## EXECUTIVE SUMMARY

In 2021, the country was at the height of the COVID-19 pandemic, with travel restrictions for inbound travel still in place. This continued to result in a decline in international tourist arrivals, as in the previous year. A total of 543,938 non-citizens arrived in the country in 2021. Out of these, 337,626 (62.1 percent) were international visitors (tourists). This shows a decrease of 5.8 percent (20,599) compared to 358,225 in the previous year. Tourists refer to both overnight and same-day visitors. Overnight visitors accounted for 92.9 percent (313,783) of total visitors, while same-day visitors made up 7.1 percent (23,843) of total visitors. Tourists from South Africa contributed 44.6 percent (150,705), while those from Zimbabwe accounted for 19.2 percent (64,670) of total tourists during the year.

Tourists from the top ten overseas countries accounted for 7.7 percent (25,954) of total tourists in 2021, while those from the top ten SADC countries accounted for 89.3 percent (301,374) of total tourists in 2021. Tourists who came for Business accounted for 35.5 percent (119,872) of total tourists, while those who were In-Transit and Visiting Friends and Relatives (VFR) represented 32.3 percent (109,199) and 14.9 percent (50,446) respectively. Tourists who came for holidays or leisure accounted for 13.8 percent (46,735) of total tourists.

Tourists who entered the country by air represented 10.8 percent (36,583) of total tourists, while 89.2 percent (301,037) came by road. Among the tourists who came by air, Sir Seretse Khama International Airport accounted for 53.7 percent (19,660), while those who entered through Maun Airport represented 34.6 percent (12,666).

November was the most popular month of arrival for tourists in 2021, with 11.5 percent (38,829), followed by December and October at 11.4 percent (38,584) and 11.1 percent (37,369) respectively. The majority of tourists were in the age range of 35 to 39, accounting for 17.6 percent (59,374) of total tourists during the year.

Tlokweng Border Post was the busiest port of entry, having received 19.6 percent (106,492) of total arrivals, while Martins Drift Border Post was the busiest port of exit, having facilitated 20.5 percent (115,695) of total departures.

## CHAPTER 1: INTRODUCTION

### 1.1 Introduction

This annual publication presents statistics on arrivals and departures during the year 2021. The statistics carried out in this report include arrivals and departures of visitors and non-visitors by country and region of nationality, residence, purpose of entry, mode of travel used, port of entry and exit, as well as sex and age distribution. The information contained in this report is derived from the Department of Immigration and Citizenship Arrival and Departure Forms, which are completed by non-citizens at the gazetted ports of entry and exit.

Botswana citizens are exempt from completing the immigration arrival and departure forms. Therefore, the figures on arrivals and departures contained in this publication only cover non-citizens, both visitors and temporary residents to Botswana. However, with the increasing demand for statistics on outbound travellers, including information on citizens, it will be necessary to collect and compile data on citizens in the future.

#### 1.1.1 Arrangement of the Report

The report categorises travellers into two parts: the first part provides information on visitors only, while the second part presents information on all arrivals and departures during the year under review. The characteristics of visitors are presented in **Chapter 2**, while the second part presented in **Chapter 3** focuses on all travellers entering and departing the country. **Chapter 4** gives sources, methods, and definitions of terms used in the report. **Chapter 5** contains appendices consisting of detailed tables on which abridged tables and graphs included in the body of the report are based.

#### 1.1.2 Limitations of the Report

The focus of the collected data is currently on non-citizens (temporary residents and foreign nationals) only. As a consequence of having both automated and non-automated border posts in operation, it is not possible to calculate the actual length of stay of visitors, even though data on the amount of time (days) granted is captured in the immigration entry and departure forms. As people can enter the country through an automated border post but depart through a non-automated border post, this makes it difficult to calculate the actual length of stay in the country as data from automated and non-automated borders cannot be reconciled.

## CHAPTER 2: TOURISTS

This chapter gives information on visitors who came into the country in 2021. These visitors are classified into overnight visitors and same-day visitors. Same-day visitors are mostly excursionists who take a trip that does not include an overnight stay, while overnight visitors represent tourists who spend at least a night in the country being visited. The chapter details statistics compiled according to country and region of residence, the purpose of visit, mode of travel, month of visit, port of entry, as well as the demographic characteristics of the visitor.

In the compilation of this report, half of the transit travellers are regarded as visitors. This takes into consideration the fact that some of these transit travellers end up having expenses in the country while they are transiting. This expenditure may be incurred through having to spend a night in the country or any other expenditure. As a result, the tourist statistics discussed here include half of the transit travellers. The country of residence, as opposed to nationality, is used as a reference when compiling tourist statistics.

### 2.1 Tourists by Country and Region of Residence

**Appendices 1** and **2** are dedicated to tourists only. **Appendix 1** shows both overnight tourists and same-day tourists by country of residence, as well as the percentage distribution of total tourists at the country level. **Appendix 2** presents tourists by country of residence and purpose of visit.

During 2021, a total of 337,626 tourists came into Botswana; 92.9 percent (313,783) were overnight visitors, while 7.1 percent (23,843) were same-day visitors. The total number of tourists shows a decrease of 5.8 percent (20,599) compared to the 358,225 total tourists recorded in 2020.

**Appendices 1** and **2** show that most visitors came from South Africa, which contributed 44.6 percent (150,705), while Zimbabwe accounted for 19.2 percent (64,670) of total visitors.

### 2.2 Top Ten Overseas Countries

**Table 1**, which is based on **Appendix 1**, shows the top ten overseas countries of origin for the recorded 25,954 tourists, accounting for 7.7 percent of total tourists (337,626) in 2021.

Of the 25,954 tourists, 39.3 percent (10,203) resides in the United States of America, followed by those residing in Germany and Switzerland at 15.7 percent (4,064) and 8.5 percent (2,199), respectively.

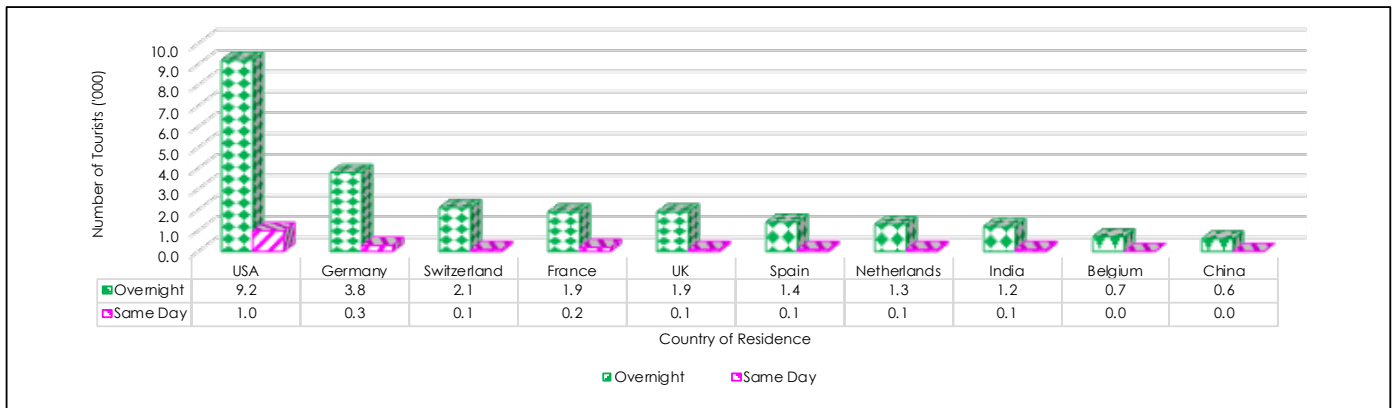

Overnight tourists from the top Ten Overseas Countries make up more than 90 percent of the total tourists from those countries except France, which makes up 89.3 percent.

## 2.3 Top Ten SADC Countries

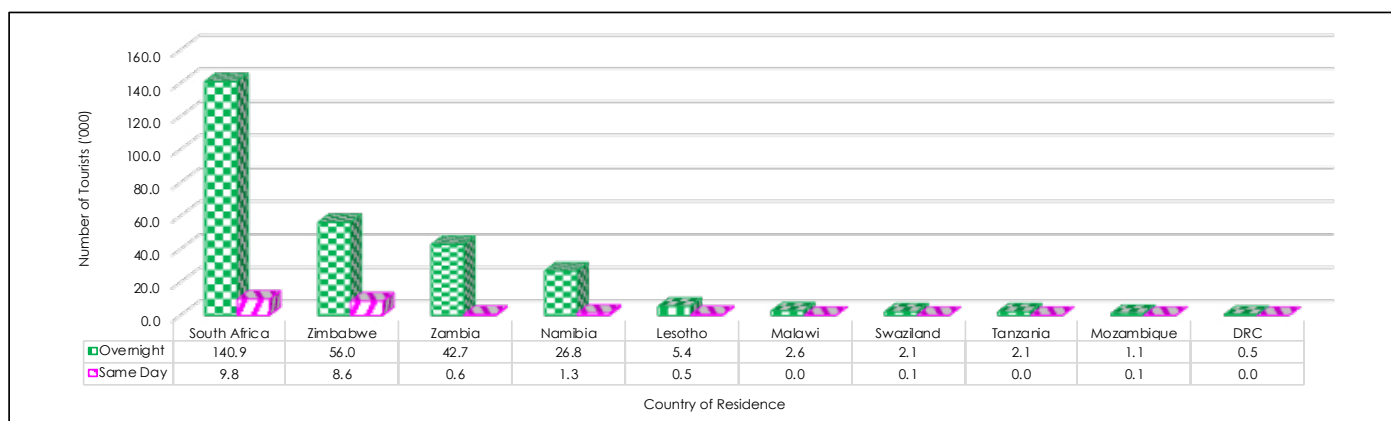

**Figure 2** and **Table 2** show the top ten SADC sub-continent countries that provided tourists to the country. Tourists residing in the top ten countries of origin for the SADC region make up 89.3 percent (301,374) of total tourists during the year. This proportion represents a decrease of 1.1 percentage points when compared to the region's contribution of 90.4 percent registered in 2020. South Africa was the major contributor at 50.0 percent (150,705), Zimbabwe accounted for 21.5 percent (64,670), and Zambia represented 14.3 percent (43,227) of all tourists from the top Ten SADC countries of origin. Other countries that contributed less than 10 percent each can be observed in **Table 2** and **Figure 2**.

Overnight tourists constituted at least 90 percent of total tourists at country level for the top ten SADC countries, with the exception of Zimbabwe and Mozambique. Same-day visitors from Zimbabwe and Mozambique accounted for 13.4 percent (8,647) and 11.4 percent (139) of all visitors from those respective countries.

## 2.4 Tourists by Purpose of Entry

**Table 3** presents the number of visitors by purpose of visit and type of visit, as well as associated percentage distributions. Tourists on business trips accounted for 35.5 percent (119,872) of total tourists, followed by in-transit visitors at 32.3 percent (109,199) and those who were visiting friends and relatives at 14.9 percent (50,446). Holiday or leisure tourists represented 13.8 percent (46,735), while those who came for purposes of "religious, sports, medical, and shopping activities which are grouped together under one category called 'Other', accounted for 3.4 percent (11,374) of all tourists.

## 2.5 Tourists by Mode of Arrival

**Table 4** presents tourists by mode of arrival and purpose of visit. There are three modes of travel used in Botswana: road, rail, and air. However, only roads and air were used to enter and exit Botswana in 2021. Percentage distributions for the purpose of visit by each airport are calculated as a percentage of the total of each purpose of visit by air, while percentages for the type of tourist by air and road are calculated as a percentage of the total tourists.

Road accounted for the highest percent of tourists at 89.2 percent (301,037), which represented a 12.3 percent (42,361) decrease from 95.9 percent (343,398) in the previous year. Those who flew in increased by 146.7 percent (21,756) from 14,827 in 2020 to 36,583 in 2021. As in 2020, there were still no rail travels recorded in 2021.

Tourists who came by air transport represent 10.8 percent (36,583) of all tourists. The majority of tourists traveling by air 53.7 percent (19,660) entered the country through Sir Seretse Khama International Airport, followed by Maun Airport at 34.6 percent (12,666). Tourist arrivals through Kasane Airport accounted for 10.7 percent (3,897) of total air travel arrivals.

A further analysis of air travellers by purpose of entry reveals that tourists who came for the purpose of visiting friends and relatives at 94.2 percent (6,492), those arriving on business-related trips at 92.3 percent (10,706), and "other" at 93.8 percent (320) mainly flew in through Sir Seretse Khama International Airport. Visitors who came for the holidays mostly flew in through Maun Airport at 69.5 percent (11,803), followed by Kasane Airport at 17.6 percent (2,996). In-transit tourists who came in through Kasane Airport accounted for 78.9 percent (606) of all in-transit air travel arrivals, followed by Sir Seretse Khama International Airport at 13.0 percent (100) and Maun Airport at 6.6 percent (51).

## 2.6 Tourists by Port of Entry

**Appendix 2A** shows the number of tourists by port of entry and purpose of visit. Tlokweng Border Post accounted for the majority of tourists at 22.6 percent (76,303), followed by Martins Drift Border Post at 15.3 percent (51,581). Sir Seretse Khama International Airport was the only airport in the top ten busiest ports of entry for tourists, while the rest were land border posts. Tourist arrivals through Seretse Khama International Airport accounted for 5.8 percent (19,660) of total tourist arrivals.

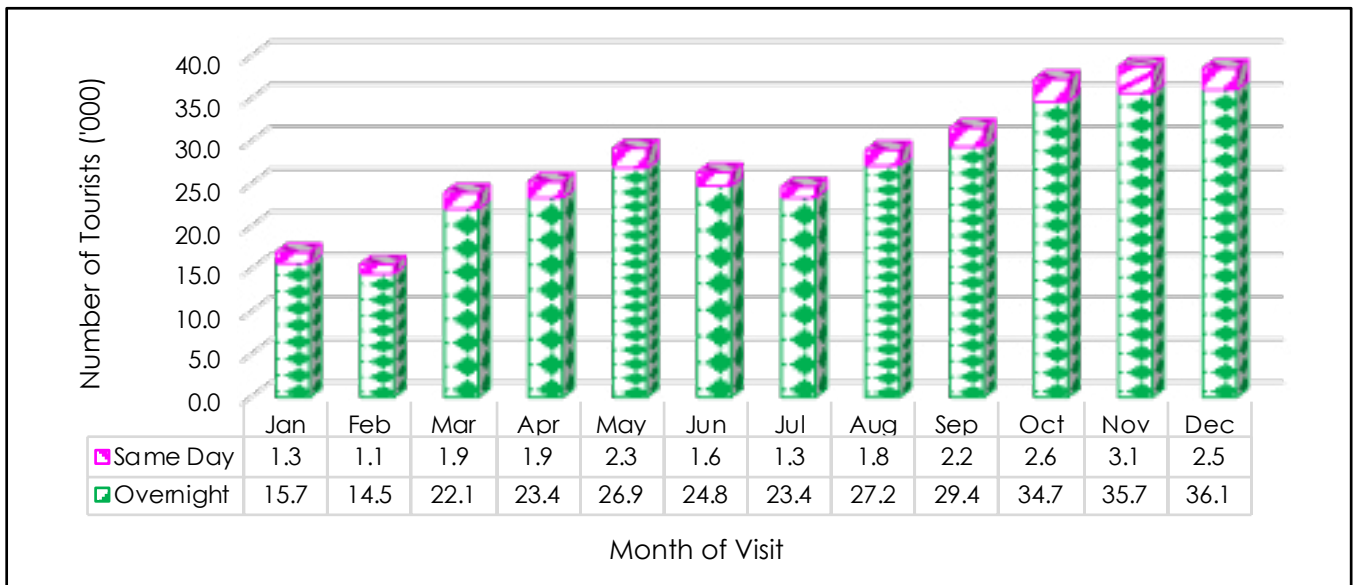

## 2.7 Tourists by Month of Arrival

**Figure 3** and **Table 5** display tourist arrivals by month of arrival and purpose of visit. The figure presents both same-day visitors and overnight visitors, but discussions are based on total monthly tourist arrivals. November recorded the highest number of tourists at 11.5 percent (38,829), followed by December and October with 11.4 percent (38,584) and 11.1 percent (37,369), respectively. The month that recorded the least number of tourists is February, at 4.6 percent (15,589).

## CHAPTER 4: TECHNICAL NOTES

This chapter presents data sources, methodology and definitions of terms used in production of tourism statistics. This is meant to enable the users to interpret the statistics carried in the report with understanding of how the raw data is sourced, how processing and compilation of the report is done and what the various terms used in the report mean.

### 4.1 Data Source and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International Tourist data is collected using Arrival and Departure forms that are filled in by non-citizens at all the gazetted points of entry and exit (Land Borders and Airports). Each form asks questions on personal characteristics of the traveller which include among others, sex, age, country of nationality, country of residence and purpose of entry. By default data is also collected on month of travel, mode of transport and point of entry.

Percentages are independently rounded, therefore in some cases they may not add to the total. The results and analysis presented in the report follow the guidelines, definitions and classifications recommended by United Nations World Tourism Organization (UNWTO) and the United Nations Statistical Commission (UNSC). This publication is produced in line with internationally accepted statistical standards and guidelines.

A scenic view of a large body of water at sunset. The sun is low on the horizon, casting a warm, golden glow across the sky and reflecting on the water's surface. The sky is filled with soft, white and orange clouds. In the foreground, a large boat with a canopy is moving away from the viewer, leaving a wake in the water. Several people are visible on the boat. In the distance, another smaller boat is visible on the water. The overall atmosphere is peaceful and serene.
