3.0 TECHNICAL NOTES

This section presents data sources, methodology and definition of terms used in production of tourism statistics. This is meant to enable the users to interpret the statistics carried in this stats brief with understanding of how the data is sourced, how processing and compilation of the report was done and what the various terms used in the report mean.

3.1 Data Source and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International tourist data used in this publication was collected using Arrival forms that were completed by non-citizens at gazetted ports of entry (Land Borders and Airports). Each form asks questions on personal characteristics of the traveller which include among others, sex, age, country of nationality, country of residence and purpose of entry. By default data is also collected on the month of travel, mode of transport and point of entry.

The results and analysis presented in the report follow the guidelines, definitions and classifications recommended by the UN Tourism and the United Nations Statistical Commission (UNSC). This publication is produced in line with international accepted statistical standards and guidelines.
