# MONTHLY DIGEST STATISTICS BOTSWANA 

Copyrights(C)Statistics Botswana 2014

## Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods as at the end of August 2014. Data for imports and exports of goods is currently complete up to July 2014.

Since Statistics Botswana receives new data on monthly basis, and there is continuous data editing as various tables and reports are produced, the database is therefore updated from time to time. As a result of editing and revision of data, figures on previous Monthly Digests and that on the current Monthly Digest (for the same months) may differ.

This Monthly Digest presents summaries of Total Merchandise Trade from the first quarter of 2009 to the month of August 2014 as presented on Table 1. Trade by Principal Commodity groups is presented on Tables 2.1 for imports and Table 2.2 for exports, giving data from the first quarter of 2009 to the month under assessment. Table 2.3 gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on Tables 3.1 and $\mathbf{3 . 2}$ for imports and exports respectively.

Three graphical presentations appear in this digest. Chart 1 shows imports, total exports and trade balance from January 2009 to August 2014 while Charts 2.1 and 2.2 show Principal Commodity groups for major imports and major exports respectively, for August 2014 only.

Statistics on commodities that were mostly traded during the most recent two months, in this case July 2014 and August 2014, appear on Tables 4.1 (A) \& (B) for imports while exports are presented on Tables 4.2 (A) \& (B). Trade at Chapter Level ( 2 digits Harmonized Commodity Description \& Coding System) appears on Table 5, presenting data for July 2014 and August 2014.

Table 1 distinguishes domestic exports from re-exports while other tables give total exports, which is the sum of the two.

We sincerely thank all stakeholders involved in the formulation of this monthly digest, their continued support and feedback, as we strive to better serve Batswana and all other important users of our services.

### 11.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports and re-exports as well as trade balance.

### 1.0.1 Data Revision

It should be noted that IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If final assessment is done later, two or three months, or even more, after goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which final assessment was done. This is mostly common with imports. Revised Data for the month preceding the one under review will normally be high as compared to the other months due to more goods (from the previous month) being released after final assessment. Incorporation of data from manual border posts also adds to the difference.

Discussions on Sub-Sections 1.1 to 1.3 are based on Table 1.
New information with regard to aggregation process has necessitated change in treatment of Diamonds imported for and exported after aggregation. Initially imports of these were treated as temporary and as a result did not form part of external trade, only a small part that was eventually bought by Diamond Processing/Polishing companies was treated as imports. With regard to exports, only Diamonds of Botswana origin were treated as exports and those that were originally imported did not form part of exports.

It has however been realised that aggregation is regarded as processing as per recommendations in IMTS Compiler's Manual, hence the inclusion of Diamonds imported for aggregation. in the Diamonds that came in for aggregation are however taken as re-exports and form part of overall total exports. Data users will as a result see an increase in re-exports which will be as a result of Diamonds from the aggregation process. For data users interested in Botswana Diamonds only, such information or details can be availed on request.

Revision of the database to cater for changes in the treatment of Diamonds for aggregation will be done as an on-going process depending on the availability of disaggregated data on the export side. In the current monthly digest, only data for June to August 2014 has been revised. Data for July 2012 until May 2014 is still as published in the July 2014 Monthly Digest.

### 1.1 Imports

Discussions on imports are based on cost, freight and insurance (CIF) value. August 2014 total imports were valued at P6, 080.1 million, showing an increase of 9.7 percent (P479.1 million) from the revised July 2014 value of P5, 542.4 million. When annualizing total import figures, August 2014 imports value increased by 53.3 percent ( $\mathrm{P} 2,113.8$ million) from the August 2013 value of $\mathrm{P} 3,966.3$ million. The huge increase in annual differences is brought by the fact that August 2014 figures include Diamonds imported for aggregation while August 2013 has not yet been revised to include the same

### 1.2 Total Exports

In May 2014 total exports were valued at P5, 140.3 million, a decrease of 0.2 percent ( P 10.7 million) from the April 2014 revised value of P5, 151.0 million. Comparison of May 2014 total exports value to that of May 2013 (P3, 827.1 million) shows an increase of 34.3 percent.

### 1.3 Trade Balance

A trade surplus of P1, 865.5 million was recorded in August 2014.

() denotes negative number

Chart 1 shows trade surplus in August 2014. It should be noted that trade balance is largely dependent on the value of Diamonds traded as these are associated with high values.

### 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery \& Electrical Equipment" which combines machines and electrical appliances; "Vehicles \& Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groupings' contributions to the total, remain minimal. In such cases, the commodities are grouped together under the general category called "Other".

### 2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on Table 2.1, covering the first quarter of 2009 to the month of August 2014. Percentage distributions are however only shown for totals of years 2012 and 2013, as well as for months of July and August 2014. Chart 2.1, gives graphical presentation of Principal Import Commodity groups for August 2014 only.

Composition of imports by principal commodities for August 2014, shows that Diamonds contributed the highest to total imports (P6, 080.1 million) with 36.7 percent ( $P 2,229.6$ million), followed by Fuel with 12.4 percent (P755.8 million). Machinery \& Electrical Equipment; Vehicles \& Transport Equipment; Food, Beverages \& Tobacco; Chemicals \& Rubber Products contributed 11.2 percent (P679.8 million); 8.8 percent (P532.3 million); 8.7 percent (P531.6 million) and 8.4 percent (P507.7 million) respectively.

Chart 2.1: Principal Imports Composition - August 2014

Note: Other Goods include all Other Goods not elsewhere specified as in Table 2.1 Based on data from automated borders only

### 2.2 Principal Exports

August 2014 total exports were valued at P7, 943.7 million, with 89.8 percent ( $P 7,132.4$ million) attributed to exports of Diamonds. It should be noted that these values include Diamonds exported from the aggregation process, which are as a result not Botswana diamonds only.

Copper Nickel contributed 3.0 percent (P238.6 million) while Machinery \& Electrical Equipment and Meat \& Meat Products contributed 1.3 percent each to total exports with values of P106.6 million and P105.5 million respectively.

Percentage distributions for major export groups can be observed on Table 2.2 while Chart 2.2 gives the graphical presentation for August 2014 only. Total exports discussed here are the sum of domestic exports and re-exports.

### 3.0 TRADE BY REGIONAL AND MAJOR PARTNERS

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on Table 3.1 for imports and Table 3.2 for exports.

### 3.1 Imports by Region and Major Trading Partners

Imports for August 2014 were valued at P6, 080.1 million, with 53.1 percent ( $\mathrm{P} 3,230.3$ million) coming from South Africa and 21.0 percent (P1, 274.4 million) from Namibia.

The European Union (EU) supplied imports valued at P220.9 million, representing 3.6 percent of total imports during August 2014. Imports from the EU were mainly from Belgium with a contribution of 1.5 percent (P94.1 million) of total imports during August 2014.

During the period under review, imports from Asia were valued at P311.6 million, representing 5.1 percent of total imports. India and China contributed 1.8 percent ( P 112.1 million) and 1.4 percent (P86.7 million) respectively, to total imports recorded during the month.

Imports from Canada and the United States of America (USA) were valued at P764.4 million and P226.0 million in August 2014, which is 12.6 percent and 3.7 percent respectively of total imports during the month.

Imports at regional and country level (for selected countries) are presented on Table 3.1; however, percentage distributions do not form part of this table.

### 3.2 Exports by Region and Major Partner Countries

Total exports for August 2014 were valued at P7, 943.7 million, with 29.1 percent ( $\mathrm{P} 2,315.0$ million) destined to Asia. India received most of exports destined to Asia at the value of P885.2 million, representing 11.1 percent of total exports. Still within Asia, Israel received 7.4 percent (P588.0 million), Singapore 3.8 percent (P299.8 million) while United Arab Emirates (UAE) and Hong Kong received 3.6 percent and 1.7 percent at values of P289.0 million and P133.6 million respectively.

Exports ordained for Southern Africa Customs Union (SACU) were valued at P2, 289.8 million (28.8 percent), Namibia and South Africa and received 14.7 percent ( $\mathrm{P} 1,166.5$ million) and 14.1 percent ( $\mathrm{P} 1,121.7$ million) respectively, of total exports during the month under review.

Exports destined to the EU were valued at P1, 831.6 million, representing 23.1 percent of total exports during the period under review. Belgium received most exports destined to EU at 22.0 percent (P1, 751.1 million) of total exports.

Exports to Canada, Switzerland, the USA and Norway were valued at P885.6 million (11.1 percent), P228.0 million (2.9 percent), P146.7 million ( 1.8 percent) and P1 19.7 million ( 1.5 percent) respectively.

Other destinations for exports can be observed on Table 3.2; however, percentage distributions do not form part of the table.

### 5.0 TECHNICAL NOTES

IMTS are compiled by International Merchandise Trade Statistics Section of Statistics Botswana. External trade statistics here refers to trade in goods only. International Service Trade Statistics (ISTS) are not compiled by this unit. The primary source of External Trade data is Customs \& Excise Division which is part of Botswana Unified Revenue Service (BURS). Customs \& Excise Division is responsible for data capture for both computerized and manual borders and the monthly raw data files are transferred to Statistics Botswana for data processing, in electronic form.

Up to April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes in to account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same.

In June 2009, the Botswana External Trade database was revised to cater for General Trade Type as per the United Nations Statistics Division recommendations. The General Trade Type gives a complete coverage of External Trade as compared to the Special Trade Type.

Imports are valued CIF (cost, insurance \& freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. Exports value consists only of the value of goods as they leave the exporting country. Goods are valued as at the time they cross the border of the exporting country.

### 5.1 Definitions used

Domestic Exports: Goods of Botswana origin being exported permanently out of Botswana for consumption in the outside world.

Re-Exports: Goods that were initially imported for local consumption and are now being exported permanently out of the country or goods which were exported in the same condition as imported or after undergoing minor transformation which leaves them not substantially changed.

Imports: Goods imported from the outside world, into Botswana, for local consumption.
Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country importing more than it is exporting.
