

Monthly Digest - December 2016
No. 2017/02

Contact Statistician: Malebogo Rakgantswana Email: mrakgantswana@statsbots.org.bw Tel: (+267) 3671300
Release Date: February 2017

## Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods at the end of December 2016. Data is complete up to October 2016. Figures for November 2016 are from automated borders only, constituting about 99 percent of total expected monthly trade in value terms. As from December 2016 data onwards, Customs \& Excise has achieved 100 percent automation of Botswana border posts and as such no manual data is expected.

Changes in data for corresponding months when comparing the current digest and the previous ones may be attributed to data from transactions which had deferred customs duty assessments. The data for transactions which had deferred customs duty assessments would only become available at a later stage after customs duty assessments have been completed.

This Monthly Digest also presents summaries of Total Merchandise Trade from January 2014 to December 2016 as presented in Table 1. Trade by Principal Commodity groups is presented in Table $\mathbf{2 . 1}$ for imports and Table $\mathbf{2 . 2}$ for exports. Table $\mathbf{2 . 3}$ gives trade on diamonds only. Direction of trade appears in Table 3.1A (imports) and Table 3.2A (total exports), presenting Principal Commodity groups by partner country and region for December 2016 only. The major trading partner countries by individual commodities for December 2016 appear in Table 3.1B and Table 3.2B for imports and exports respectively. Table B displays trade by mode of transport for both imports and exports.

Five graphical presentations appear in this digest. Chart 1.1 shows imports, total exports and trade balance from January 2012 to December 2016. Charts 2.1 and 2.2 show Principal Commodity groups for imports and exports respectively, for December 2016 only. Charts 3.1 and 3.2 show imports and exports by major trading partner countries for the month under review.

Table 1 distinguishes domestic exports from re-exports while other tables show total exports only, which is the sum of the two (domestic exports and re-exports).

For more information contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana publications are available on the website at www.statsbots.org.bw, and at the Statistics Botswana Library (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to better serve important users of our products and services.

### 1.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports, re-exports and trade balance.

### 1.1 Data Revision

Table A presents revised data from September to November 2016. Imports for September 2016 increased slightly by 0.1 percent (P5.8 million) from P5, 323.0 as at November 2016 digest to P5, 328.8 million as at the release of December 2016 digest. October 2016 import value also increased by 0.1 percent (P8.0 million) from P6, 211.6 million as at the release of November 2016 digest to P6, 219.6 million as at the release of December 2016 digest. November 2016 imports increased by 1.0 percent (P56.8 million) from P5, 783.6 million as at November 2016 digest to P5, 840.4 million as at December 2016 digest.

Total Exports for September 2016 recorded a slight increase of 0.1 percent (P5.2 million) from P8, 464.6 million during the release of November 2016 digest to P8, 469.7 million during the current release. November 2016 export value also increased by 0.1 percent (P8.8 million) from P7, 324.7 million as at the release of November 2016 digest to to P7, 333.5 million during the release of December 2016 digest.

The increases are as a result of inclusion of new data from transactions that had deferred customs duty assessments.

Discussions on Sub-Sections 1.2 to 1.4 are based on Table 1.

### 1.2 Imports

Discussions on imports are based on cost, insurance and freight (CIF) value and associated figures are presented on Table 1 and Table 2.1. December 2016 total imports were valued at P5, 175.6 million, showing a decrease of 11.4 percent (P664.8 million) from the revised November 2016 value of P5, 840.4 million. The decrease is mainly influenced by Machinery \& Electrical Equipment with a decrease of 22.1 percent (P204.2 million) from P922.6 million in November 2016 to P718.4 million in December 2016. Other commodity groups that contributed significantly towards the decrease were Food, Beverages \& Tobacco with a decrease of 22.6 percent (P181.5 million) from P804.0 million to P622.5 million and Chemicals \& Rubber Products with a decrease of 16.6 percent (P92.1 million) from P555.7 million to $P 463.6$ million during the periods under consideration.

Comparison of import figures for December 2016 and December 2015 shows a decrease of 19.2 percent (P1, 230.9 million), from P6, 406.5 million recorded during December 2015 to P5, 175.6 million recorded during the reference month. The decrease was mainly due to the 29.9 percent (P703.2 million) decrease in the import value of Diamonds, from P2, 354.5 million during December 2015 to P1, 651.4 million in December 2016.

### 1.3 Total Exports

December 2016, total exports were valued at P5, 151.6 million, showing a decrease of 29.8 percent ( $\mathrm{P} 2,181.9$ million) from the November 2016 revised value of P7, 333.5 million. This decrease is mainly due to a decline of 29.2 percent (P1, 962.8 million) in Diamond exports, from P6, 727.5 million in November 2016 to P4, 764.8 million in December 2016 (Table 2.2)

The total exports value for the period under review, compared to that of December 2015 shows a decrease of 2.8 percent (P146.7 million) from P5, 298.3 million recorded during December 2015 to P5, 151.6 million recorded during December 2016. The decrease is mainly atributed to the fall in exports of Copper \& Nickel, which dropped by 99.8 percent (P406.9 million) from P407.5 million in December 2015 to P 0.6 million during the period under review (Table 2.2). The decline in Copper \& Nickel is due to the closure of the main mine producing these minerals in October 2016. Copper \& Nickel group includes products of the two minerals and the P0.6 million is the value for Copper waste \& Scrap.

### 1.4 Trade Balance

Botswana recorded a trade surplus of P1,541.1 million in December 2016. This was influenced by more than 100 percent rise in exports of diamonds while imports of the same commodity declined by 19.0 percent during the month under review.

Chart 1.1: Total International Merchandise Trade - January 2012 to December 2016 (Million PULA)

### 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery \& Electrical Equipment" which combines machines and electrical appliances; "Vehicles \& Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes a challenge to come up with further groups of related chapters or commodities. This occurs when commodity groups' contributions to the total remain minimal. In such cases, the commodities are grouped together under the general category called "Other".

### 2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on Table 2.1, covering January 2014 to December 2016. Percentage distributions are however only shown for totals of 2014, 2015 as well as for November and December 2016. Chart 2.1 gives graphical presentation of Principal Import Commodity groups for December 2016.

Composition of imports by principal commodities for December 2016 shows that Diamonds contributed the most to total imports ( $\mathrm{P} 5,175.6$ million), with 31.9 percent ( $\mathrm{P} 1,651.4$ million), followed by Machinery \& Electrical Equipment with 13.9 percent (P718.4 million). Food, Beverages \& Tobacco and Fuel contributed 12.0 percent each, at values of P622.5 million and P620.7 million respectively. Chemicals \& Rubber Products and Vehicles \& Transport Equipment contributed 9.0 percent (P463.6 million) and 6.8 percent (P353.6 million) respectively to total imports during the month under review. Percentage distributions for other commodity groups during December 2016 can be viewed on Table 2.1 and Chart 2.1.

Chart 2.1: Principal Imports Composition - December 2016

Note: Other Goods include all other goods not specified as in Table 2.1

### 2.2 Principal Exports

Total exports for December 2016 were valued at P5, 151.6 million, with 92.5 percent (P4, 764.8 million) attributed to exports of Diamonds.

Salt \& Soda Ash and Meat \& Meat Products contributed 1.2 percent each, at values of P63.8 million and P60.7 million respectively, followed by Machinery \& Electrical Equipment with 1.0 percent (P53.8 million) to total exports during the month under review. Most exports of Machinery \& Electrical Equipment are reexports.

Percentage distributions for major export groups can be observed on Table 2.2, while Chart $\mathbf{2 . 2}$ gives graphical presentation for December 2016.

Chart 2.2: Principal Exports Composition-December 2016

Note: Other Goods include all other goods not specified as in Table 2.2

### 3.0 DIRECTION OF TRADE

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data by major trading partner countries, region and principal commodity groups for imports and exports, during December 2016 appear on Table 3.1A \& Table 3.2A respectively. Table 3.1B (imports) and Table 3.2B (exports) display the major sources and destinations by individual commodities during the month under review.

### 3.1 Imports by Major Trading Partner Countries and Regions

Discussions that follow relate to imports at both region and partner country level as displayed in Chart 3.1 and Tables 3.1 A and B. Imports for December 2016 were valued at P5, 175.6 million. Southern African Customs Union (SACU) was the major source of imports into Botswana, accounting for 75.3 percent (P3, 898.6 million) of total imports (Table 3.1A). South Africa was the main source of imports within the Union, with a contribution of 64.8 percent (P3, 353.0 million) to total imports, followed by Namibia with 10.4 percent (P538.7 million), during December 2016 as shown in Table 3.1A and Table 3.1B.

The major commodities imported from South Africa were; "Non-industrial diamonds unworked or simply sawn, cleaved or bruited", "Petrol" and "Distillate fuel" with contributions of 16.5 percent (P554.5 million), 8.4 percent (P281.7 million) and 6.2 percent (P206.9 million) respectively, of total imports from that country as shown in Table 3.1 B.

The other region that was the main source of imports during December 2016 was Asia, having supplied imports valued at P528.2 million, representing 10.2 percent of total imports during the month. India and China were the most contributors to imports sourced from Asia, with 4.3 percent ( P 220.5 million) and 2.3 percent (P120.2 million) respectively, of total imports during the month under review (refer to Table 3.1A).

The European Union (EU) supplied imports valued at P220.7 million, accounting for 4.3 percent of total imports during the month under review. The main suppliers of imports from this region were Belgium and Germany with 1.8 percent (P94.6 million) and 1.0 percent (P51.1 million) respectively, of total imports during December 2016 (Tables 3.1A and B). The main commodities imported from Belgium were "Nonindustrial diamonds unworked or simply sawn, cleaved or bruited", at 79.2 percent (P74.9 million) and "Non-industrial diamonds, not mounted or set, NES", at 17.6 percent (P16.6 million) of total goods sourced from the country, while from Germany imports comprised mostly "Electrical Machinery and Parts thereof; Sound Recorders and Reproducers, Television image and Sound recorders and reproducers and parts and accessories of such articles." (Chapter 85) (Refer to Table 3.1B).

Imports from Canada were valued at P304.9 million, representing 5.9 percent of total imports during December 2016, comprising mainly, of "Unsorted Diamonds", with a contribution of 93.5 percent (P285.2 million) of total imports from the country. The United States of America (USA) contributed 1.6 percent (P84.5 million) to total imports.

Chart 3.1 gives the graphical presentation of imports by major trading partner countries during December 2016.

Chart 3.1: Imports by Major Trading Partner Countries-December 2016

### 3.2 Exports by Major Trading Partners Countries and Regions

Discussions under this sub-section are based on Tables 3.2 A and B.
As presented on Table 3.2A, Asia as a block received exports valued at P2, 510.1 million, representing 48.7 percent of total exports (P5, 151.6 million) during December 2016. Exports destined to India and the United Arab Emirates (UAE) accounted for 21.1 percent (P1, 087.9 million) and 12.4 percent (P641.0 million) respectively, of total exports during the month under review. Israel and Hong Kong respectively received 8.3 percent ( P 425.8 million) and 4.8 percent ( P 248.2 million), of total exports during the period under review.

Table 3.2B shows that the major commodity exported to India, the UAE, Israel and Hong Kong was "Non-industrial diamonds unworked or simply sawn, cleaved or bruited", accounting for 98.9 percent (P1, 076.2 million) of all exports to India, 90.1 percent (P577.8 million) of all exports to the UAE, 65.7 percent (P279.6 million) of all exports to Israel and 53.5 percent (P132.9 million) of all exports to Hong Kong during December 2016.

Exports destined to the EU were valued at P1, 439.2 million, representing 27.9 percent of total exports during the period under review, with Belgium as the main destination having received 27.0 percent (P1, 391.2 million) of total exports during the month (Table 3.2A). The major commodity exported to Belgium was "Non-industrial diamonds unworked or simply sawn, cleaved or bruited" accounting for 91.0 percent ( $\mathrm{P} 1,266.3$ million) of all exports destined to that country (Table 3.2B).

Table 3.2A also shows that exports destined to SACU region constituted 14.3 percent (P739.0 million) of total exports during December 2016 (P5, 151.6 million). Exports destined to South Africa were valued at P427.8 million, representing 8.3 percent of total exports, followed by Namibia with a value of P310.7 million representing 6.0 percent of total exports during the month under review. The major commodity exported to both South Africa and Namibia was "Non-industrial diamonds unworked or simply sawn, cleaved or bruited" accounting for 53.8 percent (P230.0 million) and 90.0 percent (P279.6 million) respectively, of total exports to those countries (refer to Table 3.2B).

Some of the top export destinations during December 2016 were Canada, Switzerland and the USA, having received 3.2 percent ( P 165.5 million), 2.4 percent ( P 122.9 million) and 1.5 percent ( P 76.8 million) respectively, of total exports during the same period (Table 3.2A).

Other destinations for exports can be observed on Table 3.2 A and B. Chart 3.2 gives the graphical presentation of exports by major trading partner countries for December 2016.

Chart 3.2: Exports by Major Trading Partner Countries-December 2016

### 4.0 Imports and Exports by Mode of Transport

The main modes of transport for Botswana international merchandise trade are Road, Air and Rail. The mode of transport here refers to the means of transporting goods in and out of Botswana. Statistics relating to mode of transport is presented in Table B. During December 2016, Road transport accounted for more than half of goods imported into Botswana in value terms. Imports valued at P2, 845.5 million, signifying 55.0 percent of total imports during the month under review, reached Botswana borders by road. Air and Rail accounted for 27.8 percent ( $\mathrm{P} 1,439.2$ million) and 17.2 percent ( P 890.9 million) respectively, of total imports during the same month.

Botswana Exports mainly use Air as means of transport when considering at the value of exported commodities. The value of exports is highly dependent on diamonds, which are transported by air. During the same period, Air Transport accounted for 94.5 percent (P4, 868.8 million) of total exports out of Botswana of which 92.5 percent ( $\mathrm{P} 4,764.8$ million) was contributed by Diamonds. Road transport accounted for 4.7 percent (P242.9 million) while goods transported by rail represented 0.8 percent (P39.6 million) of total exports during the month under review.

Table B: Imports and Total Exports by Mode of Transport, Value and Percentage Distribution- December 2016 (Million Pula)

Table 3.1B: Major Import Sources by Commodity-December 2016 (Million Pula)

Table 3.1B Continued: Major Import Sources by Commodity-December 2016 (Million Pula)

| Commodity Code | Partner \Commodity Description | Dec_2016 |  |
| :---: | :---: | :---: | :---: |
|  |  | Value | \% |
| 30059090 | Other wadding,gauze,bandages and similar article---other | 1.2 | 1.0 |
| 84151010 | Of a kind used for buildings,compressor operated,having a rated cooling capacity<8.8kW | 1.2 | 1.0 |
| 85273100 | Radio receivers, NES, with sound recording/reproducing apparatus | 1.2 | 1.0 |
| 85423100 | Processors and controllers, wherether or not combinewith memories, and timing circuits | 1.2 | 1.0 |
| 84819090 | Other parts of goods of sub-heading 8481. | 1.1 | 1.0 |
|  | Total Major Imports | 68.0 | 56.6 |
|  | Other Imports | 52.2 | 43.4 |
|  | Total China | 120.2 | 100.0 |
|  | Total China as a Percentage of Total Imports |  | 2.3 |
|  | Belgium |  |  |
| 71023100 | Non-industrial diamonds unworked or simply sawn, cleaved or bruted | 74.9 | 79.2 |
| 71023900 | Non-industrial diamonds, not mounted or set, NES | 16.6 | 17.6 |
| 30039000 | Other medicaments with >=2 constituents, not for retail sale, NES | 1.1 | 1.2 |
| 90230000 | Instruments, apparatus and models designed for demonstrational purposes | 0.9 | 1.0 |
|  | Total Major Imports | 93.6 | 98.9 |
|  | Other Imports | 1.0 | 1.1 |
|  | Total Belgium | 94.6 | 100.0 |
|  | Total Belgium as a Percentage of Total Imports |  | 1.8 |
|  | USA |  |  |
| 87059000 | Special purpose motor vehicles, NES (eg breakdown lorries, etc) | 48.1 | 56.9 |
| 84099990 | Other parts suitable for use solenly with engines of heading 8407 \& 8408 NES | 9.5 | 11.3 |
| 73069000 | Tubes, pipes and hollow profiles, riveted, of iron or steel, NES | 4.6 | 5.4 |
| 39041000 | Polyvinyl chloride, not mixed with other substances, in primary forms | 3.0 | 3.6 |
| 84833090 | Bearings housings, not incorporating ball or roller bearings;plain shaft bearings--other | 2.1 | 2.5 |
| 88039000 | Parts of aircraft (excl. aeroplanes/helicopters) | 1.2 | 1.4 |
| 86079900 | Parts of railway or tramway rolling stock, NES | 1.2 | 1.4 |
| 84323000 | Seeders, planters and transplanters | 1.1 | 1.3 |
| 84798200 | Machines for mixing, kneading, crushing,grinding,..., having individual functions | 1.0 | 1.1 |
| 88033000 | Parts of aeroplanes or helicopters, NES | 0.9 | 1.0 |
|  | Total Major Imports | 72.7 | 86.0 |
|  | Other Imports | 11.8 | 14.0 |
|  | Total USA | 84.5 | 100.0 |
|  | Total USA as a Percentage of Total Imports |  | 1.6 |
|  | Mozambique |  |  |
| 27101230 | Distilate fuel | 64.5 | 78.4 |
| 27101202 | Petrol | 15.3 | 18.6 |
| 27101207 | Aviation, kerosene | 1.1 | 1.3 |
|  | Total Major Imports | 80.9 | 98.3 |
|  | Other Imports | 1.4 | 1.7 |
|  | Total Mozambique | 82.3 | 100.0 |
|  | Total Mozambique as a Percentage of Total Imports |  | 1.6 |
|  | Germany |  |  |
| 85472000 | Insulating fittings of plastics for electrical machines... | 6.9 | 13.6 |
| 85389090 | Other parts suitable for use with the apparatus of heading no.85.35,85.36 or 85.37 NES | 5.7 | 11.1 |
| 85369020 | Identifiable for use or principally with motor vehicles | 5.4 | 10.6 |
| 85444290 | Other electric conductors, for a voltage not exceeding 1000 V fitted with connectors | 5.2 | 10.3 |
| 85444990 | Other electric conductors, for a voltage not exceeding 1000 V | 3.9 | 7.7 |
| 84592900 | Drilling machines for removing metal, NES | 3.5 | 6.8 |

### 6.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs \& Excise Division at the Botswana Unified Revenue Service (BURS). The Customs \& Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (ex-warehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance \& freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 6.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 6.2 Concepts and Definitions

Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.

Re - Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.

Total exports: This is the sum of domestic exports and re-exports
Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 6.3 Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as direct permanent exports. This was based on IMTS 2010 Compilers' Manual (Page 225) and IMTS 2010 Concepts \& Definitions;
Page 16; Paragraph 1.20 concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

### 6.3.1 Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are now being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a followup document, referred to as "attached document" will show a disaggregation of these imports according to the various countries that contributed to the consignment.
l. In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country
III. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment
III. If part of the consignment was originally from Botswana, that part is recorded as re-import and will form part of total imports.

### 6.3.2 Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The "attached document", giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. As per IMTS 2010 Concepts \& Definitions, goods resulting from processing are to be included in merchandise trade at their full value and as direct permanent exports (Domestic exports) in case they are exported (IMTS Concepts \& Definitions; page 16, paragraph 1.20). As a result of this, diamonds that originated from outside Botswana as well as those originating from Botswana are recorded as direct permanent exports or domestic exports.

Both diamonds originating from Botswana and those that originated from elsewhere have always been recorded under Domestic Exports.
Values for diamonds that originated from elsewhere can be provided separately if needed.

### 6.4 Exclusions from IMTS

- Goods in Transit

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country

- Goods temporarily admitted or dispatched

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

- Monetary Gold

This is gold to which the monetary authorities have title and is held as reserve assets.

- Issued banknotes and securities and coins in circulation

These goods represent evidence of financial claims and are excluded from IMTS
The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
