No. 2015/07 MONTHLY DIGEST-JUNE 2015

## STATISTICS BOTSWANA

Copyrights(C)Statistics Botswana 2015

## Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods as at the end of June 2015. This digest follows the May 2015 Digest published in July 2015. Data from both automated and manual borders for May and June 2015 is complete, constituting 100 percent of total monthly trade in value terms. Since Statistics Botswana receives new data on a monthly basis, and there is continuous data editing as various tables and reports are produced, the database is therefore updated from time to time. As a result of editing and revision of data, figures on previous Monthly Digests and those on the current Monthly Digest (for the corresponding months) may differ.

This Monthly Digest presents summaries of Total Merchandise Trade from the first quarter of 2009 to June 2015 as presented on Table 1. Trade by Principal Commodity groups is presented on Table $\mathbf{2 . 1}$ for imports and Table 2.2 for exports, giving data from the first quarter of 2009 to the month under review. Table $\mathbf{2 . 3}$ gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on Tables 3.1 and $\mathbf{3 . 2}$ for imports and exports respectively.

Three graphical presentations appear in this digest. Chart 1 shows imports, total exports and trade balance from January 2009 to June 2015, while Charts 2.1 and 2.2 show Principal Commodity groups for major imports and exports respectively, for June 2015 only.

Statistics on commodities that were mostly traded are presented for May and June 2015 on Tables 4.1 (A) \& (B) for imports while exports are presented on Tables 4.2 ( $\mathbf{A}$ ) \& (B). Trade at Chapter Level (2 digits of the Harmonized Commodity Description \& Coding System) appears on Tables 5, presenting data for May and June 2015.

Table 1 distinguishes domestic exports from re-exports while other tables show total exports only, which is the sum of the two (domestic exports and re-exports).

We sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to better serve Batswana and all other important users of our products and services.

### 1.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports, re-exports and trade balance.

### 1.1 Data Revision

Table A presents the revision of data for February, March, April and May 2015. This table shows a small increase of 1.1 percent (P73.0 million) in the May 2015 import value when comparing figures from the May and June 2015 digests. Total Exports for May 2015 recorded a large increase of 20.9 percent (P1, 484.9 million) during the same period.

The Data is complete up to June 2015, comprising data from both automated and manual border posts.

## Discussions on Sub-Sections 1.2 to 1.4 are based on Table 1.

### 1.2 Imports

Discussions on imports are based on cost, insurance and freight (CIF) value. June 2015 total imports were valued at P8, 010.2 million, showing an increase of 22.1 percent ( $\mathrm{P} 1,451.6$ million) from the May 2015 value of P6, 558.6 million. As compared to June 2014, the June 2015 import figure shows an increase of P2, 169.0 million, which is 37.1 percent increase from P5, 841.2 million recorded during the same month of the previous year.

### 1.3 Total Exports

In June 2015, total exports were valued at P7, 406.5 million, a decrease of 13.8 percent (P1, 181.5 million) from the May 2015 value of P8, 588.0 million. June 2015 total exports show a fall of P736.6 million (9.0 percent) from the June 2014 value of P8, 143.1 million.

### 1.4 Trade Balance

A trade deficit of P603.7 million was recorded in June 2015.

### 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery \& Electrical Equipment" which combines machines and electrical appliances; "Vehicles \& Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groupings' contributions to the total remain minimal. In such cases, the commodities are grouped together under the general category called "Other".

### 2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on Table 2.1, covering the first quarter of 2009 to June 2015. Percentage distributions are however only shown for totals of the years 2013 and 2014, as well as for the months of May and June 2015. Chart 2.1, gives a graphical presentation of Principal Import Commodity groups for June 2015 only.

Composition of imports by principal commodities for June 2015, shows that Diamonds contributed the most to total imports (P8, 010.2 million), having contributed 42.4 percent (P3, 399.6 million), followed by Machinery \& Electrical Equipment with 11.8 percent (P944.9 million) and Food, Beverages \& Tobacco with 11.7 percent (P933.6 million). Fuel and Chemicals \& Rubber Products contributed 9.5 percent (P761.3 million) and 5.3 percent (P426.0 million) respectively, to total imports during the month under review. Percentage distributions for June 2015 for other commodity groups can be seen on Table 2.1.

Chart 2.1: Principal Imports Composition - June 2015

### 2.2 Principal Exports

June 2015 total exports were valued at P7, 406.5 million, with 86 percent (P6, 368.4 million) atributed to exports of Diamonds. These diamonds consist of diamonds from Diamond polishing companies as well as those from the aggregation process.

Copper Nickel, Machinery \& Electrical Equipment and Meat \& Meat Products contributed 6.1 percent (P455.2 million), 2.2 percent (P160.3 million) and 1.6 percent (P116.0 million) respectively, to total exports during the month.

Percentage distributions for major export groups can be observed on Table $\mathbf{2 . 2}$ while Chart $\mathbf{2 . 2}$ gives the graphical presentation for June 2015 only. Total exports discussed here are the sum of domestic exports and re-exports.

### 3.0 TRADE BY REGION AND MAJOR PARTNERS

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on Table 3.1 for imports and Table 3.2 for exports.

### 3.1 Imports by Region and Major Trading Partners

Imports for June 2015 were valued at P8, 010.2 million, with 60.2 percent (P4, 824.9 million) coming from South Africa and 16.5 percent (P1, 320.4 million) from Namibia. Zimbabwe contributed 5.3 percent ( P 425.6 Million) to total imports.

Canada supplied 6.6 percent (P532.0 million) of total imports during the month under review.
Asia as a block supplied imports valued at P496.3 million, representing 6.2 percent of total imports. India contributed 1.7 percent (P134.5 million), while China and Israel contributed 1.4 percent (P111.6 Million) and 1.3 percent (P101.0 million) respectively to total imports during June 2015.

During the period under review, the European Union (EU) supplied imports valued at P275.9 million, translating to 3.4 percent of total imports during June 2015. Belgium contributed 1.6 percent (P126.7 million) to total imports recorded during the same period.

Imports at regional and country level (for major trading partners) are presented on Table 3.1; however, percentage distributions do not form part of this table.

### 3.2 Exports by Region and Major Trading Partners

Total exports for June 2015 were valued at P7, 406.5 million, with 33.9 percent ( $P 2,512.1$ million) destined to SADC. Namibia and South Africa received 17.0 percent (P1, 261.0 million) and 15.6 percent (P1, 157.7 million) respectively, of total exports during the month under review.

Exports destined to Asia were valued at P1, 930.4 million, representing 26.1 percent of total exports during June 2015. India received most of the exports destined to Asia at the value of P874.6 million, representing 11.8 percent of total exports. United Arab Emirates (UAE) and Israel followed with contributions of 5.2 percent (P383.7 million) and 4.7 percent (P348.9 million) respectively, during the month under review. Thailand received 1.2 percent ( P 92.6) worth of exports from Botswana.

Exports destined to the EU were valued at P1, 475.3 million, representing 19.9 percent of total exports during the period under review. Belgium received most exports destined to EU, having received 18.1 percent (P1, 337.7 million) of total exports during June 2015.

Exports to Canada were valued at P742.5 million, representing 10 percent of total exports (P7, 406.5 million) during June 2015. Norway, Switzerland and the United States of America (USA) received 4.7 percent (P344.9 million), 2.9 percent (P212.7 million) and 2.5 percent (P185.7 million) respectively, of total exports during the same period.

Other destinations for exports can be observed on Table 3.2; however, percentage distributions do not form part of the table.

### 5.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs \& Excise Division at the Botswana Unified Revenue Service (BURS). The Customs \& Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (ex-warehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance \& freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 5.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 5.2 Concepts and Definitions

Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.

Re - Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country

Total exports: This is the sum of domestic exports and re-exports
Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 5.3 Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as direct permanent exports. This was based on IMTS 2010 Compilers' Manual (Page 225) and IMTS 2010 Concepts \& Definitions;
Page 16; Paragraph 1.20 concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

### 5.3.1 Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are now being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a followup document, referred to as "attached document" will show a disaggregation of these imports according to the various countries that contributed to the consignment.
I. In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country
II. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment
III. If part of the consignment was originally from Botswana, that part is recorded as re-import and will form part of total imports.

### 5.3.2 Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The "attached document", giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. As per IMTS 2010 Concepts \& Definitions, goods resulting from processing are to be included in merchandise trade at their full value and as direct permanent exports (Domestic exports) in case they are exported (IMTS Concepts \& Definitions; page 16, paragraph 1.20). As a result of this, diamonds that originated from outside Botswana as well as those originating from Botswana are recorded as direct permanent exports or domestic exports.

Both diamonds originating from Botswana and those that originated from elsewhere are recorded under Domestic Exports. Values for diamonds that originated from elsewhere can be provided separately if needed.

### 5.4 Exclusions from IMTS

## - Goods in Transit

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country

## - Goods temporarily admitted or dispatched

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

- Monetary Gold

This is gold to which the monetary authorities have title and is held as reserve assets.

- Issued banknotes and securities and coins in circulation

These goods represent evidence of financial claims and are excluded from IMTS
The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
