# Preface

This report is a revision of the original. The revision is in **tables 1.0, 2.2 and 3.2. Table 1.0 : Total Merchandise Trade - January 2020 to February 2023 (Million Pula)** , It was realised that the Period for this table was mistakenly detailed. **Table 2.2 : Principal Export Commodity Groups - January 2021 to February 2023 (Million Pula), Table 3.2A: Total Exports by Country, Region and Principal Export Commodity Groups – February 2023 (Million Pula) and Table 3.2B: Principal Export Commodity Groups as a Percentage of Total Exports at Country and Regional Level – February 2023:** The old table headings were used instead of the revised ones.

International Merchandise Trade Statistics measures the movement of goods across the border of a country, hence has a vital role in the world economy as it accounts for all transactions of goods between trading partners. The transaction reflects the value and quantity of goods that add to (Imports) or subtract from (Exports) the stock of material resources of a country. Trade statistics remain one of the major indicators of the performance of a country's economy and its competitiveness in the world market.

The monthly International Merchandise Trade Statistics are used extensively in the compilation of national accounts and balance of payments. Furthermore, these statistics are used by government institutions and other stakeholders for trade negotiations and other various purposes.

This publication outlines Botswana's monthly International Merchandise Trade Statistics (IMTS) for February 2023. It shows summaries of total international merchandise trade as presented in **Table 1.0**. Trade by principal commodity groups is presented in **Table 2.1** for imports and **Table 2.2** for exports, while **Table 2.3** gives trade on diamonds only. The direction of trade appears in **Table 3.1A** (imports) and **Table 3.2A** (total exports). Major trading partner countries by commodity groups, as a percentage of trade at the region or country level, for February 2023 are presented in **Table 3.1B** for imports and **Table 3.2B** for exports. **Tables 4.1A** and **4.1B** present statistics on the most imported and most exported commodities (excluding Diamonds) during February 2023 respectively.

Changes in data for the corresponding months in the current versus previous digests may be attributed to data from transactions that had deferred customs duty assessments. The data for such transactions would only be available at a later stage after customs duty assessments have been completed.

International trade statistics by mode of transport are collected for the 'active modes of transport (road, rail, air) with which goods are presumed to leave or enter the statistical territory of the country. Such data may be used to formulate transport policy, monitor international transport routes or assess the impact of international trade on the environment.

The top traded commodities for both flows are presented in **Table 4.1A** for imports and **Table 4.1B** for exports. This is to guide users on opportunities to produce commodities for import substitution or possible exportation.

# Executive Summary

This International Merchandise Trade Statistics (IMTS) monthly digest provides a summary of trade statistics on Botswana's total imports and exports of goods for February 2023.

Botswana's merchandise imports in February 2023 were valued at P6, 844.4 million, compared to the revised January 2023 value of P5, 994.3 million, a rise of 14.2 percent. Total exports amounted to P5, 094.6 million, a decline of 29.3 percent from the revised January 2023 value of P7, 210.5 million.

The leading import commodity groups were Diamonds with a contribution of 19.1 percent, followed by Fuel with 18.8 percent. Food, Beverages & Tobacco, Machinery & Electrical Equipment, and Chemicals & Rubber Products contributed 18.2 percent, 12.4 percent and 11.1 percent, to total imports respectively. Diamonds, Copper and Machinery & Electric Equipment contributed 77.0 percent, 8.7 percent and 5.1 percent to total exports respectively, during the reference period.

In February 2023, imports from the Southern African Customs Union (**SACU**) made a contribution of 68.9 percent, whilst those from Asia and the European Union (**EU**) accounted for 8.5 percent and 3.6 percent of total imports respectively. Imports from South Africa accounted for 63.7 percent while those from Canada and Namibia accounted for 13.5 percent and 5.0 percent of total imports respectively.

Exports destined to Asia, **SACU** and the **EU** accounted for 67.8 percent, 17.8 percent and 9.5 percent of the total exports, respectively, during the month under review. The United Arab Emirates (**UAE**), South Africa and India received exports representing 28.2 percent, 15.2 percent and 12.3 percent of the monthly total, in that order. Belgium received 9.5 percent of total export during February 2023.

During the current period, imports transported by Road accounted for 69.6 percent whereas those entering the country by Air and Rail represented 19.2 percent and 11.2 percent, respectively. Exports by Air accounted for 78.8 percent of total exports, while those by Road and Rail transport represented 20.7 percent and 0.5 percent respectively.

Merchandise worth P 31, 910.5 million transited through the country to various destinations. Goods accounting for 41.8 percent of total goods in transit were transported through Martins Drift Border post. Kazungula Bridge and Mamuno border posts followed with 37.0 percent and 10.1 percent of the total transiting goods.

## 1.0 Total Trade

Total merchandise trade refers to imports, domestic exports, re-exports and trade balance. The discussions are based on February 2023, which is also referred to as the reference period, the period under review or the current month, throughout the digest.

## 1.1 Data Revision

The current monthly digest is based on preliminary figures as regards the reference period. Revisions to the monthly data are subsequently made when new information becomes available. Revisions are made on a monthly basis, when monthly data files are uploaded into the database, bringing additional information for previous months. In some instances, revisions are negligible while significant in others.

Transactions for January 2023 had significant revisions brought by late customs duty assessments which were undertaken in February 2023. **Table A** shows revised data, comparing figures as at the January 2023 Digest and the current. As shown in **Table A** below, both trade flows were revised upwards, that is; Imports by 2.8 percent and Total exports by 11.8 percent.

**Table A: Data Revision: January 2023 (Million Pula)**

## 1.2 Imports

Imports are valued at Cost, Insurance & Freight (CIF), which includes the cost of the commodity, insurance and freight charges, but excludes customs or any other duties paid on arrival. In February 2023, the value of total imports was P6, 844.4 million, registering an increase of 14.2 percent (P850.1 million) from the revised January 2023 figure of P5, 994.3 million. The increase was mostly attributed to a rise in the importation of Food, Beverages & Tobacco and Diamonds by 40.3 percent (P357.5 million) and 32.4 percent (P320.4 million), respectively as shown in **Table 2.1**.

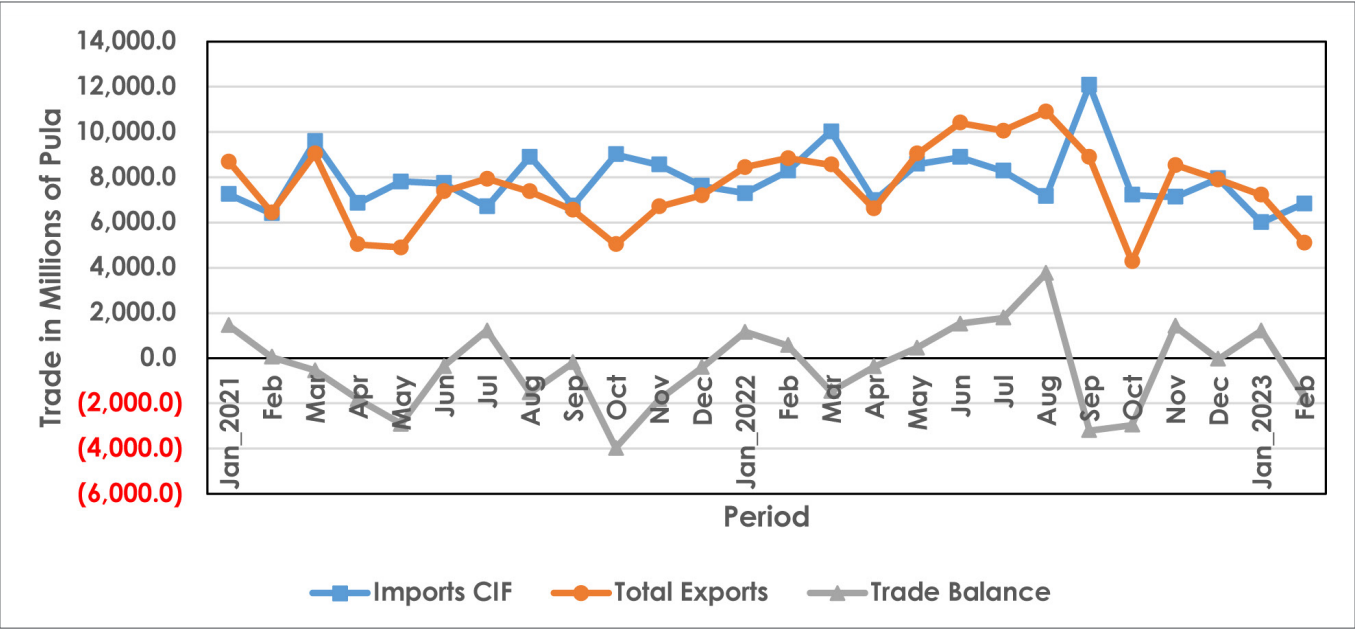

## 1.3 Total Exports

Botswana registered a drop of 29.3 percent (P2, 115.8 million) in total export value, from the revised January 2023 figure of P7, 210.5 million to P5, 094.6 million in February 2023. The main contributor to the decrease in total exports was Diamonds, having decreased by 34.6 percent (P2, 070.6 million) from a revised January 2023 value of P5, 991.8 million to P3, 921.2 million in the current month, as displayed in **Table 2.2**.

## 1.4 Trade Balance

In February 2023 Botswana registered a trade deficit of P1, 749.7 million. **Chart 1.0** displays the graphical presentation of the trade balance from January 2021 to February 2023.

Chart 1.0: Total International Merchandise Trade – January 2020 to February 2023 (Million Pula)

2.0 Trade by Principal Commodity Groups

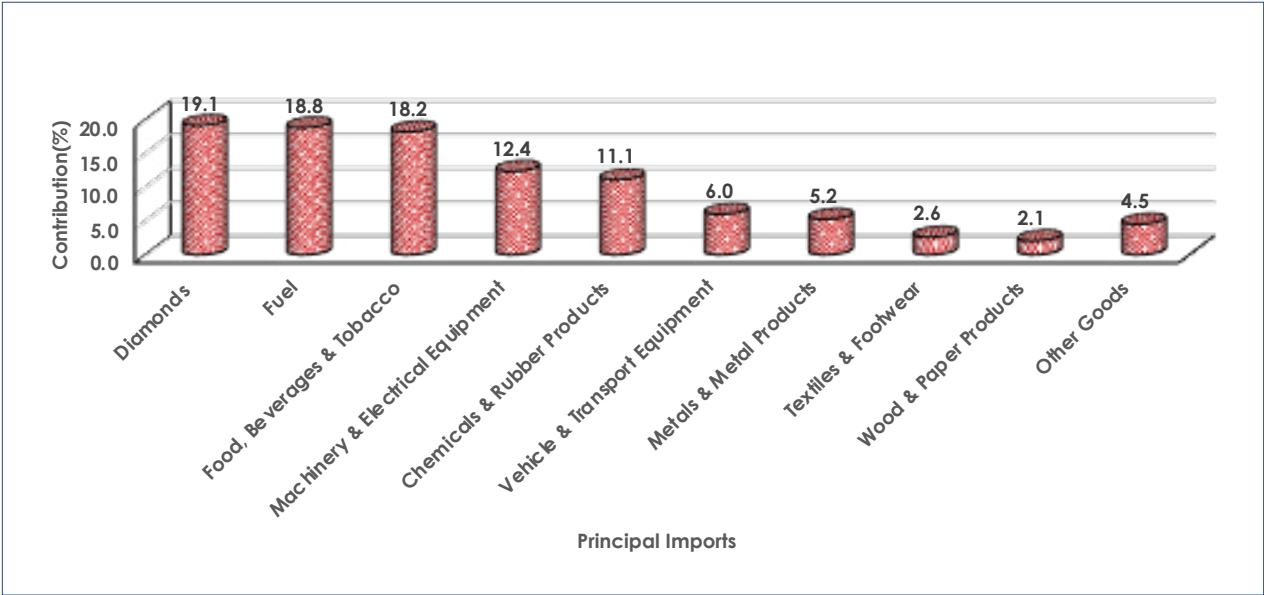

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters or commodities, for example 'Vehicles & Transport Equipment' combines vehicles and other equipment used for transport purposes.

In cases where it becomes a challenge to come up with further groups of related chapters or commodities, the remaining commodities are grouped together under the general category called 'Other'. This occurs when a commodity group's contribution to the total is minimal.

2.1 Principal Imports

During February 2023, Botswana received imports valued at P6, 844.4 million. The top import groups were; Diamonds; Fuel; Food, Beverages & Tobacco, Machinery & Electrical Equipment and Chemicals & Rubber Products. Diamonds and Fuel imports contributed 19.1 percent (P1, 309.2 million) and 18.8 percent (P1, 286.3 million) of total imports respectively. Food, Beverages & Tobacco, Machinery & Electrical Equipment and Chemicals & Rubber Products followed with contributions of 18.2 percent (P1, 245.5 million), 12.4 percent (P845.3 million) and 11.1 percent(P759.9 million) to total imports respectively. Contributions made by other commodity groups can be viewed in [Table 2.1](#) and [Chart 2.1](#).

Chart 2.1: Composition of Principal Imports-February 2023 (Percentage)

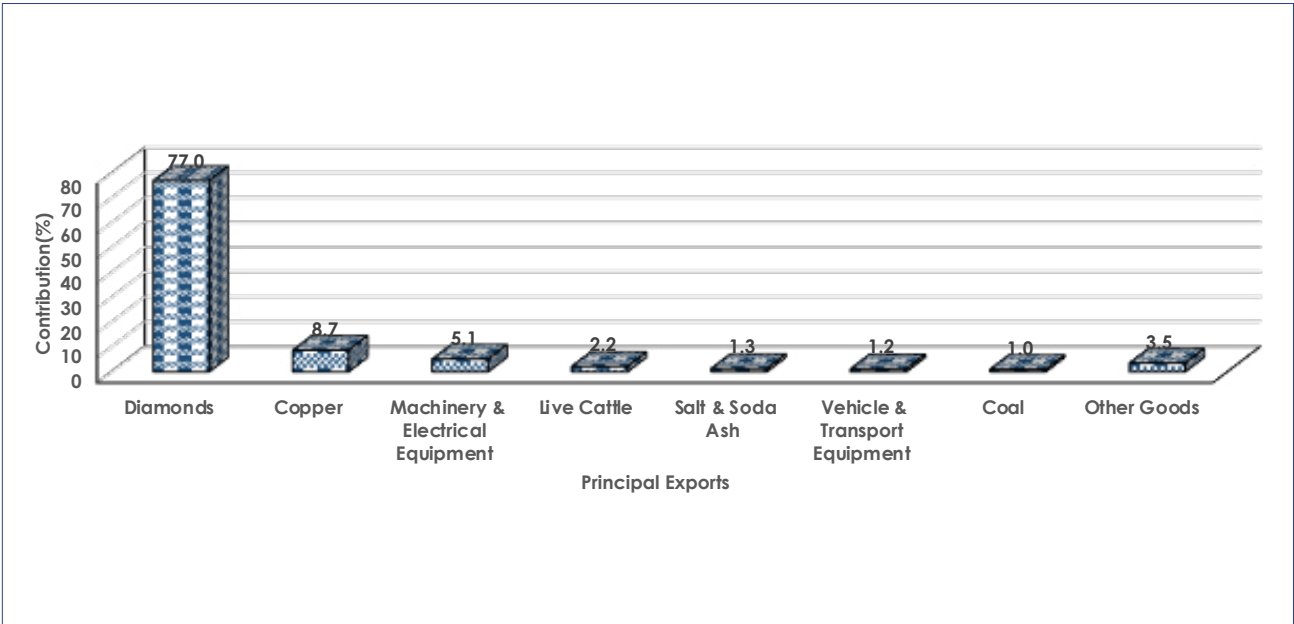

**Note:** 'Other Goods' here includes any other goods not displayed as in Table 2.1

2.2 Principal Exports

Botswana exported merchandise valued at P5, 094.6 million in February 2023. The Diamonds group accounted for 77.0 percent (P3, 921.2 million), followed by Copper at 8.7 percent (P443.4 million). Contributions made by other commodity groups are presented in [Table 2.2](#) and [Chart 2.2](#).

**Note:** 'Other Goods' here includes any other goods not displayed as in Table 2.2

## 3.0 Direction of Trade

The direction of Trade analyses the value of merchandise trade disaggregated according to a country's primary trading partners. As a result the direction of trade discusses the last known destination for exports and sources of imports. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Trade by major trading partner countries, regions and principal commodity groups for imports and exports, during February 2023 appears in [Table 3.1A](#) and [Table 3.2A](#), respectively. [Table 3.1B](#) (imports) and [Table 3.2B](#) (exports) show percentage distributions for major sources and destinations by principal commodity groups during the same month.

### 3.1 Imports by Major Trading Partner Countries and Regions

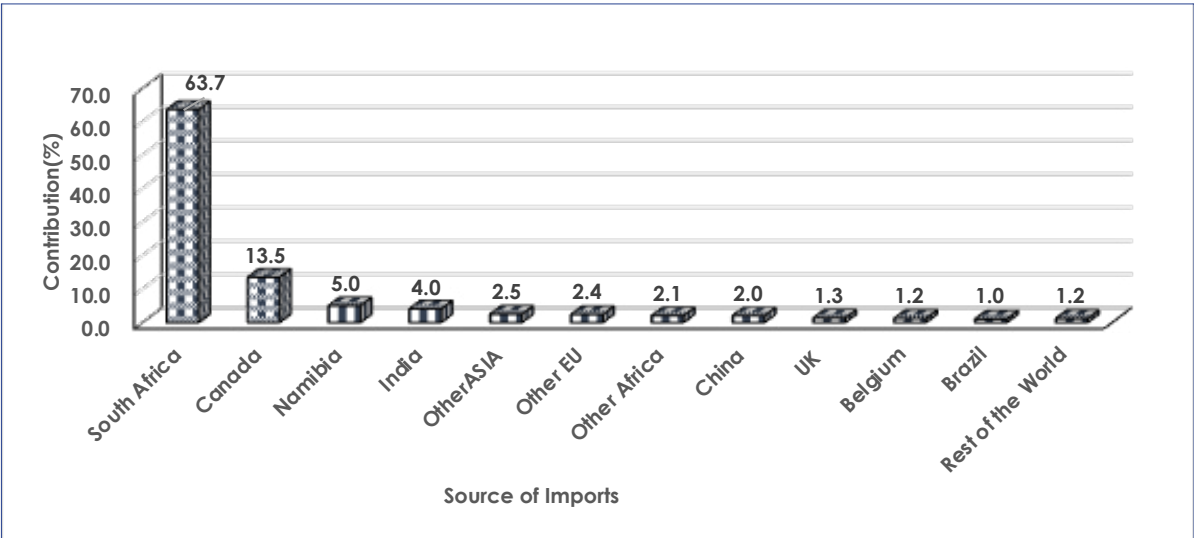

Botswana imported goods worth P6, 844.4 million, in February 2023. The **SACU** region was the top supplier at 68.9 percent (P4, 716.8 million) to the total. The top most imported commodity groups from the customs union were; Fuel; Food, Beverages & Tobacco and Chemicals & Rubber Products with contributions of 26.3 percent (P1, 240.1 million), 23.7 percent (P1, 120.2 million) and 12.7 percent (P597.4 million), respectively. Within the SACU region, South Africa and Namibia were Botswana's main sources of imports during the reporting period. The countries supplied 63.7 percent (P4, 358.8 million) and 5.0 percent (343.3 million) of Botswana's total imports.

Asia supplied imports worth P584.8 million, representing 8.5 percent of Botswana's total imports. The major commodity groups imported were Diamonds, Machinery & Electrical Equipment and Chemicals & Rubber Products with contributions of 47.5 percent (P277.9 million), 15.5 percent (P90.5 million) and 14.4 percent (P84.5 million) of total imports from the block, respectively. India and China made contributions of 4.0 percent (P276.8 million) and 2.0 percent (P137.5 million) to total imports respectively, during the month under review.

Botswana received imports worth P245.9 million (3.6 percent) from the EU in February 2023. Belgium supplied 1.2 percent (P82.5 million) of all the imports. The major commodity groups imported from the EU were Machinery & Electrical Equipment, Diamonds and Chemicals & Rubber Products at 31.6 percent (P77.7 million), 30.7 percent (P75.4 million) and 20.6 percent (P50.7 million) of total imports from the union, respectively.

In February 2023, Canada contributed 13.5 percent (P925.9 million) of total imports. Sources of imports during January 2023 can be viewed in [Table 3.1 A](#) and [Chart 3.1](#).

3.2 Exports by Major Trading Partner Countries and Regions

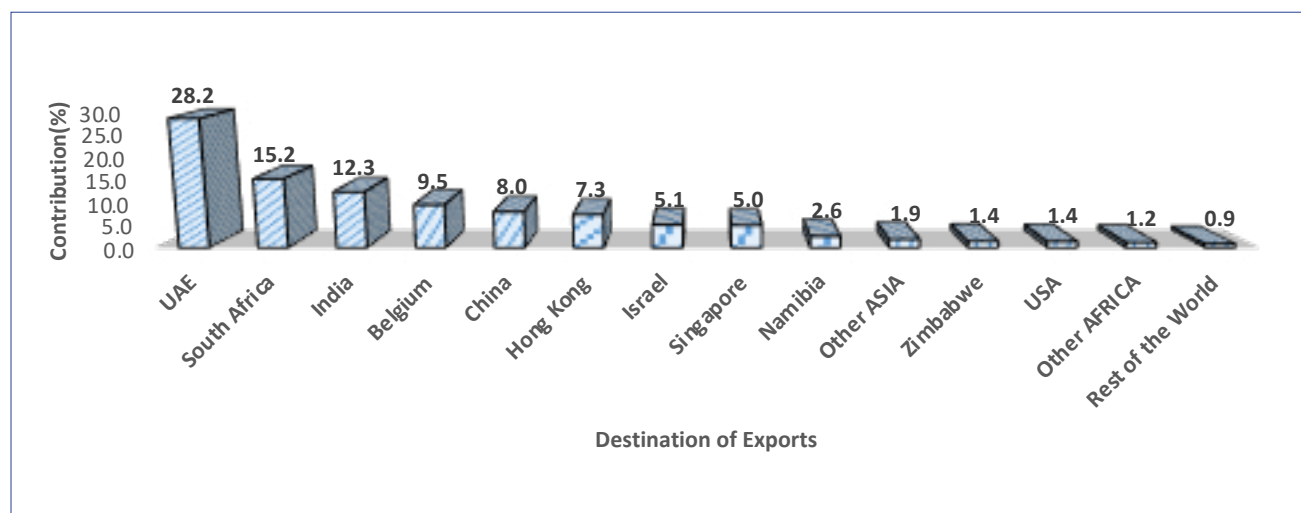

Botswana exported merchandise valued at P5, 094.6 million in February 2023. Regarding the top export destinations, Asia was the largest export market for Botswana, having received 67.8 percent (P3, 453.6 million) of total exports. These exports were mainly destined for the UAE, India, China and Hong Kong at 28.2 percent (P1, 437.8 million), 12.3 percent (P627.5 million), 8.0 (P405.6 million) and 7.3 percent (P373.1 million) of total exports, respectively. Diamonds was the major commodity group exported to Asia, at 88.0 percent (P3, 040.2 million) followed by Copper at 11.7 percent (P405.6 million), as shown in Table 3.2A and Table 3.2B.

Exports destined to the SACU region amounted to P907.2 million, accounting for 17.8 percent of total exports. Diamonds, Machinery & Electrical Equipment and Live Cattle were the major commodity groups exported to the customs union, accounting for 36.3 percent (P329.0 million), 26.3 percent (P238.7 million) and 11.9 percent (P107.6 million) of total exports to the regional block respectively. South Africa and Namibia were the main recipients of SACU destined exports at 15.2 percent (P774.5 million) and 2.6 percent (P131.7 million), respectively.

The EU received exports amounting to P484.9 million, representing 9.5 percent of total exports during the month. Belgium received almost all the exports destined for the union, having received 9.5 percent (P484.6 million) of total exports. Diamonds was the main commodity group exported to the EU at 99.9 percent (P484.4 million), as displayed in Table 3.2A and Table 3.2B.

The USA received exports worth P71.4 million, representing 1.4 percent of Botswana's total exports. The major commodity group exported to the USA was Diamonds at 91.5 percent (P65.3 million) of exports to that country. Contributions made by other commodity groups are presented in Table 3.2A and Table 3.2B.

## 4.0 Imports and Exports by Top imported and Exported Commodities

The top traded commodities for both flows are presented in Table 4.1A for imports and Table 4.1B for exports. This is intended to present the most traded goods (excluding Diamonds) with a view to guiding users on opportunities to produce commodities for import substitution, possible exportation and economic diversification.

## 5.0 Imports and Exports by Mode of Transport

For the purposes of the compilation of International Merchandise Trade Statistics, the mode of transport refers to the method used for the mobility of goods in and out of the country. These statistics are predominantly collected to be used as guidance in formulating transport policy and monitoring international transport routes, as transport is critical for trade facilitation. Modes of transport mainly used in Botswana for movement of international merchandise trade are Air, Road and Rail. **Table B** presents statistics relating to modes of transport while **Chart B** gives the graphical illustration.

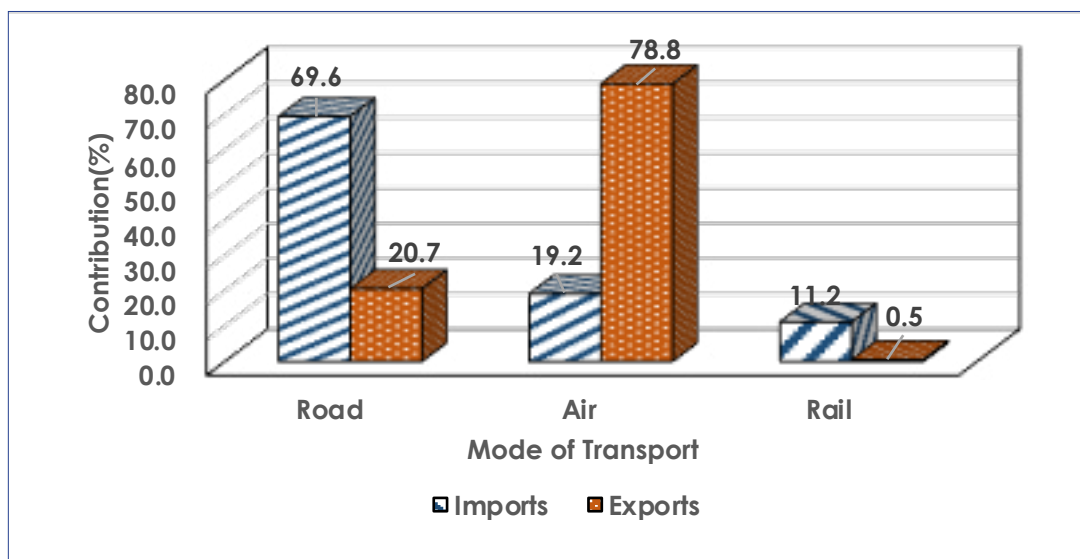

During the month under review Imports accounting for 69.6 percent (P4, 760.8 million) of the monthly total value were transported into the country by Road, while those carried by Air and Rail represented 19.2 percent (P1, 315.4 million) and 11.2 percent (P767.6 million) respectively.

Goods that left the country by Air were valued at P4, 015.9 million, representing 78.8 percent of total exports, while those exported by Road and Rail accounted for 20.7 percent (P1, 052.4 million) and 0.5 percent (P25.9 million) in that order.

## 6.0 Transit Trade

Transit trade means internal transportation of goods which are still under customs control and are not customs cleared yet. International transit can include one or more border crossings when goods are carried from the origin country to destination country. Botswana is a very important country for transit trade. It serves as a gateway to Southern Africa. Transit trade is exempted from all kinds of taxes as it is executed before entering Botswana customs area.

**Table C1** and **Chart C1** below shows that for the month of February 2023, goods worth P31, 910.5 million transited through Botswana destined for various countries. Martins Drift, Kazungula Bridge and Mamuno border posts handled goods accounting for 41.8 percent (P13, 324.1 million), 37.0 percent (P11, 811.4 million) and 10.1 percent (P3, 207.7 million). The top most transiting goods were Chapters 99 (Commodities not specified according to kind), 74 (Copper and articles thereof) and 28 (Inorganic chemicals; organic and inorganic compounds of precious metals; of rare earth metals) at 26.6 percent (P8, 492.9 million), 24.6 percent (P7, 842.6 million) and 8.3 percent (P2, 640.5 million) respectively.

## 7.0 Concepts, Sources and Methods

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana, and uses the General Trade system. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerised and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Imports are valued CIF (cost, insurance & freight), while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

## 7.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

## 7.2 Concepts and Definitions

- i. **Domestic Exports:** These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.
- ii. **Re - Exports:** These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.
- iii. **Total exports:** This is the sum of domestic exports and re-exports
- iv. **Imports:** These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.
- v. **Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

## 7.3 Exclusions from IMTS

- i. **Goods in Transit** - This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.
- ii. **Goods temporarily admitted or dispatched** - These are goods that, at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working, etc.
- iii. **Monetary Gold**- This is gold to which the monetary authorities have title and is held as reserve assets.
- iv. **Issued banknotes and securities and coins in circulation**-These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is, however, not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
