GLOSSARY

COMMENTARY

Section 1: **Headline Inflation**

The annual inflation rate in December 2015 was 3.1 percent, an increase of 0.2 of a percentage point on the November 2015 rate of 2.9 percent. Annual inflation in December 2015 was lower than the 3.8 percent recorded during the same month in 2014. The decelerating pace of the annual inflation rate between December 2014 and December 2015 was largely attributed to the decrease in prices of commodities in the main component of Transport which dropped by 5.0 percentage points.

The inflation rates for regions between November 2015 and December 2015 indicated that Rural Villages' went up to 3.4 percent from 3.0 percent, Cities & Towns moved to 3.2 percent from 2.9 percent and Urban Villages' increased to 2.8 percent from 2.7 percent.

The December national Consumer Price moved from 183.7 in November to 183.6 in December. The Rural Villages' index realized an increase of 0.1 percent, moving from 189.8 to 189.9. The Cities & Towns' index moved from 182.4 to 182.3, while the Urban Villages index remained unchanged at 182.0 between the two months.

Two group indices recorded changes of at least 1.0 percent between November and December, notably Transport (-1.3 percent) and Housing, Water, Electricity, Gas & Other Fuels (1.2 percent).

The Transport index group registered a drop of 1.3 percent, from 162.9 in November to 160.8 in December. This was attributed to a decrease in the constituent section index of Purchase of Vehicles (2.0 percent) and Operation of Personal Transport (1.2 percent). The decline in Operation of Personal Transport section index was attributed to the drop in retail pump prices for petrol by P0.17 and diesel by P0.14 per litre, which effected on the 5th December 2015.

The Housing, Water, Electricity, Gas & Other Fuels group index recorded an increase of 1.2 percent, from 175.1 in November to 177.1 in December. This was due to an increase in the constituent section index of Rent paid by Tenants (2.8 percent).

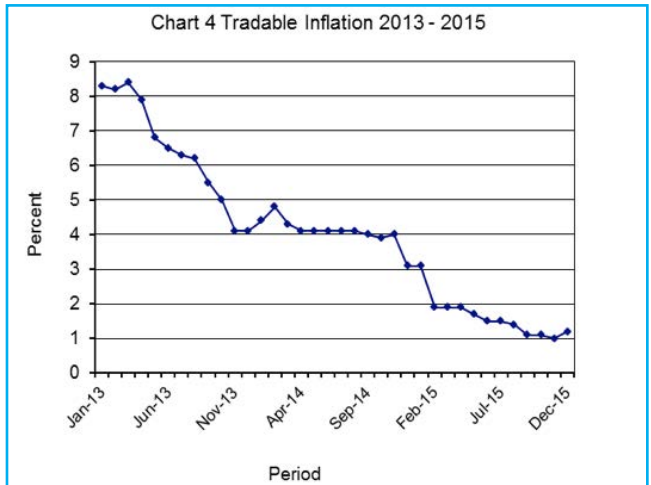

All-Tradable inflation rate was 1.2 percent in December, an increase of 0.2 of a percentage point on the November rate of 1.0 percent. The Domestic Tradable inflation rate advanced from 3.4 percent in November to 3.5 percent in December. The Non-Tradable inflation rate rose from 7.4 percent in November to 7.6 percent in December.

The All-Tradable index moved from 188.0 in November to 187.5 in December registering a drop of 0.3 percent. The Non-Tradable index advanced from 172.8 in November to 173.8 in December, registering a rise of 0.6 percent. The Imported Tradable index went down by 0.5 percent moving from 177.3 to 176.5 between the two periods, while the Domestic Tradable index moved from 208.6 in November to 208.7 in December registering an upturn of 0.1 percent.

Section 2: **Core Inflation**

The Trimmed Mean Core Inflation rate registered a decrease of 0.1 of a percentage point, moving from 3.3 percent to 3.2 percent. The Core Inflation rate by exclusion registered a decrease of 0.2 of a percentage point, moving from 4.7 percent to 4.5 percent, between November 2015 and December 2015.

PRICES COLLECTION COVERAGE FOR BOTSWANA CONSUMER PRICE INDEX (CPI)- 2015

Glossary

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Domestic Tradable refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradable represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradable refers to the goods and services which a country cannot either export or import to other countries.

All –Tradable refers to the total of **Domestic** and **Imported tradable**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
