# Preface

This statistical release contains the fourth quarter of 2025 Gross Domestic Product (GDP) estimates by economic activity and components of final demand, at current and constant prices.

Botswana's National Accounts are compiled according to the 2008 System of National Accounts (2008 SNA) framework. The accounts presented in this publication adhere to the enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund (IMF), which sets out standards for coverage, periodicity and timeliness of data.

**The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies, in which some differences and inconsistencies in the previously published data may be observed.**

These estimates are not seasonally adjusted, hence the variations may differ depending on the quarters.

The nominal Gross Domestic Product for the fourth quarter of 2025 was P67, 624.4 million compared to P67, 538.5 million registered during the previous quarter. This represents a quarterly increase of 0.1 percent in nominal terms between the two periods. During the quarter under review, Public Administration and Defence became the major contributor to GDP at 18.2 percent, followed by Wholesale & Retail Trade at 13.2 percent, Construction at 12.1 percent and Mining & Quarrying at 6.8 percent.

Real GDP for the fourth quarter of 2025 contracted by 5.4 percent compared to a decline of 1.9 percent registered in the same quarter of the previous year.

## 1. Quarterly Gross Domestic Product (QGDP)

Quarterly Gross Domestic Product estimates assist in the analysis of short-term movements in the economy, as opposed to the annual GDP, which provides an in-depth and comprehensive view of the changes in the economy. Quarterly National Accounts adopt the same concepts, definitions and structure as Annual National Accounts.

### 1.1 Revisions

Revisions to the National Accounts are an integral component of the compilation process, as they facilitate the incorporation of more comprehensive and higher-quality data that may not have been available at the time of the initial release.

No revisions have been undertaken for the quarterly Gross Domestic Product (GDP) estimates published in December 2025. The estimates remain unchanged as no additional or updated source data had been received to warrant adjustments. Consequently, the previously published figures for all industries remain valid.
