 5 years?

NUMBER

12. What was the reason for the last closure?

STRIKE.....1
UNABLE TO PAY STAFF.....2
TEACHERS ABSENT.....3
CATTLE/AGRICULTURAL WORK.....4
SECURITY CONCERNS.....5
OTHER (SPECIFY) _____

13. How often do you have staff meetings with all the teachers at the school?

UNIT OF TIME

DAY.....1
WEEK.....2
MONTH.....3
THREE MONTHS.....4
SEMESTER.....5
YEARS.....6

NUMBER OF TIMES

UNIT OF TIME

14. How are highest performing teachers rewarded in your school?

NO REWARD NORMALLY GIVEN.....01
GIVEN GOOD EVALUATION.....02
PROMOTION TO HIGHER POSITION.....03
HIGHER PAY.....04
GIVEN TIME FOR PROFESSIONAL MEETINGS OR SPECIALIZED TRAINING.....05
GIVEN MORE TIME OFF.....06
COMPENSATED BY COMMUNITY (CASH, GIFTS, SERVICES).....07
GIVEN CHOICE OF CLASSES TO TEACH.....08
OTHER REWARD.....09

MOST IMPORTANT

2ND MOST IMPORTANT

3RD MOST IMPORTANT

15. How are poorly performing teachers dealt with in your school?

NO ACTION NORMALLY TAKEN.....1
DISMISSED OR DEMOTED TO LESSER POSITION.....2
GIVEN POOR EVALUATION.....3
PAY REDUCTION4
LESS TIME FOR PROFESSIONAL MEETINGS OR SPECIALIZED TRAINING/LESS TIME OFF.....5
GIVEN LESS CHOICE OF CLASSES TO TEACH.....6
OTHER (SPECIFY) _____

MOST IMPORTANT

2ND MOST IMPORTANT

3RD MOST IMPORTANT

SECTION 2 : SCHOOL AND PUPIL CHARACTERISTICS

16. On average, how often is each permanent teacher in this school given a formal evaluation?

ONCE OR MORE PER SCHOOL YEAR.....1
 EVERY TWO YEARS.....2
 EVERY 5 YEARS.....3
 LESS THAN EVERY 5 YEARS/ NEVER.....4

17. Is there a parent-teachers association for this school?

YES...1
 NO...2>>19

18. How often during the school year does the parents-teachers' association meet with the principal or the teachers?

UNIT
 WEEK.....1
 MONTH.....2
 SEMESTER.....3
 YEAR.....4

IF LESS THAN ONCE A YEAR OR
 NEVER, PUT '00' FOR NUMBER
 AND '4' FOR UNIT

NUMBER
 OF TIMES

 TIME

19. Is it easy to get parents of students involved in parents-teachers' association or other school related activities?

YES....1
 NO....2

NATIONAL EXAMINATIONS

ASK QUESTIONS 20-25 AS APPROPRIATE TO THE SCHOOL

Make sure the dates for the last completed school year below are appropriate for the survey. In fact there may be different dates depending on when the survey is done in a community

20. IF SCHOOL HAS PRIMARY LEVEL: How many students in STANDARD 7 took the primary school leaving examinations at the end of the last school year (that is, 2008-2009)?

IF NUMBER =0 >> 22

NO. OF
 STUDENTS

21. How many passed the examination?

NO. OF
 STUDENTS

22. IF SCHOOL HAS JUNIOR SECONDARY LEVEL: How many students in FORM 3 took the Junior Certificate Exam at the end of the last school year (that is, 2008-2009)?

IF NUMBER =0 >> 24

NO. OF
 STUDENTS

SECTION 2 : SCHOOL AND PUPIL CHARACTERISTICS

23. How many passed the examination?

NO. OF
STUDENTS

24. IF SCHOOL HAS SENIOR SECONDARY LEVEL: How many students in FORM 5/6 took the BGSCE exam at the end of the last school year (that is, 2008-2009)?

NO. OF
STUDENTS

IF NUMBER =0 >> 26

25. How many passed the examination?

NO. OF
STUDENTS

26. For this school year, were all students who wanted to enroll in this school admitted?

YES.....1
NO.....2 (>>NEXT SESSION)

27. What are the most important criteria for deciding whether a child is admitted to the school? UP
TO TWO RESPONSES

ABILITY/SCORE ON ENTRANCE EXAM.....1
AGE OF THE CHILD.....2
ABILITY OF PARENTS TO PAY FEES.....3
ZONE OF RESIDENCE OF CHILD.....4
PLACE ON WAITING LIST.....5
RELIGION.....6
OTHER (SPECIFY) _____

SECTION 5: COSTS OF ENROLLMENT

1. IF THE SCHOOL HAS A PRIMARY CYCLE, ASK THE FOLLOWING QUESTIONS
IF NOT, » 2

I'd like to ask you about the costs of schooling for students in your school, focusing specifically on students in standard 4.

Over the course of a school year, how much does a student in Standard 4 have to pay for the following. I am only interested in obligatory costs, not expenses that are at the discretion of the family.

1.1. ENROLLMENT FEES/TUITION (AT START OF THE SCHOOL YEAR)

1.2. MONTHLY OR OTHER REGULAR FEES DURING THE YEAR

1.3. INSURANCE

1.4. CONTRIBUTIONS TO PARENTS' ASSOCIATION

1.5. PURCHASE OF RENTAL OF BOOKS

1.6. UNIFORMS

1.7. OTHER COSTS (OTHER LEARNING MATERIALS, FEES TO TAKE EXAMS, ETC.)

2. IF THE SCHOOL HAS A JUNIOR SECONDARY CYCLE, ASK THE FOLLOWING QUESTIONS
IF NOT, » 3

I'd like to ask you about the costs of schooling for students in your school, focussing specifically on students in form 2.

Over the course of a school year, how much does a student in Form 2 have to pay for the following. I am only interested in obligatory costs, not expenses that are at the discretion of the family.

2.1. ENROLLMENT FEES/TUITION (AT START OF THE SCHOOL YEAR)

2.2. MONTHLY OR OTHER REGULAR FEES DURING THE YEAR

2.3. INSURANCE

2.4. CONTRIBUTIONS TO PARENTS' ASSOCIATION

2.5. PURCHASE OF RENTAL OF BOOKS

2.6. UNIFORMS

2.7. OTHER COSTS (OTHER LEARNING MATERIALS, FEES TO TAKE EXAMS, ETC.)

SECTION 5: COSTS OF ENROLLMENT

3. IF THE SCHOOL HAS A SENIOR SECONDARY CYCLE, ASK THE FOLLOWING QUESTIONS
IF NOT » 4

I'd like to ask you about the costs of schooling for students in your school, focusing specifically on students in Form 4 or 5.

Over the course of a school year, how much does a student in Form 4 or 5 have to pay for the following. I am only interesting in obligatory costs, not expenses that are at the discretion of the family.

3.1. ENROLLMENT FEES/TUITION (AT START OF THE SCHOOL YEAR)

3.2. MONTHLY OR OTHER REGULAR FEES DURING THE YEAR

3.3. INSURANCE

3.4. CONTRIBUTIONS TO PARENTS' ASSOCIATION

3.5. PURCHASE OF RENTAL OF BOOKS

3.6. UNIFORMS

3.7. OTHER COSTS (OTHER LEARNING MATERIALS, FEES TO TAKE EXAMS, ETC.)

4. Are there some students in your school who you allow to pay less than the usual enrollment fees and other obligatory expenses? I am referring here to tuition waivers or scholarships provided by the school directly, not by the government.

YES... 1
NO.....2>>6

5. How many students in this school pay less than the usual amount or receive scholarships from the school?

NUMBER
OF STUDENTS

6. Are there some students in your school who receive the Needy Student Package?

END OF SECTION B

Section C: Housing, Household Possessions and Cattle Ownership

This section asks a few general questions about your dwelling, household possessions and cattle ownership

Circle and Enter the appropriate answer

1. HOUSING

How was this housing unit acquired?

01 Purchased (owner occupied)

02 Rent: BHC

03 Rent: Government

04 Rent: Council

05 Rent: Individual

06 Rent: Company

07 Rent: VDC

08 Free (Inc. job related)

09 Inherited (owner occupied)

10 Self built (owner occupied)

2. NUMBER OF ROOMS

How many rooms are there in this housing unit? Exclude kitchen, garage, toilet, bathroom and store if they are not used as living rooms. Include all structures occupied by you and your household.

3. WATER SUPPLY

Circle one number

Which of these is your main source of water supply for your household?

01 Piped indoors

02 Piped outdoors

03 Communal tap

04 Bouser/tanker

05 Well

06 Borehole

07 River/Stream

08 Dam/Pan

09 Rain water tank

10 Spring Water

Other (specify)

4. TOILET FACILITY

Circle one number

What type of toilet facility is used by this household?

Own

01 Flush toilet

02 Ventilated improved

Pit latrine (VIP)

03 Pit latrine

Communal

04 Flush toilet

05 VIP

06 Pit latrine

07 Neighbours toilet

08 None

5. FUEL FOR COOKING, LIGHTING AND HEATING

Circle one number in each column:

What are the principal fuels used by your household for cooking, lighting and heating?

1 Electricity

2 Solar Power

3 Gas (LPG)

4 Bio Gas

5 Wood

6 Paraffin

7 Candle

8 Paraffin/Candle

9 Cow-dung

10 Coal

11 Charcoal

12 Crop Waste

19 None

Other (specify)

	Cooking	Lighting	Heating
01	01	01	01

Heating

6. ELECTRICITY

6.1 Are you aware of the relaxed payment terms (Rural Electricity Collective Scheme) for electricity connection?

Yes.....1

No.....2

6.2 .Is your household connected to the BPC grid?

Yes.....1

No.....2>> 6.4

6.3 .Which payment term did you use?

18 Months.....1

60 Months.....2

180 Months.....3

One-Off Payments.....4

6.4 .If you were to connect your household to the BPC electricity Grid, how much are you willing to pay (electricity connection)

PULA THEBE

7. HOUSEHOLD POSSESSIONS

Record the number of each item and their value

If you sold this item/these items today, what would you be able to get for them?

Does any member of this household own any of these? (they need to be in a working condition and be in this household).	1 Van/bakkie/truck
	2 Car
	3 Tractor
	4 Donkey cart
	5 Bicycle
	6 Motor cycle
	7 Wheel Barrow
Sale value should refer to total for items in a category (e.g., all bicycles)	8 Sewing Machine
	9 Radio/cassette/CD player
	10 Video Cassette Recorder
	11 Grinding machine
	12 Television
	13 Refrigerator/freezer
	14 Washing machine
	15 Air conditioner
	16 Electric/gas cooker
	17 Stereo/hi-fi system
	18 Personal computer/laptop
	19 Telephone
	20 Cellular phone
	21 Micro wave cooker

[illegible]

8. LIVESTOCK OWNERSHIP

In total how many livestock are owned by the usual member of your household? Tick in the appropriate which ever answer applies. For example if you own eight cattle, your answer is in the range 1-9 and you would tick box 1-9 range under cattle.

Include livestock owned by people who normally live with you, but are temporarily not listed in the household questionnaire.

Do not include livestock owned by people who are only temporary members of your household.

Include all types of cattle, bulls, oxen, cows, tollies,
etc. Also include livestock that are **mafisa** out, provided
they are owned by you or other usual members of household
Do not include livestock that your household is looking
after for someone else.

End of Section C

Section D : Household Enterprises

This section asks for information about household businesses or enterprises.

During the past 12 months has any member of this household been engaged in any of the following?

- | | | |
|---|--|---------------------------------------|
| 01 selling cattle/ goats/sheep | 12 making craftwork : baskets/ wooden utensils | 23 plumbing |
| 02 selling poultry | 13 making/selling clothes | 24 electrification |
| 03 selling milk/ madila/ eggs | 14 cooking and/or selling food | 25 property rentals |
| 04 selling maize/ millet/ sorghum | 15 street vendor (retailing) | 26 shoe repair |
| 05 selling fruit/ vegetables | 16 general dealers | 27 taxi/ combi service |
| 06 catching/selling fish | 17 hawkers | (for moving people or goods) |
| 07 gathering/selling thatch/ poles/ reeds | 18 haircutting/ hair dressing | 28 Sale of second hand clothes |
| 08 gathering/selling firewood | 19 making/selling furniture | 29 Phone shops |
| 09 gathering/selling phane | 20 blacksmithing/ tinsmithing | 30 selling Health products e.g Golden |
| 10 selling/processing of animal products | 21 vehicle repair/ panelbeating | products/Go for Health |
| 11 brewing/selling beer/ chibuku | 22 traditional/ spiritual healers | |

A household business or enterprise exists if any member of the household is:

- a) self employed
or b) works informally with a few other family members and/or a few (less than 5) paid staff.
c) the business is not registered with registrar of companies or professional association

These activities may be full/ part-time or they may be in addition to any full-time work in which you are involved as an employee.

If the particular business is not listed, describe the type of business in words - in answer to Q1 - but leave the code box empty.

	Business Number	Business Number	Business Number
	1	2	3
Q1. Description of Enterprise (Describe the exact activity using at least two words) Enter the appropriate code from the list above (or leave blank if the type of business is not listed)			
Q2 Is the business/enterprise registered with Registrar of Companies or any other professional association? Yes = 1 No = 2			
Q3 Does the business enterprise keep any formal accounts? Yes = 1 No = 2			
Q4 Is this business/enterprise located 1 - In a permanent building 2 - On a footpath, street or open space 3 - At a market 4 - In the owner's or someone's home 5 - No fixed location Other (specify)			
Q5 Which household member is the main entrepreneur in this business? Give serial number from the Household questionnaire. If main entrepreneur is currently not a member of this household, enter code 99.			
Q6 Sex of main entrepreneur, Male = 1; Female = 2			
Q7 What are the serial numbers of any household members who have helped in the business during the past month? (Use serial numbers assigned in the Household questionnaire)	1 2 3	1 2 3	1 2 3
	1	2	3

(continued)

Section D : Household Enterprises (Continued)

		Business Number	1	Business Number	2	Business Number	3				
Q8	What is the kind of ownership of this business? 1 - sole ownership/self employed 2 - owned jointly by members of this household only 3 - partnership 4 - co-operative other (specify)		<input type="checkbox"/>		<input type="checkbox"/>		<input type="checkbox"/>				
Q9	When did this business start? State month in numbers, i.e. Jan=01; Feb=02; Mar=03;...Dec=12; and record the year in full, e.g. record '1999' and '2001	month year	<input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/>

TOTAL EXPENDITURE		1	2	3
Q13 BUSINESS INCOME	What is the approximate total value of sales and/or other income from this business in in an average month?			
Q14	What is the total value of sales/income from this business/ enterprise in the past 12 months			

ENUMERATOR CHECK

Total Income less Expenditure for an average month will usually not be in the negative.

Note that even if you have recorded details of an average month's business income and expenditure in the section on Household Enterprises, you must still record details in Book 2 of the actual day-to-day enterprise receipts and expenses during the whole of the survey month.

End of section D

Section E: Agricultural Income and Expenditure During the Past 12 Months

Circle and Enter the appropriate answer

E1. Crops, Vegetables and Fruits

During the past 12 months, has any member of this household grown any of the following? Circle accordingly (please note that these should be grown in Botswana).

Crops? Yes = 1; No = 2
Vegetables? Yes = 1; No = 2
Fruits? Yes = 1; No = 2

If YES to any, please provide the following information on any crops, vegetables or fruit that you have sold or kept for household consumption. Record amounts to the nearest Pula.

Type of Crop/ Vegetable /Fruit	
Millet	
Maize	
Sorghum	
Beans/Pulses	
Water melons	
Pumpkin/Butter nuts	
Sweetreeds	
Groundnuts	
Sunflower	
Other	
(please Specify)	

SALES	
Approximate amount received from sales during past year (Pula)	Office use only Code

OWN PRODUCE CONSUMED	
Approximate value of own produce consumed during year (Pula)	Office use only Code

E2. Livestock

Have you or any member of your household OWNED any of the following either here or elsewhere in Botswana during the past 12 months?

Yes = 1
No = 2>> E3

If YES indicate (tick) which of the following you owned.

cattle

goats

sheep

pigs

poultry

donkeys/mules/horses

--

Other (specify) _____

If any of the above livestock types have been ticked, please provide the following information on livestock you have sold or consumed during the past 12 months. Record amounts to the nearest Pula.

Type of livestock	
Live cattle	
Slaughtered cattle	
Dead cattle (excl. slaught.	
Goats	
Sheep	
Donkeys, Mules, Horses	
Pigs	
Poultry (Poultry farm)	
Other	
(please Specify)	

SALES	
Approximate amount received from sales during past year (Pula)	Office use only Code

OWN PRODUCE CONSUMED	
Approximate value of own produce consumed during year (Pula)	Office use only Code

Section E: Agricultural Income and Expenditure During the Past 12 Months

E3. Other Major Agricultural Income During the Past 12 Months

Please also give details of all other agricultural income during the past 12 months
e.g. income from ploughing for other farmers

Sources of Income	Total received (cash and In-kind) during past year) Pula	Office use only Code

E4. Major Expenditure on Agriculture During the Past 12 Months

What major expenditure on agriculture have you had during the past 12 months?
Record the amounts to the nearest Pula.

	Total Expenditure (Pula)	Office use only Code
Construction and repair costs		
Business taxes		
Purchase of livestock for re-sale		
Rates payable on property you own		
Capital purchase of transport, equipment etc.		
Other		
(Please Specify)		

Agric Income & Expenditure

Section F: Employment Earnings and Deductions during the Past 30 days

For those persons coded 01, 02 or 03 under Section A column 20, please enter here itemised details of their total earnings and deductions from all the work they did in the past 30 days.

Record amounts in Pula and thebe. For example, total earnings of P647-25 should be recorded as:

0	0	0	6	4	7	2	5
---	---	---	---	---	---	---	---

Use one column to record each person's earnings and at the top of each column enter that person's serial number from Section A.

Note that only the first two columns have sufficient space to record amounts in excess of P9,999.99

Persons whose income is paid wholly or partially outside Botswana need not give details of such payments. However, details of money transferred into Botswana should be recorded in **Section I**.

147 | BOTSWANA CORE WELFARE INDICATORS SURVEY 2009/10

Section G: Major Expenditure In Past 12 months

During the past 12 months what major expenditure have you (or other members of your household) incurred?

Include also purchases made more than a year ago but where repayments of instalments are still being made.

Remember you should include the purchase of second-hand goods as well as new goods.

Only personal and household expenditure to be included. Expenditure in connection with a business trip, which is paid for or refunded by an employer must not be included.

Record all expenditures to the nearest Pula.

Category	Item	EITHER State total purchase price (if bought outright) (Pula)	OR if paying monthly instalments			OFFICE USE ONLY	
			Initial deposit if purchased during past 12 months (Pula)	Monthly payment (Pula)	For how many of the past 12 months have instalments been paid?	Amount to enter (Pula)	Code

	sports / recreational club subscriptions						
	local authority rates (property owners only)						
	licences for sport, hobbies						
	membership fees for professional associations						
	other (specify) =>						
End of Section H							

Section I: Miscellaneous

Transfer of Cash / Goods from relatives or friends

One very important source of income for many households is "remittances". This is when friends or relatives (who are not, at present, members of your household) send you money by post or give you cash. Not only might you get money from remittances; you might also be given goods / presents by friends or relatives when they visit you. Even if they are related to you, you must still think of the cash and goods received from them as being transfers into your household.

Please estimate the total cash and goods received from friends and relatives during the past three months, six months seven months, ten months or whatever period you find easiest to remember

		Amount (to nearest Pula)	Over how many months were these amounts received	OFFICE USE ONLY	
				Amount to be entered	Code
Cash transfers/gifts from:	urban Botswana				
	rural Botswana				
	outside Botswana				
Value of goods received from:	urban Botswana				
	rural Botswana				
	outside Botswana				

Benefits in kind

Please tick whichever of the following are provided free (or are paid for) by your employer - or for which you pay only a nominal amount.

	Tick if provided	Approximate monthly payments by you (if any) (Pula)	Total value of benefits (if known) (Pula)	OFFICE USE ONLY	
				Net benefit to household (Pula)	Code
accommodation					
car or other vehicle					
a second car or other vehicle					
fuel for car					
Services of	security guard				
	maid				
	gardener				
swimming pool					
water					
electricity					
medical aid subscription					
school fees					
Leave concession					

Use of money outside Botswana

If you have money outside Botswana please record details below of:

- Any money your household transferred into Botswana last month
(e.g. to supplement local income, pay for school fees etc)
- Any of your money outside Botswana that, during the past month, has been used to pay for goods and services purchased outside Botswana - provided these goods and services have been for the benefit of your household in Botswana.
e.g. use of foreign money (incl credit cards) used on shopping trips or holidays in neighbouring countries.

HOUSEHOLD QUESTIONNAIRE

BOOK 2: Daily Record of Expenditure, Receipts, Own Produce Consumed And Business Transactions

Collected under Statistics Act (Chap. 17:01)

GENERAL INFORMATION

IDENTIFICATION					
STRATUM NUMBER					
DISTRICT NAME /CODE					
VILLAGE NAME/CODE					
LOCALITY NAME/CODE					
EA NUMBER					
EA SERIAL NUMBER					
DWELLING NUMBER					
HOUSEHOLD NUMBER					

This book is for keeping a daily record, for one complete month of:

**Household expenditure and other disbursement; Household income and other receipts;
Business receipts and expenses; Goods or services given or received in kind.**

In addition a daily record is also to be kept, **but for one week only** of:

Own produce consumed (or used) by the household.

The data can be collected in one of the two ways:

1. The enumerator can visit the household each day and ask for the information which he records in this note book, OR
2. The household can themselves record the necessary information on to "supplementary" sheets, then the enumerator will call every few days to check on progress and to transfer the data to this notebook.

The number boxes that follow are provided as a check- list for the enumerator's use

1		6		11		16		21		26		31

Schedule D-2b: Other Household Cash Receipts	
Please record the household receipts. These include the following:	
Pension receipts	Interest accrued
Dividends accrued	

Pension receipts	Interest accrued
Dividends accrued	

[illegible]

[illegible]

Schedule D-3c: Goods and Services Given: Record all goods and services given by your household to others as gifts, wages in kind, barter, etc.

[illegible]

Record all business income as and when it is received during the survey month.
These may or not be listed below.
You should record all business income whether or not it is referred to in the following list.
For each business receipt, record the actual source (e.g. sale of poultry) and record the date and the amount received.

Sale of crops	Sale of clothes you have made	Carpentry/painting/building
Sale of cattle	Sale of home made beer	Traditional doctor
Sale of poultry	Sale of craftwork	Giving parties (motshelo)
Sale of other livestock	Sales from gathering, hunting, fishing	Ploughing
Sale of livestock products	Sales of other items	Renting of property
Sale of purchased goods	Receipt from provision of transport	

[illegible]

Schedule D-5: Business Expenditure

Business Expenditure

Record all business expenses as and when they are incurred during the survey month.

Most types of possible expenses are specified below and you should record the date and the amount . against the appropriate item.

If there is space for only one such transaction to be recorded, use the lower section to record additional transactions of that type.

For example, if the household purchases manure/fertiliser on two different occasions there is space for only one purchase to be recorded in this first section. Record the second (and other purchases) in the additional section below.

If a business expense is not specifically mentioned, record the details in the section below entitled "Other Business Expenses".

Type of business expense incurred	Date	Amount P - t	Type of business expense incurred	Date	Amount P - t
Rent for buildings, land etc			Insecticides, pesticides		
Electricity charges			Materials,tools bought for own work		
Water charges			Veterinary fees and requisites		
Construction and repair costs			Fuel (petrol,diesel,oil,paraffin etc) 1		
Tax,licenses,accountants/legal fees			ditto 2		
Wages/salaries paid (cash)			ditto 3		
Wages/salaries paid (in kind)			ditto 4		
Interest paid on business loans			Cost of goods bought for re-sale (specify)		
Repayment of business loans			1		
Purchase of transport and equipment			2		
Repair of vehicles & other equipment			3		
Value of seed from own produce			Cost of other raw materials (specify)		
Seed purchased			1		
Manure/fertiliser bought			2		
Value of manure from own produce			3		
Ploughing/grazing/irrigation charges			Cost of semi-finished goods (specify)		
Purchase of livestock for re-sale			1		
Fodder/cattle, poultry feed purchased			2		
Value of fodder/cattle, poultry feed (ex-own produce)			3		

Other Business Expenses

Use the grid below to record any business expenses not specified above and any items listed above for which there is sufficient space above to record all purchases.

Type of business expense incurred	Date	Amount P - t	Type of business expense incurred	Date	Amount P - t

Schedule D-6: Own Produce Consumed

Describe each item, e.g. vegetables (wild moretwa, morogo, magapu, mmidi), wood
