2.0 Technical Notes

This section provides information on the data sources, methodology, and definitions of terms used in producing tourism statistics. It aims to help users understand how the data is sourced, how the report is processed and compiled, and what the various terms used in the report mean.

2.1 Data Sources and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International tourist data is collected using Arrival forms completed by non-citizens at designated ports of entries (Land Borders and Airports). The form gathers data on the traveler's personal characteristics, such as sex, age, country of nationality, country of residence and purpose of entry. By default, data is also collected on the month of travel, mode of transport and port of entry.

The results and analysis in this report adheres to the guidelines, definitions and classifications recommended by the United Nations World Tourism Organization (UNWTO) and the United Nations Statistical Commission (UNSC). This publication is produced in accordance with internationally accepted statistical standards and guidelines.
