PREFACE

This statistical brief presents information on civil marriages that were registered in 2022. It provides valuable insights into the dynamics and trends of one of the most fundamental institutions in society.

The data used for analysis is obtained from the administrative data collected by The Department of Civil and National Registration (CNR) through the registration service of vital events. Currently, only marriages registered under common law are analysed in this brief. Religious and cultural marriages are not included, as they are not yet registered with the Department of Civil and National Registration.

This brief gives descriptive statistics, rates, demographics and other dynamics amongst marrying partners, as well as trends in marriages for the past 10 years.

Dr. L. Mokgathe
Acting Statistician General
July 2024

Marriage Statistics Brief 2022

1.0 Background

Marriage is an event that is regulated by statute (under the marriage Act 2001) and about which information is collected for legal and statistical purposes. Marriage is an institution recognized in Botswana where two people of different sexes are united. The union is normally solemnized at the district administration offices or at the church.

Marriage statistics are gathered through various methods, including vital registration systems, population censuses, household surveys, and administrative records. Vital registration systems record births, deaths, marriages, divorces, and other vital events, providing official data on vital events. Population censuses and household surveys often include questions about marital status, age at first marriage, and other demographic variables, offering comprehensive insights into marriage patterns.

This brief provides insights into the formation of family units. In most years changes in these statistics are minimal, highlighting gradual changes in the age at which people seek to marry for the first time, whether they would like to go through the normal process of publishing intent to marry or opt for a special license, whether they would like to marry in church or at the administration office.

The brief also provides information on demographic characteristics such as age, sex, usual residence, month of marriage and the marital status at time of marriage. Analyzing these demographic variables helps identify trends, seasonality of events, fertility, and family stability among others.

1.1. Marriage Processes

A couple desiring to marry will normally appear before the registration officer of any district together with their witnesses where the information to publish the Marriage Banns is submitted. Documents such as a National Identity Card (Oman) or passport for foreign nationals, a letter of consent from parents if under 18 years of age, a letter of confirmation from Kgosi that one is not married, or a letter of confirmation from a country of origin that one is not married, for foreign nationals. Decree absolute or death certificates are required as proof for remarrying parties.

A form for marriage banns is completed indicating, the names, ages, current marital status, occupation and residential addresses of the applicants. The form is signed by the parties before two witnesses whereby the notice would be sent to districts where both parties reside and their places of origin. The same notice is sent to the church if the applicant's intention is to marry at the church .

The public notice or banns are publicised for 3 weeks to allow those who might object to show up before solemnization. If after three weeks there is no objections raised, the marriage will be solemnised by the District Officer, under the Ministry of Local Government and Lands, or the marriage officer.

Parties desiring to marry by special licence appear before the administrative officer who shall satisfy himself that there are no legal impediments to the marriage of such parties. The licence is issued on payment of a fee amounting to P190.00 while the marriage after banns requires a P40.00 fee

1.2. Source and Coverage

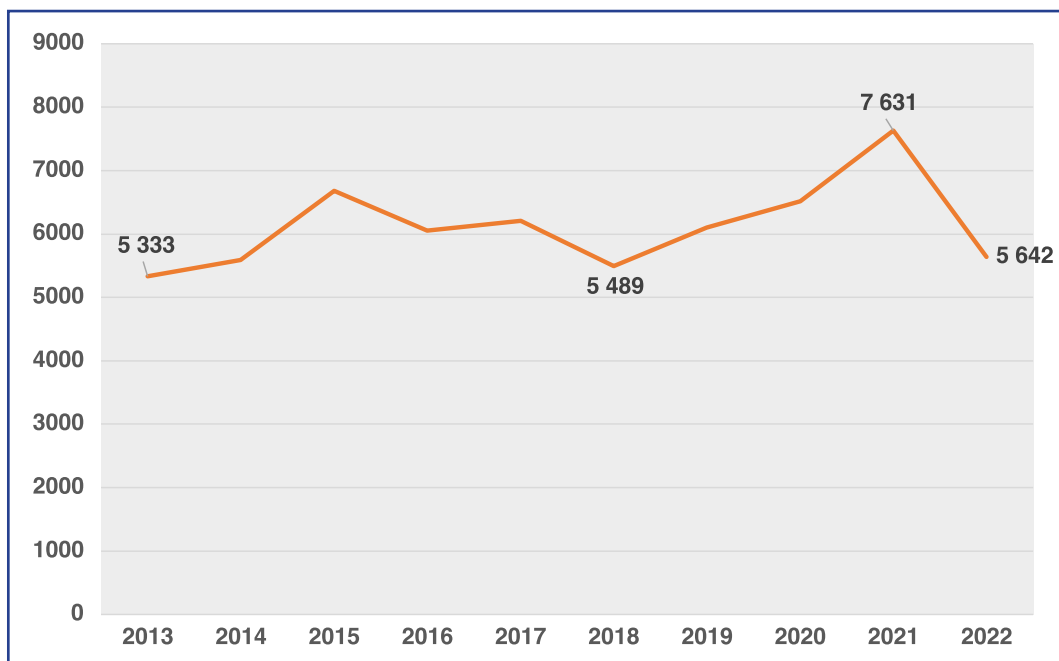

The Department of Civil and National Registration (CNR) is a custodian of all records of marriages solemnized in Botswana. The records should include all types of marriages namely, civil, religious, cultural and any other. Currently only marriages registered under common law (civil) appear on the records of CNR, and are analysed in this brief

2. Findings

2.1 Trends in Marriage (2013-2022)

The number of marriages increased from 5,333 in 2013 to 5,642 in 2022 (Figure 1). Nonetheless, there was a notable rise in the number of marriages, from 6,518 in 2020 to 7,631 in 2021. This sudden increase followed the easing of travel and gathering restrictions that had been put in place to stop the then-rampant spread of COVID-19. 2020 saw the suspension of most civil and national registration services, including marriage solemnization, as a result of the nation's lockdown and travel restrictions. Deferred marriage intentions that had already been published resulted in a backlog of marriages that were eventually formally sealed in 2021. Following the COVID-19 pandemic, marriages fell by 26.1% in 2022 compared to 2021. However, this decline is not a cause for alarm as things were beginning to return to normal.

Figure 1: Total Number Of Marriages Registered - 2013-2022

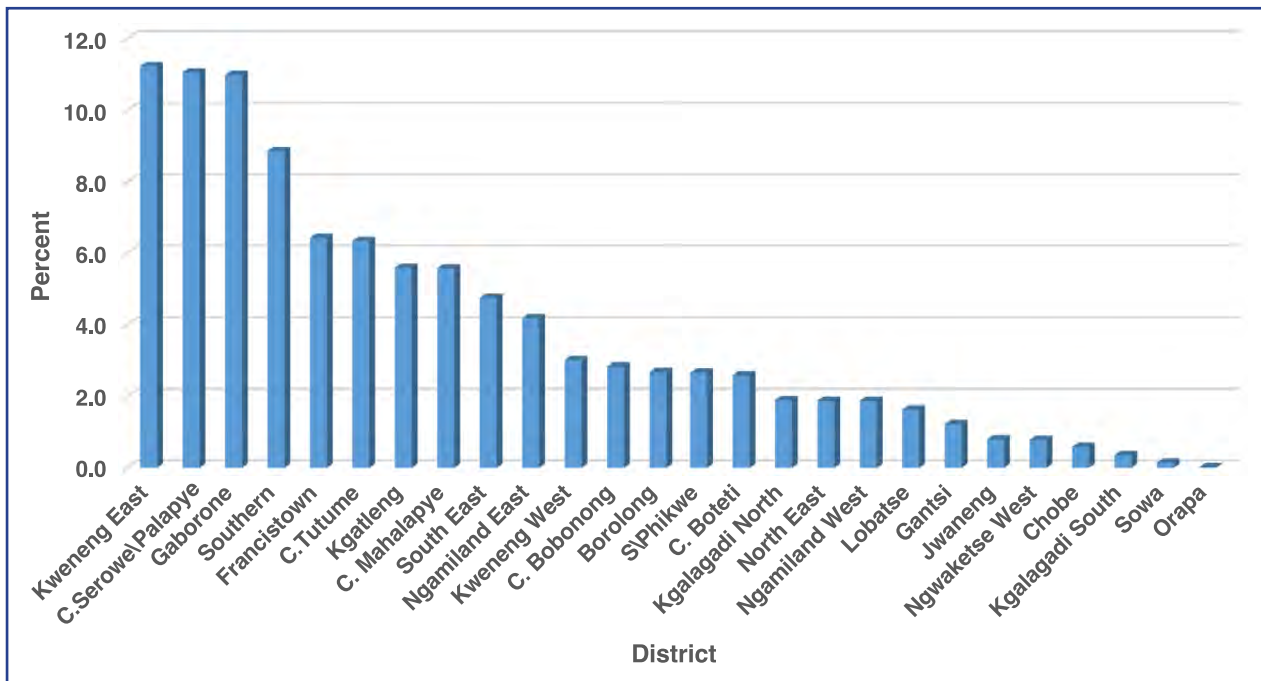

2.2 District of Registration

The district of registration is not necessarily the place of usual residence but can be any place chosen by the marrying couple. In most cases marriages are solemnized at the bride's place of origin or home village.

Kweneng East, Serowe\Palapye and Gaborone recorded the highest proportions of marriages with each recording around 11 percent of all marriages solemnized in 2022. This might be due to the fact that they are highly populated districts compared to the rest.

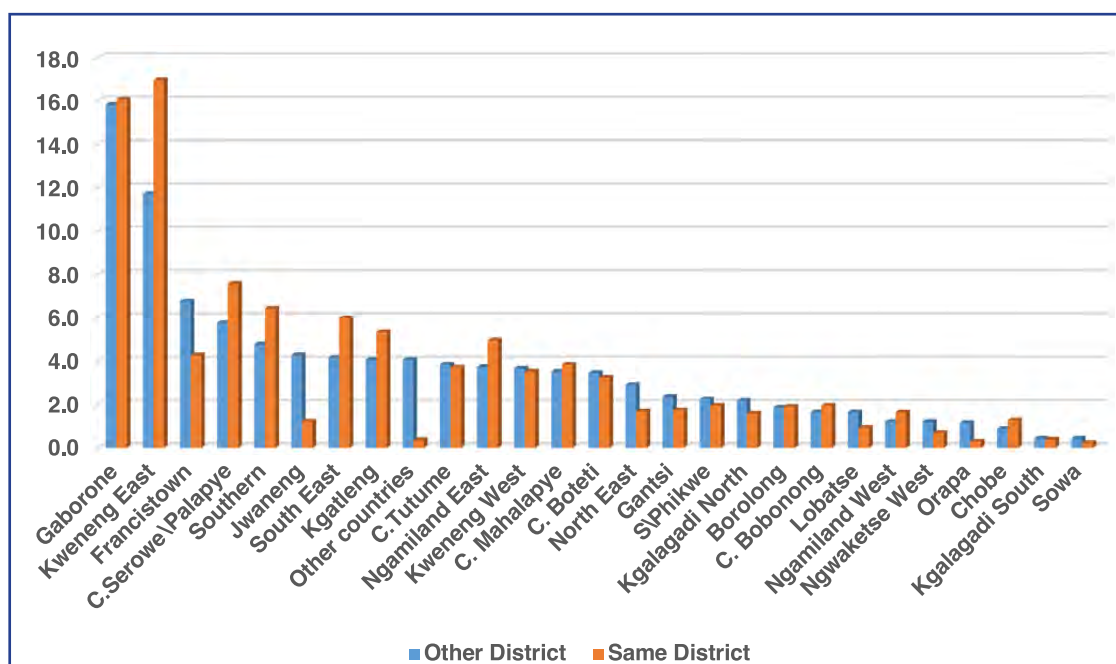

Figure 2: Percentage Distribution Of Marriages By District Of Marriage Solemnization - 2022

2.2a District Of Usual Residence Of Bride And Groom – 2022

Figure 2a shows the distribution of marriages by district of usual living at the time of marriage. The figure indicates that in most cases the bride and groom reside in the same district. The three mining towns of Orapa, Jwaneng, and Sowa exhibit the opposite situation, most likely as a result of the demographic makeup of the localities. The nature of the work available in these towns—mines being the main employer—attracts more males than women as such these men have to look to other districts to find life partners. However, other districts such as Francistown, North East and Kgalagadi North, also had, more married couples residing in different districts at the time of marriage than those who are from the same district.

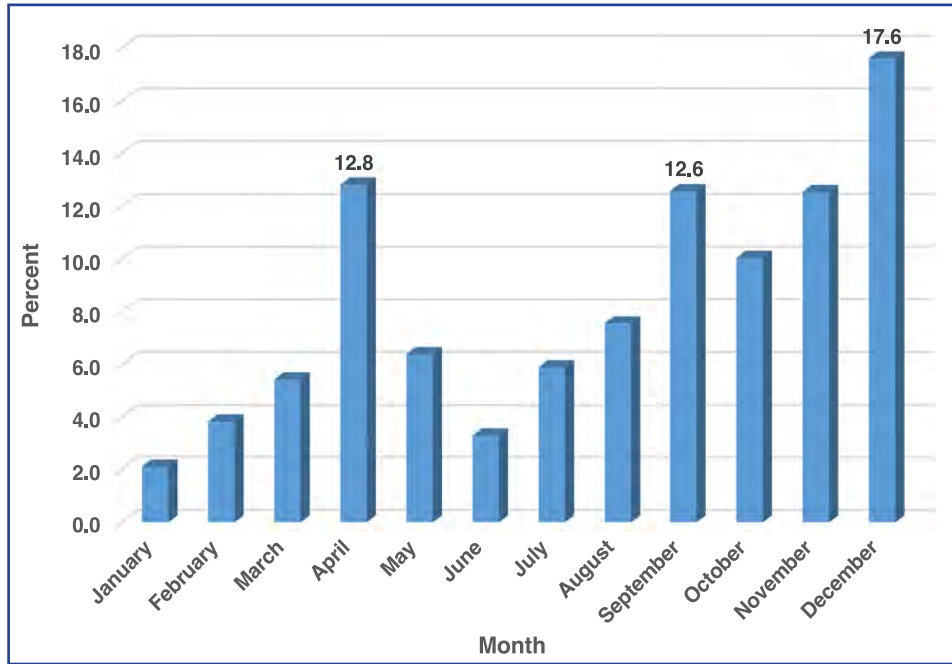

Figure 2a: Marriages By Place Of Usual Residence Of Bride And Groom -2022

2.3 Months of Registration

Chart 3 shows that marriages are more prevalent during the last four months of the year and in April. The top three months in ranking are December, April and September probably due to the long public holidays celebrated during the months. There is low activity during the winter months which cover the months of May to August.

Figure 3: Registered Marriages By Month Of Registration – 2022

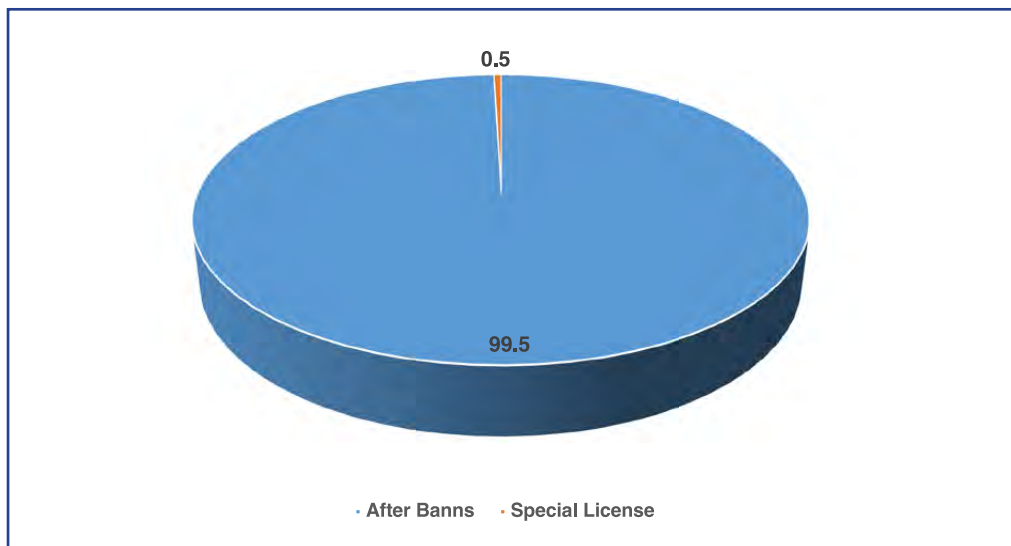

2.4 Type of Marriage

The marriage process requires that a public notice of intention to marry be publicized for at least three weeks before the solemnization and this is referred to as publishing of banns. The banns are meant to sanction anyone to raise any civil or legal impediments to the marriage, to prevent invalid marriages. The alternative way would be to apply for special license, which allows one to marry without the public notice, anytime anywhere.

According to **Figure 4**, publishing of banns prior to solemnization of marriages is the most commonly used of the two with 99.5 Percent of the registered marriages publicized in that way.

Figure 4: Percentage Registered Marriages By Type Of Marriage - 2022

2.5 Age At The Time Of Marriage

According to the Marriage Act (2001), no minor or person below the age of 21 years not being a widower or widow may marry without the consent in writing of his or her parents or guardians.

Figure 5 shows that more women than men marry at younger ages (under 35 years) and more men than women marry at older ages (40 years and over). About 65 percent of brides were aged below 40 years while the comparable figure for grooms was 44.2 percent.

Figure 5: Percentage Of Marriages By Age Of Bride And Groom – 2022

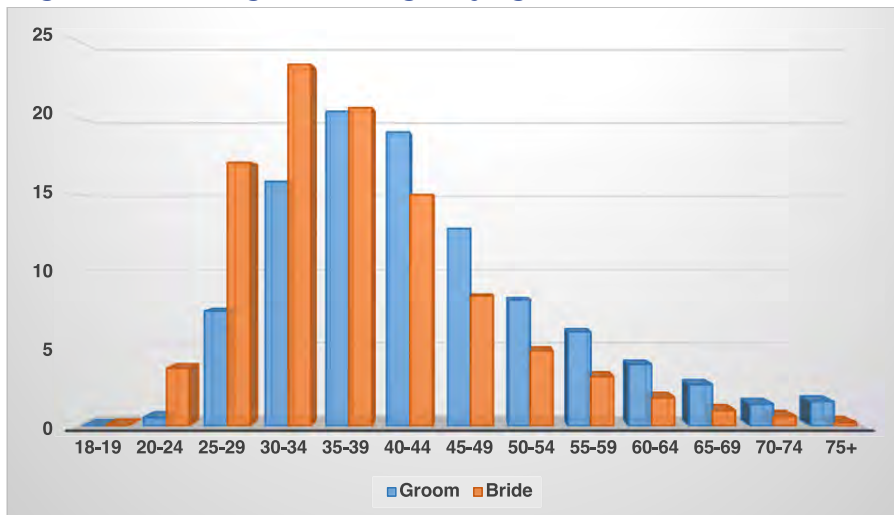

Table 2.1 shows that 12 brides and 1 groom needed consent from their parents or guardians as they were aged less than 21. The age group with the highest percentage of marriages was the 30-34 and 35-39 age groups for females and males respectively

Total	5642	100.0	5642	100.0

Table 2.2 shows the mean and median age at first marriage for bachelors and spinsters from 2017 to 2022. The median age at first marriage for bachelors and spinsters both increased by 1 year from 35 and 40 in 2021 to 36 and 41 in 2022 respectively.

Table 2.2: Mean And Median Age At First Marriage 2017- 2022

Year	Mean		Median	
	Bachelor	Spinster	Bachelor	Spinster
2022	43	38	41	36
2021	42	37	40	35
2020	42	36	40	35
2019	40	35	38	34
2018	41	35	38	33
2017	41	36	38	34

2.6 Age Differentials

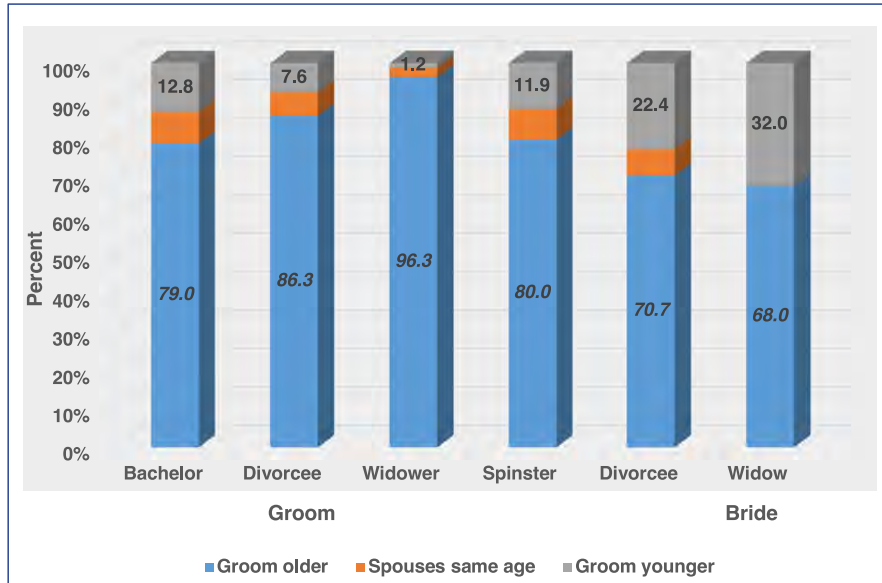

Table 2.3 shows that, in the majority of marriages, the groom is older than the bride accounting for about 80 percent of the marriages. In seven of the unions solemnised in 2022, grooms were 15 or more years younger than their brides. In only 8 percent of the unions, partners were of the same age.

Table 2.3 Age Differences Between Partners - 2022

	Age Difference	No. of Unions	Percent
Groom younger than Bride	1-4	541	9.6
	5-9	119	2.1
	10-14	26	0.5
	15+	7	0.1
Same Age	0	451	8.0
Groom older than Bride	1-4	1,707	30.3
	5-9	1,534	27.2
	10-14	777	13.8
	15-19	329	5.8
	20+	151	2.7
Total		5,642	100.0

Figure 6 also suggests that men tend to marry younger women irrespective of their marital status at the time of marriage. It is however interesting to note that, compared to spinsters, women who were previously married tend to marry men who are younger than they are. For example about 12.0 percent of grooms were younger than their brides whose marital status was spinster at the time of marriage. The comparable figure for brides whose marital status was divorcee and widow was 22.4 and 32.0 percent respectively (**Figure 6**).

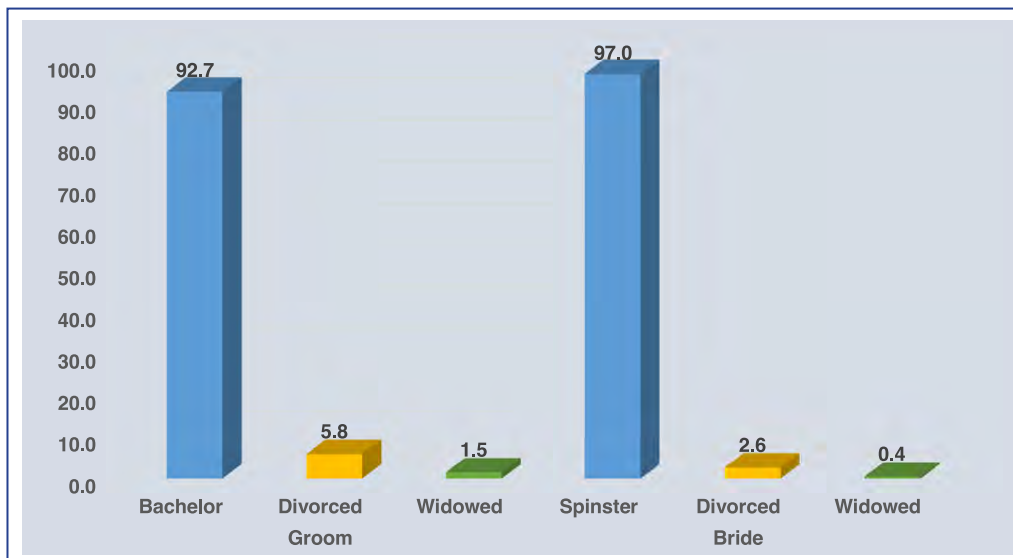

Figure 6: Percent Distribution Of Marriages By Age Differences Between Spouses And Marital Status At The Time Of Marriage – 2022

2.7 Previous Marital Status

Figure 7 shows that the majority of marriages were of bachelors and spinsters accounting for 93 percent and 97 percent respectively. Grooms who were either divorcees or widowers accounted for about 7 percent of remarriages and the comparable figure for brides was 3 percent. (**Figure 7**).

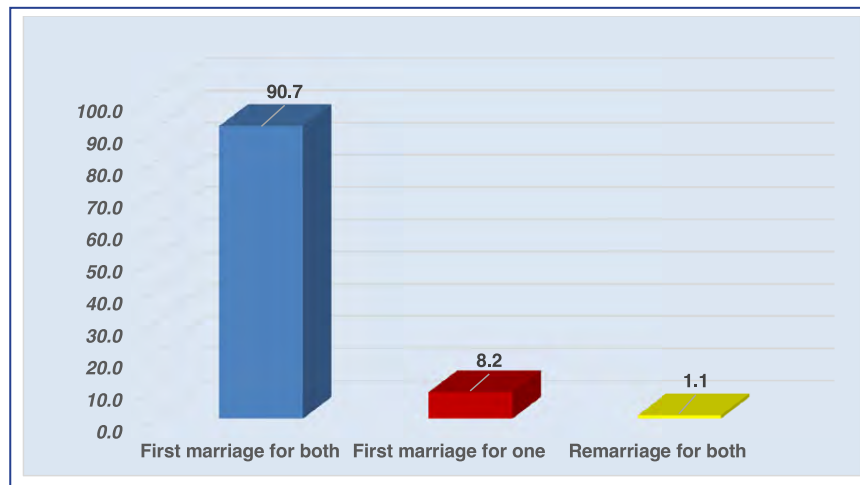

Figure 7: Marriages By Previous Marital Status – 2022

2.8 First Marriages and Re-Marriages

Figure 8 shows that 90.7 percent of marriages were first time marriages for both bride and groom, while 8.2 percent were first marriages for one partner. Remarriages for both partners accounted for the remaining 1.1 percent.

Figure 8: First Marriages And Re-Marriages – 2022

2.9 Crude Marriage Rate (CMR)

The crude marriage rate is the ratio of the number of marriages during the year to the total population in that year. The value is expressed per 1000 persons. Marriage rate helps gauge the prevalence of marriage within a society and how it changes over time.

It should be noted that in the previous publications the CMR was calculated using the number of persons marrying instead of number of solemnized marriages which resulted in a doubled rate.

Figure 9 shows the Crude Marriage Rate from 2013 to 2022. In 2022 the CMR was 2.3 implying that there were about 2 marriages per a 1000 population. The highest CMR was recorded in 2015 with a CMR of 3.1 marriages per 1000 population. It is interesting to note that despite the COVID19 pandemic the CMR increased from 2.6 in 2019 to almost 3 marriages per 1000 persons in 2021. The CMR then dropped to a low of 2.3 in 2022 (the start of the post COVID19 period).

Figure 9: Crude Marriage Rate 2013-2022
