STATISTICS BOTSWANA

Preface

This report examines Botswana's monthly inflation rate performance as measured by the Consumer Price Index (CPI). The CPI serves as an essential gauge for tracking changes in the cost of living and reflects the dynamics of price fluctuations in the economy. In this report, Statistics Botswana examines both month-on-month and year-on-year changes in the CPI to offer insights into Botswana's inflationary trends.

Accurate and timely Price Statistics play a crucial role in influencing socio-economic and monetary policies. By providing policymakers with a clear understanding of inflationary pressures, price statistics support in the formulation of effective policy interventions. Recognising the paramount importance of this data, Statistics Botswana generates the Consumer Price Index on a monthly basis, aligning with the various informational needs of stakeholders.

In June 2024, Botswana recorded an annual inflation rate of 2.8 percent, registering a decrease of 0.2 of a percentage point from May's rate of 3.0 percent. This slight decline underscores the stability observed in Botswana's inflationary environment during the period under review.

Statistics Botswana extends sincere appreciation to all stakeholders who contributed invaluable insights and data for the compilation of this publication.

Section 1: Headline Inflation

In June 2024, Botswana registered an annual inflation rate of 2.8 percent, recording a decrease of 0.2 of a percentage point from the May 2024 rate of 3.0 percent. Miscellaneous Goods & Services accounted for the largest share, contributing 0.8 of a percentage point, followed by Transport and Food & Non-Alcoholic Beverages, each contributing 0.6 of a percentage point. [Refer to Table 1](#) and [Chart 5](#).

The Clothing & Footwear group index increased by 0.7 percent, rising from 122.0 in May 2024 to 122.8 in June 2024. Glossary

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Contributions: These are percentage points that add up to the overall inflation rate. The contribution of a **group** to overall annual inflation depends on its weight in the consumption basket and its own annual inflation rate.

Domestic Tradeables refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradeables represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradeables refers to the goods and services which a country cannot either export to or import from other countries.

All –Tradeables refers to the total of **Domestic** and **Imported Tradeables**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
