## **Preface**

International Merchandise Trade Statistics measure the flows of goods across national borders and can be used to spot emerging markets, gauge competition, and identify export and import opportunities. As a result, it plays a critical role in the global economy by keeping track of all exchanges of goods between trading partners. The transaction reflects the value and quantity of goods that add to (Imports) or subtract from (Exports), the stock of material resources of a country. Trade statistics continue to be one of the key indicators of economic performance and global competitiveness.

The monthly International Merchandise Trade Statistics are used extensively in the compilation of national accounts and balance of payments. Furthermore, these statistics are used by government institutions and other stakeholders for trade negotiations and other various purposes.

This publication outlines Botswana's monthly International Merchandise Trade Statistics (IMTS) for September 2023. The report provides summaries of the entire international trade in goods, as shown in Table 1.0. Tables 2.1 and 2.2 show trade by major commodity groupings for imports and exports, respectively, whereas Table 2.3 solely shows trade in diamonds. The direction of trade appears in Table 3.1A (imports) and Table 3.2A (total exports). Major trading partner countries by commodity groups, as a percentage of trade at region or country level, for September 2023 are presented in Table 3.1B for imports and Table 3.2B for exports. The top traded imports and exports commodities excluding diamonds for September 2023 are presented in Tables 4.1A & 4.2A respectively. This is to guide users on opportunities to produce commodities for import substitution or possible exportation.

Changes in data for the corresponding months in the current versus previous digests may be attributed to data from transactions that had deferred customs duty assessments. The data for such transactions would only be available at a later stage after customs duty assessments have been completed.

International trade statistics by mode of transport are collected for the active modes of transport (road, rail, air) with which goods are presumed to leave or enter the statistical territory of the country. Such data may be used to formulate transport policy, monitor international transport routes or assess the impact of international trade on the environment.

For more information, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana publications are available on the website at www.statsbots.org.bw and at the Statistics Botswana Information Resource Centre (Head Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to serve users of our products and services.

Dr Burton'S. Mguni Statistician General November 2023

## **Executive Summary**

This International Merchandise Trade Statistics (IMTS) monthly digest provides a summary of trade statistics on Botswana's total imports and exports of goods for September 2023.

Total imports in September 2023 were valued at P7, 724.7 million compared to the revised value of P7, 155.5 million registered in August 2023, recording an increase of 8.0 percent. The value of Botswana's merchandise exports in September 2023 was P3, 823.9 million, accounting to a 50.2 percent decline from the revised August 2023 value of P7, 679.6 million.

During September 2023, commodities that were imported mostly were fuel with 19.2 percent, followed by Food, Beverages & Tobacco with 17.0 percent. Diamonds and Machinery & Electrical Equipment followed with contributions of 15.3 percent and 14.5 percent, to total imports respectively. Diamonds, Copper and Machinery & Electrical Equipment were the top export commodity groups with contribution of 62.8 percent, 18.7 percent and 6.7 percent to total exports in that order.

The Southern African Customs Union (SACU) was the top supplier at 79.9 percent. Asia and the European Union (EU) accounted for 7.2 percent and 6.0 percent of total imports respectively. South Africa supplied imports worth 65.9 percent while Namibia accounted for 13.3 percent (Table 3.1A).

Exports destined to Asia, SACU, and the EU represented 54.1 percent, 20.9 percent and 12.1 percent of the total exports, respectively during the month under review. The United Arab Emirates (UAE), South Africa, Belgium and China received exports accounting for 23.6 percent, 20.1 percent, 12.1 percent and 11.3 percent of the monthly total exports, respectively (Table 3.2A).

Goods transported by Air accounted for 64.9 percent of total exports, while Road and Rail represented 34.6 percent and 0.5 percent, respectively, in September 2023. Imports representing 70.4 percent were transported into the country by Road. Transportation of imports by Air and Rail accounted for 16.4 percent and 13.2 percent respectively (Table B).

In September 2023, Merchandise worth P15, 360.1 million transited through the country to various destinations. Goods accounting for 41.5 percent of total goods in transit were routed through Martins Drift border post while Kazungula Bridge followed with 29.9 percent. (Table C1).

## 1.0 **Total Trade**

Total merchandise trade refers to imports, domestic exports, re-exports and trade balance. The discussions are based on September 2023, which is also referred to as the reference period, the period under review or the current month, throughout the digest.

### 1.1 Data Revision

The current monthly digest is based on preliminary figures as regards the reference period. Revisions in the monthly Trade statistics data are always necessary because they allow for the incorporation of the additional and improved data that were not available at the previous release date or when there are late customs duty assessments. Revisions are made on a monthly basis, when monthly data files are uploaded into the database, bringing additional information for previous months. In some instances, revisions are negligible while significant in others.

The arrival of additional data in September 2023 resulted in revisions to the transactions for July and August 2023. **Table A** shows revised data for the two months, comparing figures in the August 2023 Digest and the current. As shown in **Table A** below, both trade flows were revised significantly upwards for August 2023, that is; Imports by 2.3 percent (P160.4 million) and Total exports by 15.7 percent (P1,044.9 million). Revisions for July imports data were minimal as displayed in **Table A**.

Revisions have been made to the trade balance for August 2023, recording a surplus of P524.1 million compared to a deficit of P360.1 million registered in the previous publication. The positive increase was mainly due to the revision in Diamonds exports.

<sup>()</sup> denotes negative

## 1.2 **Imports**

Imports are valued at Cost, Insurance & Freight (CIF), the price includes the value of goods, insurance, and freight costs required for delivering the commodities to the destination, but excludes customs or any other duties paid on arrival at the border of the importing country. In September 2023, Botswana's total imports were valued P7, 724.7 million registering an increase of 8.0 percent (P569.2 million) from the revised August 2023 figure of P7, 155.5 million. The rise was mainly due to an increase in Diamonds imports by 112.1 percent (P625.1 million). Food, beverages & tobacco increased by 4.7 percent (P59.2 million) as displayed in Table 2.1.

## 1.3 **Total Exports**

During September 2023, Botswana's value of total exports dropped by 50.2 percent (P3, 855 .7 million), from the revised August figure of P7, 679.6 million to P3, 823.9 million. The major contributor to the decrease in total exports was Diamonds that went down by 61.2 percent (P3, 789.7 million) from a revised August 2023 value of P6, 192.6 million to P2, 402.9 million in the current month, as displayed in **Table 2.2**.

## 1.4 **Trade Balance**

Botswana recorded a trade deficit of P3, 900 .8 million in September 2023. **Chart 1.0** displays the graphical presentation of the trade balance from January 2021 to September 2023.

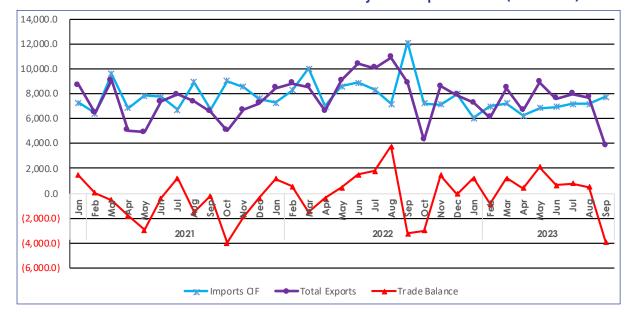

Chart 1.0: Total International Merchandise Trade – January 2021 to September 2023 (Million Pula)

#### 2.0 **Trade by Principal Commodity Groups**

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters or commodities, for example 'Vehicles & Transport Equipment' combines vehicles and other equipment used for transport purposes.

In cases where it becomes a challenge to come up with further groups of related chapters or commodities, the remaining commodities are grouped together under the general category called 'Other'. This occurs when a commodity group's contribution to the total is minimal.

#### **Principal Imports** 2.1

Botswana received imports valued at P7, 724.7 million in September 2023. The top imported groups were Fuel; Food, Beverages & Tobacco, Diamonds and Machinery & Electrical Equipment. Fuel imports contributed 19.2 percent (P1, 481.3 million) to total imports, while Food, Beverages & Tobacco and Diamonds imports accounted for 17.0 percent (P1, 315.0 million) and 15.3 percent (P1,182.6 million) respectively. Machinery & Electrical Equipment contributed 14.5 percent (P1, 121.0 million) to total imports. Contributions made by other commodity groups can be viewed in Table 2.1 and Chart 2.1.

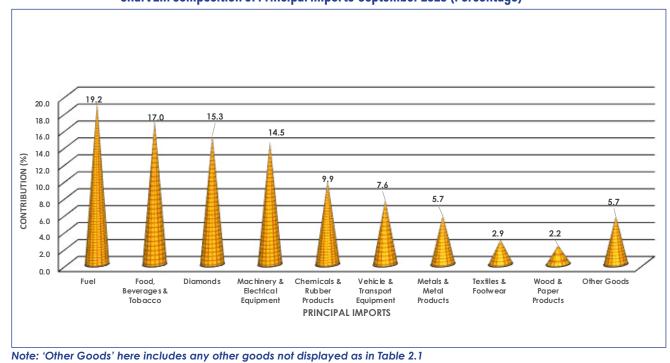

Chart 2.1: Composition of Principal Imports-September 2023 (Percentage)

## 2.2 **Principal Exports**

In September 2023, Botswana exported merchandise valued at P3, 823.9 million. Diamonds was the leading export commodity group with a contribution of 62.8 percent (P2, 402.9 million), followed by Copper and Machinery & Electrical Equipment at 18.7 percent (P716.8 million) and 6.7 percent (P257.7 million) respectively. Contributions made by other commodity groups are presented in **Table 2.2** and **Chart 2.2**.

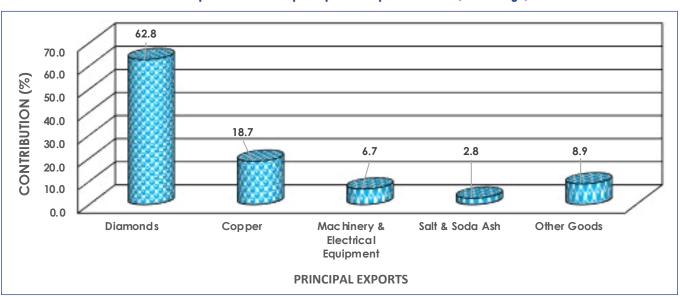

Chart 2.2 Composition of Principal Exports - September 2023 (Percentage)

Note: 'Other Goods' here includes any other goods not displayed as in Table 2.2

#### **Direction of Trade** 3.0

The direction of Trade analyses the value of merchandise trade disaggregated according to a country's primary trading partners. As a result the direction of trade discusses the last known destination for exports and sources of imports. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Trade by major partner countries, regions and principal commodity groups for imports and exports, during September 2023 appears in Table 3.1 A and Table 3.2A, respectively. Table 3.1B (imports) and Table 3.2B (exports) show percentage distributions for major sources and destinations by principal commodity groups during the same month.

#### **Imports by Major Trading Partner Countries and Regions** 3.1

In September 2023, Botswana imported goods worth P7, 724.7 million with the SACU region contributing 79.9 percent (P6, 169.5 million) to the total. The top most imported commodity groups from the customs union were; Fuel; Food, Beverages & Tobacco and Diamonds with contributions of 21.5 percent (P1, 328.7 million), 20.2 percent (P1, 248.3 million) and 15.3 percent (P943.0 million), respectively. Machinery & Electrical equipment and Chemicals & Rubber Products accounted for 10.4 percent (P644.4 million) and 9.3 percent (P574.8 million), of total imports from the union. Among the SACU member states, South Africa contributed largest at 65.9 percent (P5, 089.4 million) of total imports. Namibia followed with 13.3 percent (P1, 030.0 million) of total imports.

In September 2023, Botswana imported goods worth P559.2 million from Asia, representing a 7.2 percent of total imports. The major commodity groups imported were Machinery & Electrical Equipment and Vehicles & Transport Equipment with contributions of 31.5 percent (P175.9 million) and 22.4 percent (P125.5 million) of total imports from the block, respectively. Imports from China and Japan contributed 3.1 percent (P240.6 million) and 1.4 percent (P111.4 million) of total imports respectively.

The EU supplied Botswana with imports worth P460.1 million translating to 6.0 percent of total imports. Diamonds and Machinery & Electrical Equipment, were the major commodity groups imported from the EU at 35.6 percent (P163.8 million) and 34.5 percent (P158.9 million) of total imports respectively. Belgium was the major supplier accounting for 2.2 percent (P172.2 million).

The United States of America (USA) supplied imports valued at P163.3 million (2.1 percent) of total imports during the month under review. Sources of imports during September 2023 can be viewed in Table 3.1 A and Chart 3.1.

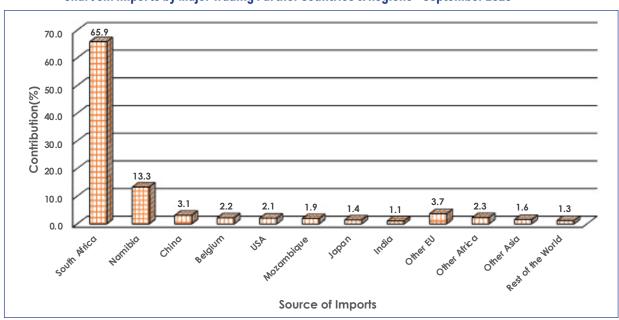

Chart 3.1: Imports by Major Trading Partner Countries & Regions - September 2023

'Rest of the World' includes all other Countries or Regions not specified as in Table 3.1A "Other..." includes all countries in the regional block except those displayed on the chart

## 3.2 Exports by Major Trading Partner Countries and Regions

During the current period, Botswana exported merchandise valued at P3, 823.9 million. The top exports of Botswana are Diamonds with contribution of 62.8 percent (P2, 402.2 million), Copper at 18.7 percent (P716.8 million) and Machinery & Electrical Equipment at 6.7 percent (P257.7 million), exported mostly to Asia, Europe and the **SACU** region.

Asia was the leading export market for Botswana, having received 54.1 percent (P2, 070.3 million) of total exports. Top exports destination countries within Asia were the **UAE**, China and India at 23.6 percent (P901.4 million), 11.3 percent (P432.2 million) and 9.5 percent (P364.0 million) of total exports, respectively. Diamonds and Copper were the major commodity groups exported to Asia, at 78.9 percent (P1, 633.4 million) and 20.5 percent (P424.4 million) respectively, as shown in **Table 3.2A** and **Table 3.2B**.

During the month under review, exports destined to the **SACU** region amounted to 20.9 percent (P798.3 million) of total exports. Diamonds and Machinery & Electrical Equipment were the major commodity groups exported to the customs union, accounting for 31.7 percent (P252.9 million) and 27.9 percent (P222.8 million) of total exports to the regional block respectively. South Africa was the main recipient of exports within **SACU**, at 20.1 percent (P766.7 million) **Table 3.2A**.

The **EU** received exports amounting to P461.9 million, accounting for 12.1 percent of total exports in September 2023. Belgium received almost all the exports destined for the union, at 12.1 percent (P461.3 million) of total exports. Diamonds was the main commodity group exported to the **EU** at 99.9 percent (P461.3 million), as displayed in **Table 3.2A** and **Table 3.2B**.

In September 2023, Australia received exports worth P258.1 million, representing 6.7 percent of Botswana's total exports. The major commodity group exported to Australia was copper at 99.7 percent (P257.3 million) of exports. Contributions made by other commodity groups are presented in **Table 3.2A** and **Table 3.2B**.

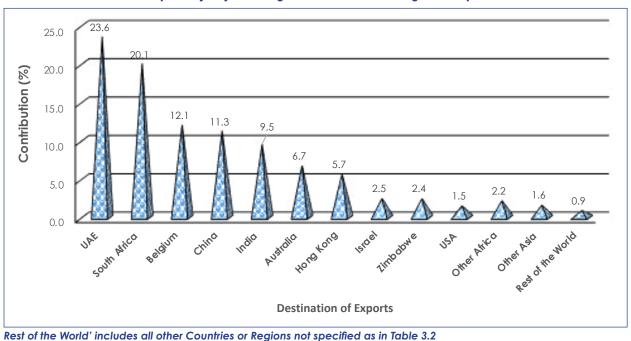

Chart 3.2: Exports by Major Trading Partner Countries & Regions - September 2023

"Other..." includes all countries in the regional block except those displayed on the chart

#### Imports and Exports by Top imported and Exported Commodities 4.0

The top traded commodities for both flows are presented in Table 4.1A for imports and Table 4.1B for exports for September 2023. This is intended to present the most traded goods (excluding Diamonds) with a view to guiding users on opportunities to produce commodities for import substitution, possible exportation and economic diversification.

#### 5.0 Imports and Exports by Mode of Transport

For purposes of the compilation of International Merchandise Trade Statistics, the mode of transport refers to the method used for the mobility of goods in and out of the country. These statistics are collected to be used as guidance in formulating transport policy and monitoring international transport routes or assess the impact of international trade on the environment, as transport is critical for trade facilitation. Active modes of transport mainly used in Botswana for movement of international merchandise trade are Air, Road and Rail. Table B presents statistics relating to modes of transport while Chart B gives the graphical illustration.

Imports representing 70.4 percent (P5, 435.2 million) of the monthly total were transported into the country by Road during the month under review. Imports transported by Air and Rail accounted for 16.4 percent (P1, 265.2 million) and 13.2 percent (P1, 022.4 million) respectively.

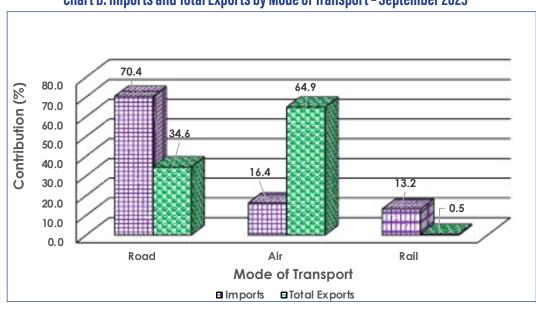

During the month under review, goods valued at P2, 480.3 million, representing 64.9 percent of total exports, were transported by Air. Goods exported by Road and Rail accounted for 34.6 percent (P1, 324.4 million) and 0.5 percent (P18.4 million) in that order.

Table B: Imports and Total Exports by Mode of Transport - September 2023 (Million Pula)

	lm	ports	Total Exports			
Flow Type	BW Pula	%	BW Pula	%		
Rail	1,022.4	13.2	18.4	0.5		
Road	5,435.2	70.4	1,324.4	34.6

<sup>&</sup>quot;Other Modes" includes Inland water ways and Postal service transport

Chart B: Imports and Total Exports by Mode of Transport - September 2023

## 6.0 **Transit Trade**

Transit trade refers to the movement of goods from one country to another through a third country, without the goods being subject to customs duties and other import restrictions in the intermediary country. Essentially, it involves the transportation of goods across a country that lies between the country of origin and the final destination.

The purpose of transit trade is to facilitate the flow of goods between two countries by using a route that may not be a direct path. This can be advantageous for various reasons, such as geographical considerations, political factors, or economic efficiencies. Transit trade is often regulated by international agreements and treaties to ensure smooth and efficient transit procedures.

Countries involved in transit trade typically have agreements and protocols in place to govern the movement of goods through their territory without the imposition of customs duties and other trade barriers. This helps to streamline the transportation of goods and reduce logistical challenges for businesses engaged in international trade.

It's worth noting that transit trade is subject to compliance with specific regulations and documentation requirements to ensure the proper monitoring and control of the movement of goods. Violations or misuse of transit trade arrangements can lead to penalties and legal consequences.

During September 2023, goods worth P15, 360.1 million transited through Botswana destined for various countries. Martins Drift border post and Kazungula Bridge handled goods accounting for 41.5 percent (P6, 368.3 million) and 29.9 percent (P4, 597.8 million) respectively as displayed in **Table C1** and **Chart C1**. The top most transiting goods were chapters 74 (Copper and articles thereof) at 23.9 percent (P3, 670.6 million), 99 (Commodities not specified according to kind) at 22.1 percent (P3, 400.0 million) and 28 (Inorganic chemicals, organic and inorganic compounds of precious metals of rare earth metals, of radio –active elements and isotopes) at 13.6 percent (P2, 081.8 million), as shown in **Table C2** and **Chart C2**.

Table C1: Transit Trade by Border Post - September 2023 (Million Pula)

Diamo	Diamonds Exports				62.8
Total E	xports		3,823.9		100.0

#### 8.0 **Concepts, Sources and Methods**

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana, and uses the General Trade system. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerised and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Imports are valued CIF (cost, insurance & freight), while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

#### 8.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

#### 8.2 **Concepts and Definitions**

- i. Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.
- ii. Re - Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.
- iii. Total exports: This is the sum of domestic exports and re-exports
- iv. Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.
- Trade Balance (Net Export): This refers to the total value of goods exported minus the total V. value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

## 8.3 Exclusions from IMTS

- i. Goods in Transit This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.
- ii. Goods temporarily admitted or dispatched These are goods that, at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working, etc.
- **iii. Monetary Gold** This is gold to which the monetary authorities have title and is held as reserve assets.
- iv. **Issued banknotes and securities and coins in circulation**-These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is, however, not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
