Preface

This statistical release contains the second quarter of 2024 Gross Domestic Product (GDP) estimates by economic activity and components of final demand, at current and constant prices.

Botswana’s National Accounts are compiled according to the 2008 System of National Accounts (2008 SNA) framework. The accounts presented in this publication adhere to the enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund (IMF), which sets out standards for coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalised or audited data from companies, in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted, hence the variations may differ depending on the quarters.

The nominal Gross Domestic Product for the second quarter of 2024 was P68, 576.3 million compared to P64, 544.1 million registered during the previous quarter. This represents a quarterly increase of 6.2 percent in nominal terms between the two periods. During the quarter under review, Public Administration and Defense became the major contributor to GDP by 17.4 percent, followed by Mining & Quarrying at 14.2 percent.

Real GDP for the second quarter of 2024 decreased by 0.5 percent compared to the 3.3 percent growth registered in the same quarter of the previous year.

1. Quarterly Gross Domestic Product (QGDP)

Quarterly Gross Domestic Product estimates assist in the analysis of short-term movements in the economy, as opposed to the annual GDP, which provides an in-depth and comprehensive view of the changes in the economy. Quarterly National Accounts adopt the same concepts, definitions and structure as Annual National Accounts.

1.1 Revisions in this release

Revisions in the National Accounts are always necessary because they allow for the incorporation of additional and improved data that were not available at the previous release date.

Revisions have been made to the quarterly Gross Domestic Product (GDP) estimates published in June 2024. The changes were due to the updated source data and affected the Agriculture, Forestry & Fishing industry.
