Preface

This statistical release contains the first quarter of 2026 Gross Domestic Product (GDP) estimates by economic activity and components of final demand, at current and constant prices.

Botswana's National Accounts are compiled according to the 2008 System of National Accounts (2008 SNA) framework. The accounts presented in this publication adhere to the enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund (IMF), which sets out standards for coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies, in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted; hence the variations may differ depending on the quarters.

The nominal Gross Domestic Product (GDP) for the first quarter of 2026 was P73,138.5 million, compared to P67,593.8 million recorded in the previous quarter. This represents a quarterly increase of 8.2 percent in nominal terms. During the quarter under review, Public Administration and Defence became the major contributor to GDP at 16.9 percent, followed by Mining & Quarrying at 14.4 percent.

Real GDP for the first quarter of 2026 increased by 3.5 percent compared to the 0.3 percent decline registered in the same quarter of the previous year.

Statistics Botswana acknowledges and appreciates the contribution of all stakeholders in the production of this report.

1. Quarterly Gross Domestic Product (QGDP)

Quarterly Gross Domestic Product estimates assist in the analysis of short-term movements in the economy, as opposed to the annual GDP, which provides an in-depth and comprehensive view of the changes in the economy. Quarterly National Accounts adopt the same concepts, definitions and structure as Annual National Accounts.

1.1 Revisions in this release

Revisions to the National Accounts are an integral component of the compilation process, as they facilitate the incorporation of more comprehensive and higher-quality data that may not have been available at the time of the initial release.

No revisions have been undertaken for the quarterly Gross Domestic Product (GDP) estimates published in March 2026. The estimates remain unchanged as no additional or updated source data had been received to warrant adjustments. Consequently, the previously published figures for all industries remain valid.

2.0 First quarter GDP

2.1 Key Findings

The GDP at constant 2016 prices for the first quarter of 2026 was P 51,259.5 million compared to the published P 46,947.3 million recorded in the fourth quarter of 2025 (See table 3).

The real Gross Domestic Product increased by 3.5 percent during the period under review, as opposed to a decrease of 0.3 percent in the same quarter of 2025. This was mainly attributed to an increase in the real value added Water & Electricity and Diamond Traders industries, by 87.4 and 60.5 percent respectively. The positive economic performance was further supported by growth in the Education industry, which expanded by 4.7 percent, while the Mining & Quarrying, Manufacturing, and Wholesale & Retail Trade industries each recorded real value added growth of 3.4 percent. Other industries recorded positive growths of more than 0.3 percent, except Agriculture, Forestry & Fishing and Construction which declined (refer to table 4).

FIGURE 1: Real GDP Growth Rates

On a quarter to quarter comparison the real GDP increased by 9.2 percent during the quarter under review.

Real GDP grew by 3.5 percent during the period under review despite contractions in Total Final Consumption and Gross Fixed Capital Formation. The decline in final consumption reflects weaker domestic demand, while the reduction in gross Fixed Capital Formation points to lower investment activity. The real GDP growth was primarily supported by strong performance in the Public Administration & Defence, Mining & Quarrying, Wholesale & Retail Trade, and Construction industries. The contributions of these industries to Real GDP growth are discussed below.

2.2 Real Non-Mining GDP

The Non-mining GDP increased by 2.7 percent in the first quarter of 2026 compared to the 2.3 percent increase registered in the same quarter of the previous year.

2.3 Contributions to GDP by Economic Activities

During the quarter under review, Public Administration & Defence became the major contributor to GDP at 16.9 percent, followed by Mining & Quarrying at 14.4 percent, Wholesale & Retail at 12.3 percent and Construction at 11.4 percent.

FIGURE 2.2: Contributions to GDP by Economic Activities (2026 Q1)

3.0 Percentage Changes in Value Added at Constant 2016 Prices

3.1 Agriculture, Forestry and Fishing

The Agriculture, Forestry and Fishing industry recorded a 3.4 percent decline in real value added during the first quarter of 2026, compared with a 3.0 percent decline in the corresponding quarter of 2025 (refer to table 4 and Figure 3.1).

The downturn was primarily driven by contractions in the Livestock Farming and Support Services to agriculture sub-industries, which declined by 9.0 percent and 2.5 percent, respectively. The drop in Livestock Farming was largely attributable to livestock movement restrictions due to Foot & Mouth Disease (FMD) and reduced beef exports to the European Markets during the review period. Notably, cattle sales to the Botswana Meat Commission (BMC) fell by 51.2 percent, attributed to the outbreak of FMD during the quarter.

FIGURE 3.1: Agriculture Real Value Added Growth Rates (2020 Q1 – 2026 Q1)

3.2 Mining and Quarrying

The Mining and Quarrying industry registered a 3.4 percent increase in real value added during the first quarter of 2026 (refer to table 4 and figure 3.2).

This increase was largely attributable to growth in Soda Ash, Diamonds, Coal and Copper real value added by 72.8, 3.1, 2.7 percent and 0.5 percent, respectively. Diamond production in carats increased by 4.8 percent in the first quarter of 2026.

Diamond carat production increased primarily due to higher processing volumes at the Orapa and Jwaneng mines, supported by an increase in recovered grade. Furthermore, the plants at Botash Mine were fully functional hence the increase in the production of Soda Ash.

The Manufacturing industry grew by 3.4 percent in the first quarter of 2026 compared to a contraction of 0.6 percent registered in the corresponding quarter of 2025 (see table 4 and figure 3.3).

The rise in the industry is attributed mainly to the increase in the sub-industries of Diamond cutting & polishing at 39.3 percent, Manufacture of bakery products at 3.2 percent, and Manufacture of wood and paper at 2.4 percent respectively.
