## Preface

**This report is a revision of the original. The revision is in Table 2.3: Diamonds Trade – January 2020 to June 2022 in Million Pula. It was realised that the labels for exports and imports were swapped, hence the need for correction.**

International Merchandise Trade Statistics play a crucial role in the world economy. It is an account of all transactions of goods between a country and its trading partners. The account measures the value and quantity of goods that add to or subtract from the stock of material resources of a country, by entering (imports) or leaving (exports) its economic territory. Therefore, trade statistics remain one of the major indicators of the performance of a country's economy and its competitiveness in the world market.

The monthly International Merchandise Trade Statistics are used extensively in the compilation of national accounts and balance of payments. Furthermore, these statistics are used by government institutions and other stakeholders for trade negotiations and other various purposes.

This publication outlines Botswana's monthly International Merchandise Trade Statistics (IMTS) for June 2022. It shows summaries of total international merchandise trade as presented in **Table 1.0**. Trade by principal commodity groups is presented in **Table 2.1** for imports and **Table 2.2** for exports, while **Table 2.3** gives trade on diamonds only. The direction of trade appears in **Table 3.1A** (imports) and **Table 3.2A** (total exports). Major trading partner countries by commodity groups, as a percentage of trade at region or country level, for June 2022 are presented in **Table 3.1B** for imports and **Table 3.2B** for exports. **Table 4.1A** presents statistics on most imported commodities during June 2022, while exports are given in **Table 4.1B**.

Changes in data for the corresponding months in the current versus previous digests may be attributed to data from transactions that had deferred customs duty assessments. The data for such transactions would only be available at a later stage after customs duty assessments have been completed.

## Executive Summary

This International Merchandise Trade Statistics (IMTS) monthly digest provides a summary of trade statistics on Botswana's total imports and exports of goods for June 2022.

Total imports were valued at P8, 419.4 million during June 2022, giving a decrease of 1.6 percent from the revised May 2022 value of P8, 552.0 million. Total exports during the same month stood at P10, 354.9 million, displaying an increase of 14.7 percent from the revised May 2022 value of P9, 031.5 million

The leading import commodity groups during the reporting period were Food, Beverages & Tobacco with 26.7 percent, followed by Fuel with 20.4 percent contribution to total imports. These were followed by Machinery & Electrical Equipment and Diamonds with contributions of 12.2 percent and 10.9 percent, to total imports respectively, during the month under review. Diamonds, Copper and Machinery & Electrical Equipment contributed 89.4 percent, 2.4 percent and 2.1 percent to total exports in that order, during the reference month.

In June 2022, imports from **SACU** made a contribution of 64.1 percent, whilst those from **Asia** and the **EU** accounted for 11.9 percent and 2.5 percent of total imports respectively. Imports from South Africa accounted for 58.8 percent of total imports. Brazil, Namibia, India, and Canada provided imports representing 11.4 percent, 5.0 percent, 4.9 percent and 4.6 percent, respectively.

In June 2022, exports destined to Asia, the **EU** and **SACU** accounted for 67.0 percent, 17.4 percent and 12.3 percent of the total exports, respectively. The **UAE**, Belgium and India received exports representing 28.3 percent, 17.3 percent and 15.9 percent of the monthly total, respectively. South Africa received exports accounting for 10.5 percent of the monthly total.

During the current period, imports by Road accounted for 81.1 percent whereas those entering the country by Air and Rail represented 10.5 percent and 8.4 percent, respectively. Exports by Air accounted for 90.4 percent of total exports, while those by Road and Rail transport represented 9.1 percent and 0.4 percent, respectively.

## 1.0 Total Trade

Total merchandise trade refers to imports, domestic exports, re-exports and trade balance. Discussions are based on June 2022, which is also referred to as the reference period, the period under review or the current month, throughout the digest.

### 1.1 Data Revision

The current monthly digests are based on preliminary figures as regards the reference period. Revisions on the monthly data are subsequently made when new information becomes available. Revisions are made on a monthly basis, when monthly data files are uploaded into the database, bringing additional information for previous months. In some instances, revisions are negligible while significant in others.

In June 2022, transactions for April 2022 and May 2022 had late customs duty assessments. **Table A** shows revised data for the affected months, comparing figures as at the May 2022 Digest and the current. May 2022 imports were revised up by 2.0 percent (P171.2 million). Total Exports for May 2022 rose by 1.9 percent (P167.4 million). Revisions for April data were minimal as displayed in **Table A**.

**Table A: Data Revision: April and May 2022 (Million Pula)**

### 1.2 Imports

Imports are valued at Cost, Insurance & Freight (CIF), which includes the cost of the commodity, insurance and freight charges, but excludes customs or any other duties paid on arrival. During June 2022, imports were valued at P8, 419.4 million, representing a decline of 1.6 percent (P132.7 million) from the revised May 2022 figure of P8, 552.0 million. The decline was mainly due to a decrease in Diamonds imports by P1, 826.9 million (66.6 percent), as displayed in **Table 2.1**.

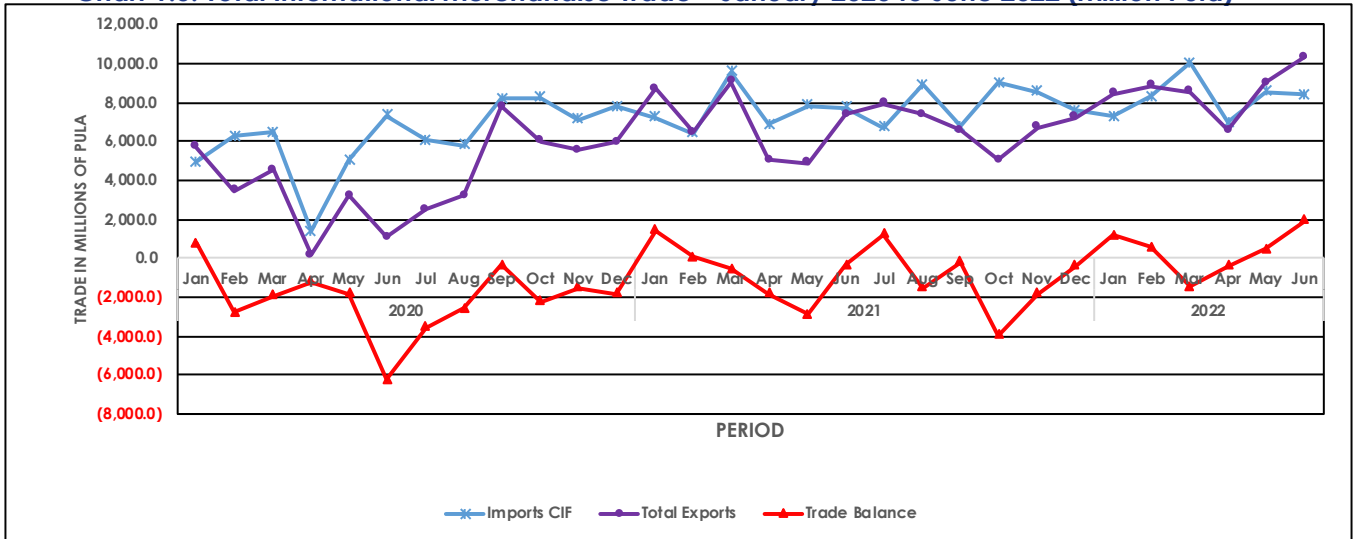

### 1.3 Total Exports

In June 2022, Botswana's total export value went up by 14.7 percent (P1, 323.3 million), from the revised May 2022 figure of P9, 031.5 million to P10, 354.9 million. The increase is attributed largely to the rise in Diamonds exports, by 17.4 percent (P1, 372.8 million) from the revised May 2022 value of P7, 883.0 million to P9, 255.8 million.

### 1.4 Trade Balance

Botswana recorded a trade surplus of P1, 935.5 million in June 2022. **Chart 1.0** displays the graphical presentation of the trade balance from January 2020 to June 2022. This is the third consecutive surplus and by far the highest since January 2022.

Chart 1.0: Total International Merchandise Trade – January 2020 to June 2022 (Million Pula)

## 2.0 Trade By Principal Commodity Groups

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters or commodities, for example 'Vehicles & Transport Equipment' combines vehicles and other equipment used for transport purposes.

In cases where it becomes a challenge to come up with further groups of related chapters or commodities, the remaining commodities are grouped together under the general category called 'Other'. This occurs when a commodity group's contribution to the total is minimal.

### 2.1 Principal Imports

Botswana received imports valued at P8, 419.4 million in June 2022. During this period Botswana's top imports were Food, Beverages & Tobacco; Fuel; Machinery & Electrical Equipment and Diamonds. Food, Beverages & Tobacco imports represented 26.7 percent (P2, 250.5 million) of total imports, while Fuel and Machinery & Electrical Equipment imports accounted for 20.4 percent (P1, 719.9 million) and 12.2 percent (P1, 029.9 million) respectively. Diamonds imports represented 10.9 percent (P915.8 million) of total imports. Contributions made by other commodity groups are illustrated in [Table 2.1](#) and [Chart 2.1](#).

Note: 'Other Goods' here includes any other goods not displayed as in Table 2.1

## 2.2 Principal Exports

In June 2022, Botswana exported merchandise valued at P10,354.9 million. The Diamonds group accounted for 89.4 percent (P9,255.8 million), followed by Copper with 2.4 percent (P252.0 million). Machinery & Electrical Equipment contributed 2.1 percent (P219.7 million) of monthly total exports. Contributions made by other commodity groups are presented in **Table 2.2** and **Chart 2.2**.

### 3.0 Direction Of Trade

The direction of Trade analyses the value of merchandise trade between the compiling country and the major trading partners. As a result the direction of trade discusses the last known destination for exports and sources of imports. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Trade by major trading partner countries, regions and principal commodity groups for imports and exports, during June 2022 appears in **Table 3.1A** and **Table 3.2A**, respectively. **Table 3.1B** (imports) and **Table 3.2B** (exports) show percentage distributions for major sources and destinations by principal commodity groups during the same month.

#### 3.1 Imports by Major Trading Partner Countries and Regions

Botswana imported goods worth P8, 419.4 million in June 2022, with the **SACU** region contributing 64.1 percent (P5, 400.2 million) to the total. The top most imported commodity groups from the customs union were; Fuel and Food, Beverages & Tobacco with contributions of 31.2 percent (P1, 683.7 million) and 21.8 percent (P1, 177.5 million) respectively. Machinery & Electrical Equipment contributed 13.1 percent (P708.6 million) to imports from the region during the period, refer to **Table 3.1A** and **Table 3.1B**.

South Africa supplied imports representing 58.8 percent (P4, 950.8 million) of total imports during the current month. Fuel; Food, Beverages & Tobacco and Machinery & Electrical Equipment contributed 26.9 percent (P1, 329.7 million), 23.2 percent (P1, 148.1 million) and 14.3 percent (P705.6 million) respectively, to total imports from that country. Chemicals & Rubber Products, followed with 11.9 percent (P588.1 million). Namibia contributed 5.0 percent (P419.6 million) to the overall imports during the period under review. Imports from Namibia were mostly Fuel at 84.2 percent (P353.4 million) of imports from that country.

Imports from Asia were valued at P1, 000.8 million, accounting for 11.9 percent of total imports during the reference period. The major commodity groups imported from the block were Diamonds, Machinery & Electrical Equipment and Food, Beverages & Tobacco with contributions of 38.2 percent (P381.8 million), 18.9 percent (P189.6 million) and 16.9 percent (P169.1 million) of total imports, respectively (tables **3.1A** & **3.1B**). India and Japan contributed 4.9 percent (P416.5 million) and 2.7 percent (P229.4 million) of total imports respectively.

In June 2022, Botswana received imports worth P211.0 million from the **EU**, translating to 2.5 percent of total imports. The major commodity group imported from the **EU** was Diamonds, at 47.3 percent (P99.8 million) of all imports from the union. Machinery & Electrical Equipment and Chemicals & Rubber Products contributed 26.9 percent (P56.8 million) and 15.3 percent (P32.4 million) respectively.

Brazil supplied imports worth P957.6 million, representing 11.4 percent of Botswana's total imports during the current period. Imports from Brazil were mainly Food, Beverages & Tobacco, specifically Sugars & sugar confectionery at 91.2 percent (P873.7 million) of imports from that country. Canada contributed 4.6 percent (P389.3 million) of total imports, of which 97.2 percent (P378.5 million) were diamonds. Sources of imports during June 2022 can be viewed in **Table 3.1 A** and **Chart 3.1**.

**Chart 3.1: Imports by Major Trading Partner Countries & Regions – June 2022**

'Rest of the World' includes all other Countries or Regions not specified as in Table 3.1

### 3.2 Exports by Major Trading Partner Countries and Regions

Export destinations for Botswana lie in Asia, Europe as well as the **SACU** region. During the reference period Asia was the top destination for Botswana exports, having received 67.0 percent (P6, 942.0 million) of total exports. These exports were mainly destined for the **UAE** and India, having received 28.3 percent (P2, 926.8 million) and 15.9 percent (P1, 642.4 million) of total exports, respectively. Diamonds and Copper were the major commodity groups exported to Asia during the current period as shown in **Table 3.2A** and **Table 3.2B**.

The **EU** received exports amounting to P1, 802.0 million, accounting for 17.4 percent of total exports. Belgium received almost all the exports destined to the union, acquiring 99.2 percent (P1, 787.6 million) of total exports destined for the **EU** during the month. The Diamonds group was the main commodity group exported to the **EU**, at 99.2 percent (P1, 787.2 million) as displayed in **Table 3.2A** and **Table 3.2B**.

In June 2022, exports destined to the **SACU** region amounted to P1, 269.1 million, accounting for 12.3 percent of total exports. Diamonds, Machinery & Electrical Equipment and Live Animals accounted for 44.0 percent (P559.0 million), 15.2 percent (P192.9 million) and 10.5 percent (P133.7 million) of total exports to the customs union (**Table 3.2A** and **Table 3.2B**). South Africa and Namibia received 10.5 percent (P1, 091.7 million) and 1.7 percent (P176.6 million) of total exports respectively, during the month under review (**Table 3.2A**).

**Chart 3.2: Exports by Major Trading Partner Countries & Regions – June 2022**

'Rest of the World' includes all other Countries or Regions not specified as in Table 3.2

## 4.0 Imports and Exports by Top imported and Exported Commodities

The top traded commodities for both flows are presented in **Table 4.1A** for imports and **Table 4.1B** for exports. This is intended to present the most traded goods with a view to guiding users on opportunities to produce commodities for import substitution or possible exportation.

## 5.0 Imports and Exports by Mode of Transport

For the purposes of compilation of International Merchandise Trade Statistics, mode of transport refers to the method used for the carriage of goods in and out of the country. These statistics are predominantly collected to be used as guidance in formulating transport policy and monitoring international transport routes, as transport is critical for trade facilitation. Modes of transport mainly used in Botswana for international merchandise trade are Air, Road and Rail. Table B presents statistics relating to modes of transport while **Chart B** gives the graphical illustration.

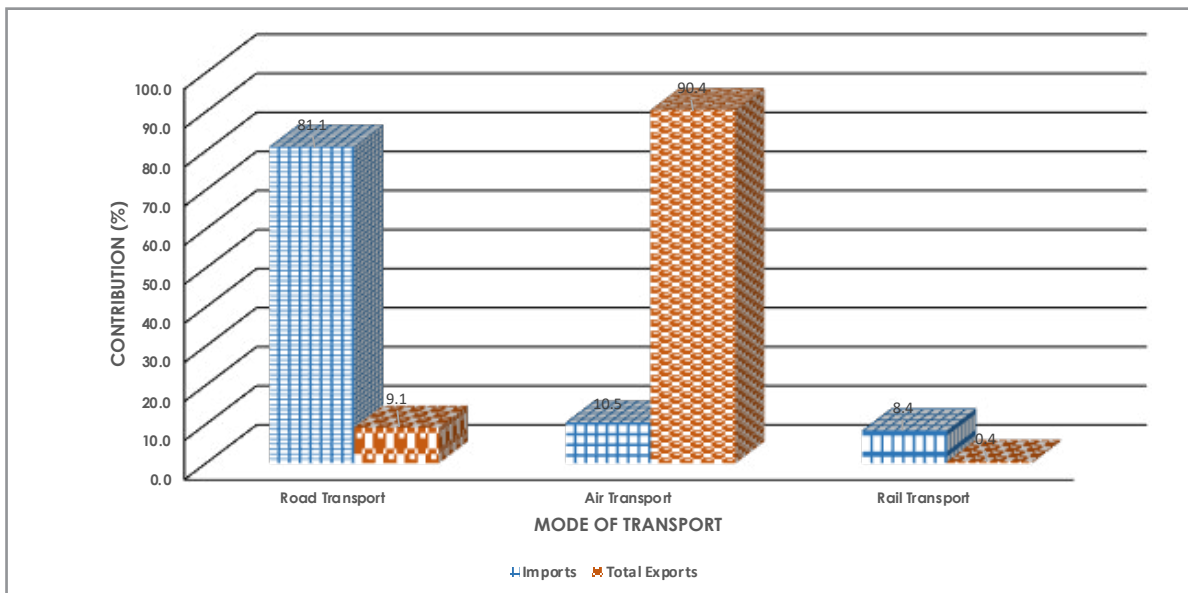

In June 2022, goods exported by Air amounted to P9, 365.5 million, representing 90.4 percent of total exports. Those transported by Road and Rail accounted for 9.1 percent (P945.9 million) and 0.4 percent (P42.6 million) respectively.

During the month under review, Imports representing 81.1 percent (P6, 826.2 million) of the monthly total were transported into the country by Road while those conveyed by Air and Rail accounted for 10.5 percent (P882.1 million) and 8.4 percent (P710.4 million) respectively.

**Table B: Imports and Total Exports by Mode of Transport – June 2022 (Million Pula)**

## 7.0 Concepts, Sources and Methods

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana, and uses the General Trade system. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerised and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Imports are valued CIF (cost, insurance & freight), while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 7.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 7.2 Concepts and Definitions

- i. **Domestic Exports:** These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.
- ii. **Re - Exports:** These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.
- iii. **Total exports:** This is the sum of domestic exports and re-exports
- iv. **Imports:** These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.
- v. **Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 7.3 Exclusions from IMTS

- i. **Goods in Transit** - This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.
- ii. **Goods temporarily admitted or dispatched** - These are goods that, at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working, etc.
- iii. **Monetary Gold**- This is gold to which the monetary authorities have title and is held as reserve assets.
- iv. **Issued banknotes and securities and coins in circulation**-These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is, however, not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
